10 answers · Rationale-rich · Teach from doc

Q1**A**

A. “Raymond’s Run” takes place in Harlem.

Choice A is the best answer. The sentence indicates where “Raymond’s Run” takes place, stating that it takes place in Harlem.

Choice B is incorrect. The sentence identifies the book in which the story “Raymond’s Run” was published; it doesn’t indicate where the story takes place. Choice C is incorrect. The sentence indicates the point of view used in “Raymond’s Run”; it doesn’t indicate where the story takes place. Choice D is incorrect. The sentence identifies the author of “Raymond’s Run”; it doesn’t indicate where the story takes place.

Q2**B**

B. As a result,

Choice B is the best answer. “As a result” logically signals that the information in this sentence about Amaya leaving Spain to perform abroad is a result of the previous information about the Spanish Civil War.

Choice A is incorrect because “in comparison” illogically signals that the information in this sentence is being compared to the previous information about the Spanish Civil War. Instead, Amaya leaving Spain is a result of that war. Choice C is incorrect because “first of all” illogically signals that the information in this sentence is the beginning of a sequence of events. Instead, Amaya leaving Spain is a result of the event (the outbreak of war) described in the previous sentence. Choice D is incorrect because “for example” illogically signals that the information in this sentence is an example supporting the previous statement about the Spanish Civil War. Instead, Amaya leaving Spain is a result of that war.

Q3

B

- B. Jon Ching uses the term “flauna,” a combination of the words “flora” and “fauna,” to describe the subjects of his surreal paintings: plant-animal hybrids such as a parrot with leaves for feathers.
-

Choice B is the best answer because it provides both an explanation and an example of “flauna.” The sentence explains that flauna, a combination of the words “flora” and “fauna,” is a term used by Jon Ching to describe the plant-animal hybrids in his paintings. The sentence also mentions an example of Ching’s flauna: a parrot with leaves for feathers.

Choice A is incorrect. While the sentence partially explains what “flauna” is, it doesn’t provide a full explanation or specific example of Ching’s flauna. Choice C is incorrect. While the sentence partially explains what “flauna” is and includes a title of a Ching painting, it doesn’t provide a full explanation or specific example of Ching’s flauna. Choice D is incorrect. While the sentence partially explains what “flauna” is and includes the titles of two Ching paintings, it doesn’t provide a full explanation of Ching’s flauna.

Q4

C

- C. Thus,
-

Choice C is the best answer. “Thus” logically signals that the action described in this sentence—the researcher being able to determine the chemical makeup of the planet’s bright regions based on how they reflect light—is a result or consequence of the previous information about spectroscopic fingerprints.

Choice A is incorrect because “regardless” illogically signals that the action described in this sentence occurs despite the previous information about spectroscopic fingerprints. Instead, the finding in this sentence is a result or consequence of that information. Choice B is incorrect because “meanwhile” illogically signals that the action described in this sentence either occurs at the same time as or offers an alternative to the previous information about spectroscopic fingerprints. Instead, the finding in this sentence is a result or consequence of that information. Choice D is incorrect because “in comparison” illogically signals that the action described in this sentence is being compared with the previous information about spectroscopic fingerprints. Instead, the finding in this sentence is a result or consequence of that information.

Q5

A

- A. The neutron skin surrounding an atom of lead-208 measures about 0.28 trillionths of a millimeter.
-

Choice A is the best answer. The sentence emphasizes the thickness of lead-208's neutron skin, noting that it is about 0.28 trillionths of a millimeter thick.

Choice B is incorrect. The sentence makes a generalization about atoms, stating that atoms with excess neutrons will often acquire a neutron skin; it doesn't emphasize the thickness of lead-208's neutron skin. Choice C is incorrect. The sentence states that lead-208 has a neutron skin; it doesn't emphasize the thickness of that skin. Choice D is incorrect. The sentence indicates that lead-208 is surrounded by neutrons; it doesn't emphasize the thickness of lead-208's neutron skin.

Q6

D

- D. For example,
-

Choice D is the best answer. The previous sentence tells us that potters think about the look and use of a piece when selecting clay. This sentence provides a specific example of a type of clay selected for its appearance, so the transition "for example" fits perfectly.

Choice A is incorrect. This choice uses a transition that indicates a restatement of the same idea. But this sentence does more than just restate the previous idea. Instead, it provides a more specific example of the idea presented in the first sentence. Choice B is incorrect. This choice uses a disagreement transition. But this sentence actually agrees with the previous sentence. Both sentences suggest that desired look plays a role in the selection of clay types for pottery pieces. Choice C is incorrect. This choice uses a concluding transition. But this sentence doesn't sum up the previous sentence. Instead, it gives a specific example of the idea presented in the previous sentence.

Q7

C

- C. The dinosaur fossil specimens Sue and Big Mike are both members of the genus *Tyrannosaurus*.
-

Choice C is the best answer. The sentence emphasizes a similarity between the two specimens, noting that Sue and Big Mike are members of the same genus: *Tyrannosaurus*.

Choice A is incorrect. The sentence only provides information about where one of the specimens (Sue) can be found; it doesn't emphasize a similarity between the two specimens. Choice B is incorrect. The sentence only provides information about one specimen (Big Mike); it doesn't emphasize a similarity between the two specimens. Choice D is incorrect. The sentence contrasts the locations of Sue and Big Mike; it doesn't emphasize a similarity between the two specimens.

Q8

A

- A. With this in mind,
-

Choice A is the best answer. "With this in mind" logically signals that the activity described in this sentence—Dominguez's use of techniques like decalcomania to produce unpredictable abstract patterns—is a result of his desire to include random elements in his art.

Choice B is incorrect. "On the contrary" illogically signals that the activity in this sentence opposes or is contrary to Dominguez's desire to use random elements in his art. Instead, his use of decalcomania is a result of that desire. Choice C is incorrect. "In conclusion" illogically signals that the activity in this sentence is a conclusion or summary of Dominguez's desire to use random elements in his art. Instead, his use of decalcomania is a result of that desire. Choice D is incorrect. "Regardless" illogically signals that the activity in this sentence occurs despite Dominguez's desire to use random elements in his art. Instead, his use of decalcomania is a result of that desire.

Q9

C

- C. Annie Wu is best known for a 2011 YouTube video performance of *Three Beats for Beatbox Flute* that has been viewed over two million times.
-

Choice C is the best answer. This describes the achievement for which Wu is best known.

Choice A is incorrect. This choice doesn't emphasize Wu's most well-known achievement. It mentions some of her general achievements, but not the one for which she is "best known."

Choice B is incorrect. This choice doesn't emphasize Wu's most well-known achievement—it describes several of her achievements equally. Choice D is incorrect. This choice doesn't emphasize Wu's most well-known achievement. It describes a piece of music featured in her most well-known achievement.

Q10

D

- D. Finally,
-

Choice D is the best answer. "Finally" logically signals that the actions in this sentence—the removal, cataloging, and analysis of artifacts—are the next and final steps in a process, following the previous actions of surveying, digging, recording, and mapping.

Choice A is incorrect because "for instance" illogically signals that the actions in this sentence are an example of the actions in the previous sentence. Instead, the removal, cataloging, and analysis of artifacts are the next and final steps in a process. Choice B is incorrect because "on the contrary" illogically signals that the actions in this sentence are directly opposed to the actions in the previous sentence. Instead, the removal, cataloging, and analysis of artifacts are the next and final steps in a process. Choice C is incorrect because "earlier" illogically signals that the actions in this sentence occur before the actions in the previous sentence. Instead, the removal, cataloging, and analysis of artifacts are the next and final steps in a process.

Notes

Accept equivalent forms (e.g. $0.25 \equiv 1/4$). For grid-in items, decimal and fraction answers are both valid.
