Q1**C****C.** In fact,

Choice C is the best answer. "In fact" logically signals that the information in this sentence about the creation of the video game offers additional emphasis in support of the previous claim that video game studio founders Koola and Viv love cats.

Choice A is incorrect because "intermittently" illogically signals that the information in this sentence occurs sporadically or in intervals. Instead, the creation of the video game offers additional emphasis in support of the previous claim about Koola and Viv. Choice B is incorrect because "on the other hand" illogically signals that the information in this sentence contrasts with the previous claim about Koola and Viv. Instead, the creation of the video game offers additional emphasis in support of that claim. Choice D is incorrect because "nevertheless" illogically signals that the information in this sentence is true despite the previous claim that Koola and Viv love cats. Instead, the creation of the video game offers additional emphasis in support of that claim.

Q2

B

B. However,

Choice B is the best answer. "However" is used to indicate a contrast between two ideas. The first sentence describes how Still used to be famous. This sentence describes how Still is not very famous today, so the transition "however" fits perfectly.

Choice A is incorrect. This choice uses a transition that introduces an example. But the second sentence doesn't provide a specific example of Still's famous contributions to the Underground Railroad. Instead, it changes the subject to how his fame has faded over time. Choice C is incorrect. This choice uses a transition that introduces an example or continuation of a previous idea. But the second sentence doesn't provide a specific example of Still's famous contributions to the Underground Railroad. Instead, it changes the subject to how his fame has faded over time. Choice D is incorrect. This choice uses a transition that indicates the agreement between two ideas. But this sentence shows a contrast with the first sentence—namely, that Still used to be very famous but now isn't very famous.

Q3

B

B. For this reason,

Choice B is the best answer. The first sentence tells us that practical effects are more realistic but also more expensive than CGI. The second sentence tells us that many filmmakers use both kinds of effects, balancing realism with cost. To connect these ideas, we need a cause-and-effect transition, like “therefore.” “For this reason” has the same meaning as “therefore.” .

Choice A is incorrect. This isn’t a logical transition. The first sentence tells us that practical effects are more realistic but also more expensive than CGI. The second sentence tells us that many filmmakers use both kinds of effects, balancing realism with cost. To connect these ideas, we need a cause-and-effect transition, like “therefore.” “Similarly” doesn’t show cause and effect: it shows the addition of another agreeing idea. Choice C is incorrect. This isn’t a logical transition. The first sentence tells us that practical effects are more realistic but also more expensive than CGI. The second sentence tells us that many filmmakers use both kinds of effects, balancing realism with cost. To connect these ideas, we need a cause-and-effect transition, like “therefore.” “Furthermore” doesn’t show cause and effect: it shows the addition of another agreeing idea. Choice D is incorrect. This isn’t a logical transition. The first sentence tells us that practical effects are more realistic but also more expensive than CGI. The second sentence tells us that many filmmakers use both kinds of effects, balancing realism with cost. To connect these ideas, we need a cause-and-effect transition, like “therefore.” “In other words” doesn’t show cause and effect: it shows a restatement of the same idea in different words.

Q4

C

C. However,

Choice C is the best answer. "However" logically signals that the claim about reindeer in this sentence contrasts with the information about most deer species in the previous sentence.

Choice A is incorrect because "similarly" illogically signals that the claim in this sentence is similar to the previous information about most deer species. Instead, it contrasts with that information. Choice B is incorrect because "next" illogically signals that the claim about reindeer in this sentence is the next step in a process. Instead, it contrasts with the previous information about most deer species. Choice D is incorrect because "thus" illogically signals that the claim in this sentence results from the previous information about most deer species. Instead, it contrasts with that information.

Q5

C

C. However,

Choice C is the best answer. "However" logically signals that the theory discussed in this sentence—that humans may have arrived in the Americas over 30,000 years ago—contrasts with the previously discussed theory that humans arrived around 13,000 years ago.

Choice A is incorrect because "as a result" illogically signals that the theory in this sentence is the result of the theory discussed in the previous sentence. Instead, this theory contrasts with the previous one. Choice B is incorrect because "similarly" illogically signals that the theory in this sentence is similar to the theory discussed in the previous sentence. Instead, this theory contrasts with the previous one. Choice D is incorrect because "in conclusion" illogically signals that the theory in this sentence concludes or summarizes the discussion of the previous theory. Instead, this theory contrasts with the previous one.

Q6

D

D. By contrast,

Choice D is the best answer. “By contrast” logically signals that the finding described in this sentence contrasts with the finding described in the previous sentence. That is, quicker blinks were associated with longer talking times, whereas slower blinks were associated with shorter talking times.

Choice A is incorrect because “for example” illogically signals that the finding described in this sentence is an example of the finding described in the previous sentence. Instead, it contrasts with that finding. Choice B is incorrect because “specifically” illogically signals that this sentence provides specific, precise details about the finding described in the previous sentence. Instead, it presents information that contrasts with that finding. Choice C is incorrect because “firstly” illogically signals that the finding described in this sentence is a first point or occurs first in a chronological sequence of events. Instead, it contrasts with the finding described in the previous sentence.

Q7

B

B. Indeed,

Choice B is the best answer. “Indeed” logically signals that the information in this sentence—that the sculpture raised the question of whether displaying any object in an art gallery transforms the object into a work of art—offers emphasis in support of the claim in the previous sentence that the sculpture was intended to challenge conceptions about the nature of art.

Choice A is incorrect because “similarly” illogically signals that information in this sentence is similar to the claim about the sculptor’s intention in the previous sentence. Instead, the information about the question raised by the sculpture offers emphasis in support of that claim. Choice C is incorrect because “instead” illogically signals that the information in this sentence is an alternative to the claim about the sculptor’s intention in the previous sentence. Rather, the information about the question raised by the sculpture offers emphasis in support of that claim. Choice D is incorrect because “in addition” illogically signals that the information in this sentence is merely an additional fact related to the claim about the sculptor’s intention in the previous sentence. Instead, the information about the question raised by the sculpture offers emphasis in support of that claim.

Q8

B

B. Next,

Choice B is the best answer. “Next” logically signals that the action described in this sentence—Konkoly recording participants’ eye movements—is the next step in Konkoly’s experiment.

Choice A is incorrect because “specifically” illogically signals that this sentence specifies or elaborates on an aspect of the action described in the previous sentence. Instead, it describes the next step in Konkoly’s experiment. Choice C is incorrect because “for instance” illogically signals that the action described in this sentence is an example of the action described in the previous sentence. Instead, it is the next step in Konkoly’s experiment. Choice D is incorrect because “in sum” illogically signals that this sentence summarizes or concludes the action described in the previous sentence. Instead, it describes the next step in Konkoly’s experiment.

Q9

B

B. Instead,

Choice B is the best answer. “Instead” logically signals that the information in this sentence—that Bartholdi decided to slim and tilt out the arm of the Statue of Liberty—contrasts with Eiffel’s design suggestions for the statue.

Choice A is incorrect because “additionally” illogically suggests that the information in this sentence is merely an additional fact related to Eiffel’s design suggestions in the previous sentence. Instead, it contrasts with those suggestions. Choice C is incorrect because “thus” illogically signals that the information that follows is a result of Eiffel’s design suggestions in the previous sentence. Instead, it contrasts with those suggestions. Choice D is incorrect because “for example” illogically signals that the information about Bartholdi’s design decisions in this sentence exemplifies Eiffel’s design suggestions in the previous sentence. Instead, it contrasts with those suggestions.

Q10

D

D. For this reason,

Choice D is the best answer. "For this reason" logically signals that the information that follows—that metrologists developed the SI based on unchanging values in nature—is a result of the previous claim that scientists rely on precise, unchanging standards of measurement to guarantee the validity of experimental results.

Choice A is incorrect because "in contrast" illogically signals that the information that follows contrasts with the previous claim that scientists rely on precise, unchanging standards of measurement. Instead, the information that metrologists developed the SI based on unchanging values in nature is a result of that claim. Choice B is incorrect because "regardless" illogically signals that the information that follows is true despite the previous claim that scientists rely on precise, unchanging standards of measure. Instead, the information that metrologists developed the SI based on unchanging values in nature is a result of that claim. Choice C is incorrect because "in addition" illogically signals that the information that follows is merely an additional fact related to the previous claim that scientists rely on precise, unchanging standards of measurement. Instead, the information that metrologists developed the SI based on unchanging values in nature is a result of that claim.

Notes

Accept equivalent forms (e.g. $0.25 \equiv 1/4$). For grid-in items, decimal and fraction answers are both valid.
