Q1**D**

- D.** One of the most influential artists of the twentieth century, Mexican painter Frida Kahlo is best known for her self-portraits, which are vivid and richly symbolic.
-

Choice D is the best answer. By identifying Kahlo as an influential artist from Mexico, and by describing the work she's best known for, this choice provides the background information necessary to introduce Kahlo to an unfamiliar audience.

Choice A is incorrect. This choice doesn't effectively introduce Kahlo. It doesn't include any background information about who Kahlo is or where she's from. It simply identifies one of her paintings. Choice B is incorrect. This choice doesn't effectively introduce Kahlo. It doesn't include any background information about who Kahlo is or where she's from. It simply identifies one of her paintings. Choice C is incorrect. This choice doesn't effectively introduce Kahlo. It doesn't include any background information about who Kahlo is or where she's from. Instead, it describes one of her paintings in detail.

Q2

D

D. Second,

Choice D is the best answer. "Second" logically signals that the activity described in this sentence—coming up with a prediction—is the next step in the three-part sequence of steps described in the text.

Choice A is incorrect because "therefore" illogically signals that coming up with a prediction is a result or consequence of the activity described in the previous sentence: researching a question. While a prediction may be influenced by prior research, these activities are distinct steps in planning a scientific inquiry. Coming up with a prediction is the next step in the three-part sequence of steps described in the text. Choice B is incorrect because "instead" illogically signals that coming up with a prediction is an alternative to the activity described in the previous sentence: researching a question. Rather, coming up with a prediction is the next step in the three-part sequence of steps described in the text. Choice C is incorrect because "for example" illogically signals that coming up with a prediction is an example of the activity described in the previous sentence: researching a question. Instead, coming up with a prediction is the next step in the three-part sequence of steps described in the text.

Q3

D

D. Georeferencing is the process of assigning geographic coordinates to an image so that mapping software can place it in its real-world location.

Choice D is the best answer. The sentence defines the term "georeferencing," stating that it is the process of assigning geographic coordinates to an image so that mapping software can place the image in its real-world location.

Choice A is incorrect. The sentence describes López Marrero's team's 2017 project; it doesn't provide a definition of the term "georeferencing." Moreover, it misrepresents the information in the notes by characterizing the team's assignment of geographic coordinates to photographs as a process distinct from georeferencing. Choice B is incorrect. The sentence states that López Marrero's team used georeferencing, but it doesn't provide a definition of the term. Choice C is incorrect. The sentence explains why a particular group of georeferenced aerial photographs is potentially useful for researchers; it doesn't provide a definition of the term "georeferencing."

Q4

B

B. For this reason,

Choice B is the best answer. "For this reason" is a cause-and-effect transition. The cause in this case is that the mother elephant wants to know that her calf is safe, so the effect is that she lets out an infrasonic call for the calf to hear. Therefore, "for this reason" fits perfectly in this context.

Choice A is incorrect. This choice uses a transition that introduces an example of a previous idea. But the second sentence doesn't provide an example of the events described in the first sentence. Instead, it describes what happens next: the mother elephant calls for her calf. Choice C is incorrect. This choice uses a transition that indicates a shift from the past to the current time, which doesn't make sense here. Both sentences use the present tense, as they're describing the same time period. Choice D is incorrect. This choice uses a transition that indicates commonality or agreement between two ideas. But this sentence isn't similar to the events in the first sentence. Instead, it describes the events that happen next.

Q5

A

A. Ibn Sina's book *The Canon of Medicine* was published in the year 1025 CE.

Choice A is the best answer. The sentence identifies the year in which the book was published.

Choice B is incorrect. While the sentence provides information about the book's author, it doesn't identify the year in which the book was published. Choice C is incorrect. While the sentence provides information about the book's historical use, it doesn't identify the year in which the book was published. Choice D is incorrect. While the sentence provides information about the book's contents, it doesn't identify the year in which the book was published.

Q6

D

D. Today,

Choice D is the best answer. "Today" logically signals that the information in the sentence—that the museum is able to display close to 30% of its collection—is true of the Art Institute of Chicago as it exists in the present day after the previously mentioned unveiling of the massive new gallery in 2009.

Choice A is incorrect because "additionally" illogically signals that the information in the sentence is merely an additional fact related to the information about the museum before the new gallery opened. Instead, the sentence is about the museum in the present day after the new gallery opened. Choice B is incorrect because "for example" illogically signals that the information in the sentence exemplifies the previous information about the museum before the new gallery opened. Instead, the sentence is about the museum in the present day after the new gallery opened. Choice C is incorrect because "nevertheless" illogically signals that the information in the sentence is true despite the previous information about the museum before the new gallery opened. Instead, the sentence is about the museum in the present day after the new gallery opened.

Q7

B

B. Chia seeds contain 150 mg/oz of magnesium, which is more than peanuts and almonds.

Choice B is the best answer. The sentence identifies chia seeds as having the highest magnesium content of the three foods, noting that they contain 150 mg/oz, which is more than both peanuts and almonds.

Choice A is incorrect. The sentence compares the magnesium content of almonds and peanuts; it doesn't identify which of the three foods has the highest magnesium content. Choice C is incorrect. The sentence merely mentions the three foods; it doesn't identify which one has the highest magnesium content. Choice D is incorrect. The sentence identifies the magnesium content of peanuts; it doesn't identify which of the three foods has the highest magnesium content.

Q8

A

A. Currently,

Choice A is the best answer. “Currently” logically signals that the archaeologists’ use of drones (a current technology) to photograph the lines is the present-day continuation of the ongoing archaeological research described in the previous sentence.

Choice B is incorrect because “in comparison” illogically signals that the action described in this sentence offers a comparison to the ongoing archaeological research described in the previous sentence. Instead, the use of drones is the present-day continuation of that research. Choice C is incorrect because “still” illogically signals that the action described in this sentence occurs despite the ongoing archaeological research described in the previous sentence. Instead, the use of drones is the present-day continuation of that research. Choice D is incorrect because “however” illogically signals that the action described in this sentence occurs either despite or in contrast to the ongoing archaeological research described in the previous sentence. Instead, the use of drones is the present-day continuation of that research.

Q9

A

A. Alaska, the 49th US state, became a state several months before Hawaii, the 50th state, did.

Choice A is the best answer. The sentence emphasizes the order in which Alaska and Hawaii became US states, noting that Alaska became a US state several months before Hawaii did.

Choice B is incorrect. The sentence specifies when the 50-star US flag was unveiled; it doesn’t emphasize the order in which Alaska and Hawaii became US states. Choice C is incorrect. While the sentence indicates that the 49th and 50th states became US states in the same year, it doesn’t identify which state was the 49th and which was the 50th; as a result, it doesn’t emphasize the order in which Alaska and Hawaii became states. Choice D is incorrect. The sentence indicates that a new US flag was unveiled when Hawaii became a US state; it doesn’t emphasize the order in which Alaska and Hawaii became states.

Q10

A

A. Additionally,

Choice A is the best answer. "Additionally" logically signals that guard cells' role in regulating water loss is an additional function of these specialized plant cells that is separate from the function of regulating carbon dioxide intake.

Choice B is incorrect because "previously" illogically signals that the activity described in this sentence occurs earlier in a chronological sequence of events than the regulation of carbon dioxide intake described in the previous sentence. Instead, regulating water loss is an additional function of guard cells that is separate from the function of regulating carbon dioxide intake. Choice C is incorrect because "in conclusion" illogically signals that the description of guard cells' role in regulating water loss concludes or summarizes the information about guard cells provided in the previous sentences. Instead, regulating water loss is one of the two distinct functions of guard cells described in the text. Choice D is incorrect because "instead" illogically signals that the activity described in this sentence happens in place of the activity of regulating carbon dioxide intake described in the previous sentence. Rather, regulating water loss is an additional function of guard cells.

Notes

Accept equivalent forms (e.g. $0.25 \equiv 1/4$). For grid-in items, decimal and fraction answers are both valid.
