Q1**C****C. from**

Choice C is the best answer. The word “from” introduces a prepositional phrase that modifies the noun “pages” and provides essential information about their origin. No additional punctuation is needed after “from” in this context.

Choice A is incorrect. This choice results in a punctuation error, illogically separating the preposition “from” from the rest of the prepositional phrase with a colon. Also, a colon can only follow an independent clause, but what comes before the blank could not stand on its own as a complete sentence. Choice B is incorrect. This choice results in a punctuation error, illogically separating the preposition “from” from the rest of the prepositional phrase with a comma. Choice D is incorrect. This choice results in a punctuation error, illogically separating the preposition “from” from the rest of the prepositional phrase with a dash.

Q2**D****D. is**

Choice D is the best answer. The convention being tested is subject-verb agreement. The singular verb “is” agrees in number with the singular subject “the country’s name.”

Choice A is incorrect because the plural verb “are” doesn’t agree in number with the singular subject “the country’s name.” Choice B is incorrect because the plural verb “have been” doesn’t agree in number with the singular subject “the country’s name.” Choice C is incorrect because the plural verb “are being” doesn’t agree in number with the singular subject “the country’s name.”

Q3

B

B. company that

Choice B is the best answer. The convention being tested is the use and punctuation of an integrated relative clause. This choice correctly uses the relative pronoun “that” and no punctuation to create an integrated relative clause that provides essential information about the noun phrase (“a book packaging company”) that it modifies.

Choice A is incorrect because it doesn’t use a relative pronoun to link the verb phrase beginning with “specializes” to the noun phrase that it modifies (“a book packaging company”). Choice C is incorrect because it doesn’t use a relative pronoun to link the verb phrase beginning with “specializes” to the noun phrase that it modifies (“a book packaging company”). Choice D is incorrect because no punctuation is needed between the integrated relative clause beginning with “that specializes” and the noun phrase that it modifies (“a book packaging company”).

Q4

B

B. hands between the two antennas,

Choice B is the best answer. The convention being tested is the use of plural nouns in a sentence. The plural noun “hands” and the plural noun “antennas” correctly indicate that two hands are placed between two antennas when playing the theremin.

Choice A is incorrect because the context requires the plural nouns “hands” and “antennas,” not the singular possessive nouns “hand’s” and “antenna’s.” Choice C is incorrect because the context requires the plural nouns “hands” and “antennas,” not the plural possessive nouns “hands’” and “antennas’.” Choice D is incorrect because the context requires the plural noun “hands,” not the plural possessive noun “hands’.”

Q5**B****B.** called

Choice B is the best answer. The convention being tested is punctuation use between a verb and its complement. No punctuation is needed between the verb “is called” and its complement “the chromophore.” The complement helps complete the idea of the verb—in this case, it explains what the part of a compound that determines the compound’s color is called—and any punctuation between the two results in an ungrammatical sentence.

Choice A is incorrect because no punctuation is needed between the verb and its complement. Choice C is incorrect because no punctuation is needed between the verb and its complement. Choice D is incorrect because no punctuation is needed between the verb and its complement.

Q6**D****D.** includes

Choice D is the best answer. This verb needs to function as the main verb in the sentence, with the subject “one species,” so it needs to be conjugated. This choice gives us the singular present tense “includes,” which is the only conjugated form of the verb among the choices.

Choice A is incorrect. This doesn’t complete the text in a way that conforms to the conventions of Standard English. This verb needs to function as the main verb in the sentence, with the subject “one species,” so it needs to be conjugated. “Having included” is a participle form of the verb: it’s not conjugated and doesn’t function like a normal verb. Choice B is incorrect. This doesn’t complete the text in a way that conforms to the conventions of Standard English. This verb needs to function as the main verb in the sentence, with the subject “one species,” so it needs to be conjugated. “Including” is the gerund form of the verb: it’s not conjugated and doesn’t function like a normal verb. Choice C is incorrect. This doesn’t complete the text in a way that conforms to the conventions of Standard English. This verb needs to function as the main verb in the sentence, with the subject “one species,” so it needs to be conjugated. “To include” is the infinitive form of the verb: it’s not conjugated.

Q7**B****B.** (1947),

Choice B is the best answer. The convention being tested is punctuation between a supplementary element and a main clause. This choice correctly uses a comma to mark the boundary between the supplementary phrase (“While...1947”), which indicates when the action occurred, and the main clause (“Howe had a handheld camera operator wear roller skates”).

Choice A is incorrect because a comma paired with the conjunction “and” can’t be used in this way to mark the boundary between the supplementary element (“While...1947”) and the main clause (“Howe...skates”). Choice C is incorrect because the conjunction “and” can’t be used in this way to join the supplementary element (“While...1947”) and the main clause (“Howe...skates”). Choice D is incorrect because it fails to mark the boundary between the supplementary element and the main clause with appropriate punctuation.

Q8**C****C.** Their

Choice C is the best answer. The convention being tested is the use of possessive determiners. The plural possessive determiner “their” agrees in number with the plural conjoined noun phrase “Watson and Crick” and thus indicates that the findings were those of Watson and Crick.

Choice A is incorrect because “they’re” is the contraction for “they are,” not a possessive determiner. Choice B is incorrect because “it’s” is the contraction for “it is” or “it has,” not a possessive determiner. Choice D is incorrect because the singular possessive determiner “its” doesn’t agree in number with the plural conjoined noun phrase “Watson and Crick.”

Q9**C****C. served**

Choice C is the best answer. The convention being tested is the use of verb forms within a sentence. Relative clauses, such as the one beginning with "how," require a finite (tensed) verb, a verb that can function as the main verb of a clause. This choice correctly supplies the clause with the finite past tense verb "served."

Choice A is incorrect because it results in an ungrammatical sentence. The nonfinite participle "serving" doesn't supply the clause with a finite verb. Choice B is incorrect because it results in an ungrammatical sentence. The nonfinite participle "having served" doesn't supply the clause with a finite verb. Choice D is incorrect because it results in an ungrammatical sentence. The nonfinite to-infinitive "to serve" doesn't supply the clause with a finite verb.

Q10**B****B. have used**

Choice B is the best answer. The convention being tested is finite and nonfinite verb forms within a sentence. A main clause requires a finite verb to perform the action of the subject (in this case, "people in the Americas"), and this choice supplies the finite past perfect tense verb "have used" to indicate what people in the Americas used the gourd for.

Choice A is incorrect because the nonfinite to-infinitive "to use" doesn't supply the main clause with a finite verb. Choice C is incorrect because the nonfinite participle "having used" doesn't supply the main clause with a finite verb. Choice D is incorrect because the nonfinite participle "using" doesn't supply the main clause with a finite verb.

Notes

Accept equivalent forms (e.g. $0.25 \equiv 1/4$). For grid-in items, decimal and fraction answers are both valid.
