Q1**D****D. contradicted**

Choice D is the best answer because it most logically completes the text's discussion of the initial spread of silk beyond China. In this context, "contradicted" means opposed or challenged. The text indicates that new archaeological evidence about silk use in South Asia has done something to a long-held thought about the initial spread of silk. According to the text, the new evidence reveals that people used silk in South Asia 1,000 years before the second century CE, which directly challenges the previous belief that silk first spread beyond China in the second century CE.

Choice A is incorrect because the text indicates that an archaeological finding about silk use has done something to a long-held thought about the initial spread of silk, and it wouldn't make sense to suggest that the finding could have "investigated," or examined, a belief; evidence can't examine anything. Choice B is incorrect because the text indicates that an archaeological finding about silk use has done something to a long-held thought about the initial spread of silk, and it wouldn't make sense to suggest that the finding could have "misinterpreted," or incorrectly understood, a belief; evidence can't try to understand anything. Choice C is incorrect. In this context, "anticipated" would mean expected or predicted. The text indicates that a new archaeological finding about silk use has done something to a long-held thought about the initial spread of silk, and a new finding can't predict a belief that is already established.

Q2

B

B. It introduces a scientific term that is used in the discussion that follows.

Choice B is the best answer because it most accurately describes the function of the underlined portion in the text as a whole. The first two sentences introduce the idea that soil and rocks can be moved from one location to another by something other than rivers and streams. The underlined sentence then states that the term used by scientists to refer to this process is “aeolian transport.” The discussion that follows explains what aeolian transport is (the movement of small geological materials over potentially great distances by the wind) and describes an example of a study that found that dust particles had been moved by aeolian transport from Australia to Antarctica. Thus, the underlined portion introduces a scientific term that is used in the discussion that follows.

Choice A is incorrect because the underlined portion of the text doesn’t present any remarks from Melisa Diaz, nor does it suggest that Diaz and her team encountered difficulties in their study. Instead, the phrase in quotation marks in the underlined portion simply presents a term that is used by scientists to refer to a specific process discussed in the text. Choice C is incorrect because nothing in either the underlined portion or the text as a whole suggests that the findings of the study presented in the text were surprising or unexpected. In fact, the text suggests that Diaz and her team wanted to see if aeolian transport could explain the appearance of certain geological materials in Antarctica, and their findings did indeed confirm the involvement of aeolian transport. Choice D is incorrect. Although the first sentence of the text mentions soil and rocks, which are two different kinds of geological material, the underlined portion doesn’t refer to these materials, nor does it explain the difference between them. Rather, the underlined portion introduces the scientific term “aeolian transport,” which is used in the discussion that follows.

Q3

D

D. ensuring

Choice D is the best answer because it most logically completes the text’s discussion of cucurbits. In this context, “ensuring” means guaranteeing, or making sure of, the cucurbits’ survival. The text states that cucurbits faced extinction in the past because their means of seed dispersal disappeared, but the ancestors of Indigenous peoples in North America began farming cucurbits around that same time, so the crops were no longer threatened. Therefore, the context supports the idea that the ancestors of Indigenous peoples in North America helped with ensuring the cucurbits’ survival.

Choice A is incorrect because in this context verifying means making sure that something is accurate. In the text, the ancestors of Indigenous peoples in North America were ensuring the survival, not the accuracy of, the cucurbits. Choice B is incorrect. Although the cucurbit crops themselves were multiplying, or growing in number, as a result of the work of the ancestors of Indigenous peoples in North America, it wouldn’t make sense in context to say that the survival of the plants was multiplying. Choice C is incorrect because according to the text, in raising cucurbits as crops, the ancestors of Indigenous peoples in North America were attempting to help the plants grow and survive; they weren’t attempting to comfort, or free the plants from pain.

Q4

A

A. To provide examples of Price's importance as a composer

Choice A is the best answer. The text provides an overview of Florence Price's importance by describing her success at the 1932 Wanamaker Foundation Awards, her blending of Black spirituals and classical European Romantic musical traditions, and the recent performances and recordings of her concertos and symphonies by major orchestras.

Choice B is incorrect. The text does mention that Price's compositions have been performed and recorded by major orchestras, but it doesn't argue that more orchestras should do so. Choice C is incorrect. The text does mention the blending of Black spirituals and classical European Romantic musical traditions, but only briefly, as part of a broader overview of Price's career. Choice D is incorrect. The text mentions Price's blending of Black spirituals with classical European Romantic musical traditions, but it doesn't directly compare Price's scores with those of classical European composers.

Q5

D

D. inspired by

Choice D is the best answer because it most logically completes the text's discussion of Carmen Lomas Garza's artistic process. In this context, "inspired by" means influenced by or motivated by. The text refers to how, regardless of the scale of the work, Garza uses her memories of Texas and details from California to create her art. If Garza is basing her work on her direct experiences, then they play a part in her artistic process. This context thus suggests that Garza's art is inspired by the experiences of her childhood in Texas and her current life in California.

Choice A is incorrect because it wouldn't make logical sense to indicate that Garza is "complimented by"—or praised by—something inanimate such as direct experience. Choice B is incorrect because describing Garza as "uncertain about"—or unsure or doubtful of—direct experience would suggest that she had misgivings about it. If Garza were unsure of her experiences, that would suggest that she couldn't recall them, and Garza wouldn't be able to represent direct experience in her art if she were uncertain of the memories or details. Choice C is incorrect because describing Garza as "unbothered by"—or uninterested in—her experience would imply the opposite of what the text suggests about Garza's artistic process. The text indicates that Garza's art comes from memories of her childhood in Texas and details of her surroundings in California.

Q6

A

A. It reinforces the text's skepticism about the possibility of truly achieving self-knowledge.

Choice A is the best answer. The text repeatedly claims that true self-knowledge can't possibly be achieved, and this rhetorical question emphasizes that point.

Choice B is incorrect. The underlined question doesn't do this. The text never expresses doubts about the value of self-knowledge—rather, the text expresses doubts about the possibility of achieving self-knowledge. Choice C is incorrect. The underlined question doesn't do this. The text doesn't provide directions for how to achieve self-knowledge—rather, it claims that true self-knowledge is impossible to achieve. Choice D is incorrect. The underlined question doesn't do this. The text doesn't ever define self-knowledge, and popularity isn't mentioned in the text at all.

Q7

C

C. Stretching toward

Choice C is the best answer because as used in the text "reaching across to" most nearly means stretching toward. The text begins with Mrs. Wilkins stating that she wants to have one of the oranges that she's admiring. The text then indicates that Mrs. Wilkins, staying where she is, holds out a big orange to her friend. This context suggests that when the text describes Mrs. Wilkins as reaching across to the bowl of oranges, it means that she is stretching toward the bowl.

Choice A is incorrect because the text never suggests that Mrs. Wilkins is joining with, or becoming attached to, the bowl of oranges. Rather, the text indicates that she is stretching toward the bowl so she can pick out oranges for herself and her friend Rose to eat. Choice B is incorrect because the text never suggests that Mrs. Wilkins is gaining on, or overtaking in a competition or race, the bowl of oranges. The text suggests instead that the bowl is sitting still on a surface and that Mrs. Wilkins is extending her arm toward the bowl so she can pick out oranges for herself and her friend Rose to eat. Choice D is incorrect because the text doesn't indicate that Mrs. Wilkins is arriving at the bowl of oranges. In fact, the text states that Mrs. Wilkins stays where she is when reaching across to the bowl, meaning that she remains at a distance from it.

Q8

B

B. It explains the meaning of a word.

Choice B is the best answer because it most accurately describes how the underlined portion functions in the text as a whole. The underlined portion is a parenthetical phrase directly following the word “microfilm,” and it describes film containing small (“scaled-down”) images; the placement and focus of the portion indicate that it is serving to define the term “microfilm.”

Choice A is incorrect. Although the text is about accessing the writings of a famous historical figure (Douglass), the underlined portion doesn’t give information about Douglass or any other person. Instead, it explains what microfilms are. Choice C is incorrect because the text never describes any kind of debate or disagreement; it simply describes a change in how researchers can access historical documents, with the underlined portion defining an important term. Choice D is incorrect because the text never makes any mention of a particular finding, unexpected or otherwise; it simply describes a change in how researchers do some of their work, with the underlined portion defining an important term.

Q9

C

C. Create

Choice C is the best answer because as used in the text, “invent” most nearly means create or make up. The text begins by stating that Sara likes to tell stories and thoroughly enjoys telling them. The rest of the text describes how she looks and acts when she invents, or creates, “wonderful things” in her stories (“what she told”).

Choice A is incorrect. Although the text suggests that Sara makes up “wonderful things,” nothing suggests that she does so to mislead, or intentionally deceive, others; there is no reason to assume that Sara’s listeners don’t know that she’s creating the stories she shares. Choice B is incorrect because nothing in the text suggests that Sara is disguising, or trying to cover up or conceal, “wonderful things” when she tells stories; rather, she is creating them and presenting them in ways that make them “lovely or alarming” for her listeners. Choice D is incorrect because nothing in the text suggests that Sara is discovering, or unexpectedly finding, “wonderful things” in the stories she loves to tell; rather, that she is making things up as she tells the stories.

Q10

B

B. It identifies a specific reason behind some advertisers' hesitance to support television.

Choice B is the best answer because it accurately describes the function of the underlined phrase in the text as a whole. According to the text, advertisers were reluctant to support television in its early days. The underlined phrase then indicates that this reluctance was partly due to the US's involvement in World War II, which hindered television production. Thus, the underlined phrase identifies a specific reason behind some advertisers' hesitance to support television.

Choice A is incorrect. The text merely mentions that television was expected to be financed through advertising, as radio was at the time. Nothing in the text compares the origins of radio and television. Choice C is incorrect. The underlined phrase focuses on a reason advertisers were reluctant to support television, not measures taken to convince advertisers to support television. Choice D is incorrect. The underlined phrase focuses on a reason advertisers were reluctant to support television, not what types of television programming were popular.

Notes

Accept equivalent forms (e.g. $0.25 \equiv 1/4$). For grid-in items, decimal and fraction answers are both valid.
