Q1**B**

B. The green iguana has an average length of 4.8 feet.

Choice B is the best answer. The sentence specifies the average length of the green iguana: 4.8 feet.

Choice A is incorrect. While the sentence provides information about the green iguana, it doesn't specify the green iguana's average length. Choice C is incorrect. The sentence describes the diet of a species of reptile in Brazil; it doesn't specify the green iguana's average length. Choice D is incorrect. While the sentence provides information about the green iguana, it doesn't specify the green iguana's average length.

Q2**B**

B. Previously,

Choice B is the best answer. "Previously" logically signals that the event described in this sentence—Bigelow being named best director—occurred before Zhao's win. The fact that only one other woman had won the award before puts Zhao's win in perspective.

Choice A is incorrect because "as a result" illogically signals that the event described in this sentence occurred as a result or consequence of Zhao's win. Instead, it occurred before Zhao was named best director and puts Zhao's win in perspective. Choice C is incorrect because "however" illogically signals that the event described in this sentence occurred in spite of or in contrast to Zhao's win. Instead, it occurred before Zhao was named best director and puts Zhao's win in perspective. Choice D is incorrect because "likewise" illogically signals that this sentence merely adds a second, similar piece of information to the information about Zhao's win. Instead, the fact that only one other woman had won the award before puts Zhao's win in perspective.

Q3

D

- D. The Laas Geel paintings and the Dhagah Nabi Galay paintings are both examples of ancient rock art found in Somaliland.
-

Choice D is the best answer. This choice compares the Laas Geel paintings and the Dhagah Nabi Galay paintings to one another and emphasizes what they have in common: they are both ancient rock art found in the same region.

Choice A is incorrect. This choice only mentions the Dhagah Nabi Galay paintings. It doesn't compare them to the Laas Geel paintings. Choice B is incorrect. This choice doesn't emphasize a similarity between the two paintings. Instead, it emphasizes a difference: the type of content they depict. Choice C is incorrect. This choice only mentions the Laas Geel paintings. It doesn't compare them to the Dhagah Nabi Galay paintings.

Q4

A

- A. Ultimately,
-

Choice A is the best answer. "Ultimately" logically signals that West's completion of the computer program was the conclusion of the process described in the previous sentence, in which scientists working on GPS sought to develop a mathematical model of Earth.

Choice B is incorrect because "in other words" illogically signals that the information about West's program is a restatement of the information about the scientists' efforts to develop a mathematical model of Earth. Instead, West's program was the conclusion of those efforts.

Choice C is incorrect because "secondly" illogically signals that West's completion of the computer program was merely the next step in the scientists' efforts to develop a mathematical model of Earth. Instead, West's program was the conclusion of those efforts. Choice D is incorrect because "in addition" illogically signals that West's completion of the computer program was merely additional information related to the scientists' work on GPS. Instead, West's program was the conclusion of the scientists' efforts to develop a mathematical model of Earth.

Q5

A

A. Beard’s automatic coupler and Jones’s mobile refrigeration system both improved on existing designs.

Choice A is the best answer. It compares Beard’s and Jones’s inventions to one another, and emphasizes what they have in common.

Choice B is incorrect. This choice doesn’t emphasize a similarity. It only mentions Beard’s invention. It doesn’t compare it to Jones’s invention. Choice C is incorrect. This choice doesn’t emphasize a similarity between the two inventions. Instead, it emphasizes a difference. Choice D is incorrect. This choice doesn’t emphasize a similarity. It only mentions Jones’s invention. It doesn’t compare it to Beard’s invention.

Q6

B

B. Then,

Choice B is the best answer. "Then" logically signals that the event described in this sentence—lawmakers’ 2017 declaration of Alaska Highway Day—is part of a chronological sequence of events, occurring after the decades-long period in which the soldiers’ contribution was overlooked.

Choice A is incorrect because "lastly" illogically signals that this sentence presents the last of a series of points or reasons. Instead, it describes a later event occurring in a chronological sequence of events. Choice C is incorrect because "similarly" illogically signals that the information in this sentence is similar to the previous information about the soldiers’ contribution being overlooked for decades. Instead, it describes an event occurring after that decades-long period. Choice D is incorrect because "for example" illogically signals that this sentence provides an example illustrating the previous information about the soldiers’ contribution being overlooked for decades. Instead, it describes an event occurring after that decades-long period.

Q7

C

- C. Only four of the twenty-nine islands in Komodo National Park have Komodo dragons living on them.
-

Choice C is the best answer. The sentence emphasizes the number of islands in Komodo National Park that have Komodo dragons living on them, noting that four of the park's twenty-nine islands have Komodo dragons.

Choice A is incorrect. While the sentence does explain that Komodo dragons live on the islands of Komodo National Park, it doesn't emphasize how many of those islands Komodo dragons live on. Choice B is incorrect. The sentence explains that Komodo National Park contains the world's largest lizards; it doesn't identify these lizards as Komodo dragons or emphasize how many of the park's islands the lizards live on. Choice D is incorrect. The sentence specifies the total number of islands in Komodo National Park; it doesn't emphasize how many of those islands have Komodo dragons.

Q8

D

- D. However,
-

Choice D is the best answer. "However" logically signals that the information in this sentence about butterfly species—that some have colorless, transparent wings—contrasts with the previous information about butterfly species with bold, colorful wings.

Choice A is incorrect because "similarly" illogically signals that the information in this sentence is similar to the previous information about butterfly species. Instead, it contrasts with the previous information. Choice B is incorrect because "previously" illogically signals that this sentence describes an event that occurred before another event. Instead, the sentence provides information about butterfly species that contrasts with the information in the first sentence. Choice C is incorrect because "in other words" illogically signals that the information in this sentence is a paraphrase or restatement of the previous information about butterfly species. Instead, it contrasts with the previous information.

Q9

D

- D. The new species was named *Mansourasaurus* to recognize the team that discovered it, a professor and students from Mansoura University.
-

Choice D is the best answer. It explains where the dinosaur's name came from.

Choice A is incorrect. This choice does not explain the origin of the dinosaur's name. Choice B is incorrect. This choice does not explain the origin of the dinosaur's name. Choice C is incorrect. This choice does not explain the origin of the dinosaur's name.

Q10

B

- B. In comparison,
-

Choice B is the best answer. "In comparison" logically signals that the description of savannas in this sentence—that they are drier and their trees are spaced further apart—forms a comparison with the description of tropical forests in the previous sentence.

Choice A is incorrect because "for instance" illogically signals that the description of savannas in this sentence exemplifies the description of tropical forests in the previous sentence. Instead, this description forms a comparison with the description of tropical forests. Choice C is incorrect because "firstly" illogically signals that the description of savannas in this sentence indicates the first in a series of things. Instead, this description forms a comparison with the description of tropical forests in the previous sentence. Choice D is incorrect because "in conclusion" illogically signals that the description of savannas in this sentence concludes or summarizes information in the previous sentences. Instead, this description forms a comparison with the description of tropical forests in the previous sentence.

Notes

Accept equivalent forms (e.g. $0.25 \equiv 1/4$). For grid-in items, decimal and fraction answers are both valid.
