10 answers · Rationale-rich · Teach from doc

Q1**A****A. Harsh**

Choice A is the best answer because as used in the text, "rough" most nearly means harsh, or forceful and unpleasant. The text describes Mary's surroundings as she plays: the sun is out and there's "a little wind." To further illustrate the wind, the narrator contrasts the word "rough" with a description of the wind blowing in "delightful little gusts," suggesting that the wind is not unpleasant or harsh at all.

Choice B is incorrect. Although in some contexts "rough" objects, or objects with irregular surfaces, can sometimes be scratchy, rough doesn't mean scratchy in this context. The text explains that the wind is not rough but rather gentle, "delightful little gusts," which suggests that the use of "rough" here is referring to the degree of force of the wind. Choice C is incorrect because there's nothing in the text to suggest that the wind wasn't "basic," or simple and uncomplicated. Instead, the text describes the wind as blowing not roughly or harshly but in "delightful little gusts." Choice D is incorrect because the word "vague" means not clearly expressed or seen. Nothing in the text indicates that the wind was barely noticeable to Mary as she played outside, but rather the text states that it was delightful.

Q2**A****A. It introduces an artist and then explains some common characteristics of well-known paintings by that artist.**

Choice A is the best answer. The first sentence introduces Senju as a famous artist, while the next three sentences describe the defining features of his art, such as it only showing part of the waterfall and its origins in US art movements and Japanese techniques.

Choice B is incorrect. The text doesn't provide examples of any other artists who use Senju's techniques. Choice C is incorrect. The text doesn't describe any single famous painting or make comparisons between paintings. Choice D is incorrect. The text doesn't provide an opinion on Senju (just facts), nor does it suggest that his art has been overlooked—in fact, it states that he is "known worldwide."

Q3

A

A. instituting

Choice A is the best answer because it most logically completes the text's discussion of programs that encourage money to cycle within a community. In this context, "instituting" means initiating. The text indicates that making purchases at small local businesses can help keep money cycling within a community. The text goes on to state that some cities are establishing incentives to promote small business shopping. This context supports the idea that some cities are instituting programs to encourage this consumer behavior.

Choice B is incorrect because saying that some cities are "occupying," or forcibly holding possession or control of, programs that encourage shoppers to make purchases at small local businesses wouldn't make sense in context. The text doesn't discuss who controls these programs but instead indicates that some cities are establishing incentives that encourage shoppers to make purchases at small local businesses. Furthermore, it wouldn't make sense to say that a city is occupying a program. Choice C is incorrect because nothing in the text suggests that cities are "underestimating," or failing to understand the value of, programs that encourage consumers to shop at small local businesses. The text indicates that some cities are establishing incentives to encourage small business shopping, which suggests that these cities understand the value of such programs. Choice D is incorrect because saying that some cities are "encountering," or coming into contact with, programs that encourage consumers to shop at small local businesses wouldn't make sense in context. The text indicates that some cities are already establishing incentives to encourage shoppers to make purchases at small businesses. This context suggests that the cities are instituting the programs, not that they are encountering them.

Q4

C

C. To present a recent archaeological discovery

Choice C is the best answer because it most accurately describes the main purpose of the text. The text states that archaeologists recently discovered a well-preserved food shop, or *thermopolium*, in Pompeii, Italy. The text then further describes the contents of the discovery and provides an example of what was found. Thus, the overall purpose of the text is to present a recent archaeological discovery.

Choice A is incorrect. Although the text states that archaeologists found ancient artworks, it doesn't compare these artworks to modern ones or to any other artworks. Choice B is incorrect. Although the archaeological discovery discussed in the text was made in Italy, the text doesn't provide any information about politics or government in Italy. Choice D is incorrect because the text doesn't discuss the climate where the archaeological discovery was made or in any other region.

Q5

B

B. preserve

Choice B is the best answer because it most logically completes the text about Latro, the main character in Gene Wolfe's novel *Soldier of the Mist*. In this context, "preserve" means save or keep from destruction or loss. The text describes Latro as a character who loses his memory whenever he sleeps. The text goes on to explain that before going to sleep, Latro records his most important memories to prevent him from forgetting, or losing, them. The context therefore supports the idea that Latro records his most important experiences in an effort to save, or preserve, his memory of them from loss.

Choice A is incorrect because "suspect" would mean mistrust, which wouldn't make sense in this context. The text emphasizes that in writing down his experiences, Latro carefully chooses those which are most important to him and thus worth remembering later, not that he is mistrustful or has reason to doubt the experiences he records. Choice C is incorrect because in this context, "suggest" would mean propose for consideration. The text emphasizes the fact that Latro actually records those experiences that he has decided are most important to him, not that he merely proposes which experiences to consider for inclusion in his scroll. Choice D is incorrect because in this context, "imagine" would either mean form a mental image of or fabricate, neither of which would logically complete the text. Although it's possible that reviewing records from previous days might enable Latro to reconstruct mental images of what has happened to him in the past, the text emphasizes the fact that Latro carefully selects and writes down his experiences so he will remember them in the future, not so that he can form mental pictures of them as he writes them down. In a similar vein, the text emphasizes that Latro is recording experiences that have actually happened to him, not that he's fabricating the experiences he records.

- B. It showcases how Adam’s flexibility and consideration strengthen his relationship with his great-uncle Richard.

Choice B is the best answer because it most accurately describes the main purpose of the text, which is to showcase how Adam’s flexibility and consideration strengthen his relationship with his great-uncle Richard. The text begins by stating that the meeting between the two characters is proceeding well and then describes Adam’s thoughtful behavior: noticing his great-uncle’s interest in the ship, Adam suggests staying on board overnight and expresses willingness to accommodate his great-uncle’s schedule and destination preferences. The text goes on to describe the positive effect of Adam’s thoughtfulness and flexibility, indicating that Adam’s “affectionate willingness” to accommodate Richard’s preferences “quite won the old man’s heart.” The text concludes by suggesting that Adam’s ability to anticipate his great-uncle’s wishes and willingness to accommodate them result in the rapid development of affection and intimacy between them, stating that they soon became “almost like old friends.” Therefore, the text’s main purpose is to demonstrate how Adam’s flexibility and consideration strengthened his and his great-uncle’s relationship.

Choice A is incorrect. Although the text explains Adam’s reason for suggesting that Richard spend the night on the ship rather than finding lodging on land (which is that Adam perceives Richard’s interest in the ship), this isn’t the text’s main purpose. Rather, Adam’s suggestion about where to sleep for the night serves as an example of the consideration Adam shows toward Richard, and the text mentions it mainly to explain how an affectionate relationship developed so quickly between them. Moreover, the text only states that Adam encourages Richard to stay on the ship; it doesn’t specify where Adam plans to spend the night. Choice C is incorrect because the text doesn’t describe why Adam and his great-uncle Richard are excited about their journey. While the text mentions that Adam is willing to “start at any hour and go anywhere,” it provides no details about any planned journey, its destination, or even whether they will be continuing by ship or some other mode of transportation, nor does the text mention anything about either character’s feelings of excitement about their plans. We learn only that Adam is accommodating about potential travel plans, not that either character is particularly eager about the journey itself. The text’s main focus is on Adam and Richard’s developing relationship, not on any anticipated travel experiences. Choice D is incorrect because the text doesn’t show a contrast between initial wariness and later affection. On the contrary, the text begins by stating that the meeting between Adam and his great-uncle Richard has begun in an “auspicious,” or promising, manner and is “proceed[ing] well,” suggesting that Richard’s impression is positive from the outset. There’s no indication of any initial suspicion, caution, or reserve on Richard’s part that later changes to affection. Instead, the text describes a

consistently positive interaction that deepens from a good first impression into a stronger, more familiar relationship because of Adam’s considerate behavior.

Q7

B

B. efficient

Choice B is the best answer because it most logically completes the text’s discussion about Kouchaki and colleagues’ research into how workload affects productivity. In context, “efficient” means effective or well organized. The text indicates that, according to Kouchaki and colleagues’ research, people who worked on hard tasks first were “more skilled and productive” than those who did easy tasks first. This context conveys the idea that despite their sense of accomplishment, the people who chose to do the easy tasks first were less efficient or productive than those who tackled hard tasks first.

Choice A is incorrect because there’s nothing in the text to suggest that workers who do easy tasks first are less “secretive,” or uncommunicative or silent, than those who do hard tasks first. Rather, the text suggests that people are less skillful or efficient if they tackle easy tasks before the hard ones. Choice C is incorrect because “outgoing” means openly friendly, which wouldn’t make sense in this context. The text focuses on Kouchaki and colleagues’ research in which people who worked on hard tasks first were “more skilled and productive” than those who did easy tasks first and were therefore less efficient. Choice D is incorrect because there’s nothing in the text to suggest that workers who do easy tasks first are less “unsympathetic,” or insensitive or unkind, than those who do hard tasks first. Rather, the text suggests that people are less skillful or efficient if they tackle easy tasks before the hard ones.

Q8

A

- A. It describes the effects of a process devised by researchers that increases the longevity of an object discussed in the text.
-

Choice A is the best answer because it describes how the underlined portion of the sentence functions in the text as a whole. The text begins by discussing ordinary soap bubbles, objects that usually exist for less than a minute before popping due to either evaporation or gravity-induced drainage. The text then goes on to mention work by researchers Aymeric Roux and colleagues, who have discovered how to increase the longevity of bubbles by altering their chemical composition. Finally, the underlined portion of the text describes how this process works: since the bubble contains both water and glycerol, it can draw water molecules from the surrounding air to replace those lost to evaporation. Therefore, the underlined portion of the sentence describes the effects of a process devised by researchers that increases the longevity of an object described in the text.

Choice B is incorrect because the circumstance that prompted the research is discussed in the first sentence of the text, not the underlined portion. Choice C is incorrect because the underlined portion of the text does not address why soap bubbles must eventually rupture. Rather, it explains how the longevity of soap bubbles can be extended. Choice D is incorrect because the underlined portion of the text does not mention any future experiments.

Q9

B

B. speculates

Choice B is the best answer because it most logically completes the text’s discussion of Ochoa’s prediction that humans will one day need to live in places other than Earth. As used in this context, “speculates” would mean puts forward an idea without firm evidence. The text states that Ochoa “doesn’t have a definite idea” about when humans might need to live in other environments and characterizes Ochoa’s prediction as a “conjecture,” or a conclusion presented without convincing evidence. This context indicates that Ochoa speculates when she makes this prediction.

Choice A is incorrect because saying that Ochoa “demands,” or insists or requires, that humans will one day need to live in other environments than Earth’s would not make sense in context. The text indicates that she’s unsure about the timing but hypothesizes that it will someday happen. Choice C is incorrect because saying that Ochoa “doubts,” or questions or disbelieves, that humans will one day need to live in other environments than Earth’s would not make sense in context. The text indicates that although Ochoa is unsure about the timing, she hypothesizes that humans will need to live in places other than Earth and encourages research into future travel to the moon. Choice D is incorrect because saying that Ochoa “establishes,” or proves, that humans will one day need to live in other environments than Earth’s would not make sense in context. Rather than stating that Ochoa discusses her idea with certainty and supports it with evidence, the text indicates that Ochoa is unsure about when humans might need to live in other environments.

Q10

A

A. To portray Polly's reaction to Fanny's friends

Choice A is the best answer because it most accurately describes the main purpose of the text, which is to show how Polly reacted to some of Fanny's other friends. The text describes Polly as being frightened of Fanny's friends because they seemed "much older and wiser" to her and elaborates that they "talked about things of which" Polly was unfamiliar, uninterested, and shocked. Thus, the main purpose of the text is to describe Polly's impressions of Fanny's other friends.

Choice B is incorrect because the text does not provide any of the topics Polly discussed with Fanny's friends, stating only that Polly found the topics unfamiliar, uninteresting, and shocking. Choice C is incorrect because the text says nothing about how Fanny and her other friends first met. Choice D is incorrect because the focus of the text is on Polly's feelings about Fanny's other friends, not on the other friends' feelings about Polly.

Notes

Accept equivalent forms (e.g. $0.25 \equiv 1/4$). For grid-in items, decimal and fraction answers are both valid.
