Q1**B****B. movement, which**

Choice B is the best answer. This choice correctly uses commas to set off the nonessential relative clause "which is known as Brownian motion" that provides extra information about the "random, continuous movement" that isn't necessary for the function of the sentence.

Choice A is incorrect. This choice results in a punctuation error. The relative clause "which is known as Brownian motion" is a nonessential supplement. Nonessential supplements need to be set apart from the rest of the sentence with a pair of commas, dashes, or parentheses, so we can't use a colon here. Also, notice that colons can only come after an independent clause, which isn't the case here. Choice C is incorrect. This choice results in a punctuation error. The relative clause "which is known as Brownian motion" is a nonessential supplement, so it should be separated from the rest of the sentence by a pair of matching punctuation marks. We already have a comma after "motion," so we need to add a comma before "which." This choice is missing that comma. Choice D is incorrect. This choice results in a sentence fragment. "This type of random, continuous movement" is not an independent clause and can't stand alone as a full sentence, so we can't put a period here.

Q2

C

C. will learn

Choice C is the best answer. The convention being tested is the use of verbs to express tense in a sentence. In this choice, the future tense verb “will learn,” used in conjunction with the phrase “in a later chapter,” correctly indicates that “you” (the reader) are going to learn about obsidian’s structure at some point in the future.

Choice A is incorrect because the past perfect verb “had learned” doesn’t indicate that the subject is going to learn about obsidian’s structure in the future. Choice B is incorrect because the past perfect progressive verb “had been learning” doesn’t indicate that the subject is going to learn about obsidian’s structure in the future. Choice D is incorrect because the present perfect verb “have learned” doesn’t indicate that the subject is going to learn about obsidian’s structure in the future.

Q3

D

D. libraries, train

Choice D is the best answer. The convention being tested is the punctuation of items in a simple series. The comma after “libraries” is used conventionally to separate the first and second items (“libraries” and “train stations”) in the series.

Choice A is incorrect because it fails to separate the first two items (“libraries” and “train stations”) in the series. Choice B is incorrect because a colon can’t be used in this way to separate items in a simple series. Choice C is incorrect because a dash can’t be used in this way to separate items in a simple series.

Q4

A

A. ensuring

Choice A is the best answer. The convention being tested is the use of verb forms within a sentence. The nonfinite present participle "ensuring" is correctly used to form a supplementary element that modifies the main clause "Okie-Tex takes place in an area with low light pollution," describing the viewing conditions of the star party.

Choice B is incorrect because it results in a comma splice. The pronoun "this" and the finite future tense verb "will ensure" would add an additional main clause to this sentence, and the comma after "pollution" can't be used in this way to join two main clauses. Choice C is incorrect because it results in an ungrammatical sentence. The finite present tense verb "ensures" can't be used in this way to form a supplementary element to modify the main clause. Choice D is incorrect because it results in a comma splice. The pronoun "it" and the finite present tense verb "ensures" would add an additional main clause to this sentence, and the comma after "pollution" can't be used in this way to join two main clauses.

Q5

D

D. life,

Choice D is the best answer. Notice that "the sanctity of animal life" is the first item in a list of three things. We must use a comma to separate the first two items in the list, just as a comma is used to separate "the just treatment of the elderly" and "the abolition of the slave trade."

Choice A is incorrect. This choice creates a punctuation error. Notice that "the sanctity of animal life" is the first item in a list of three things. To appropriately format the list, we need punctuation to separate each item. Choice B is incorrect. This choice creates a punctuation error. Notice that "the sanctity of animal life" is the first item in a list of three things. While semicolons are sometimes used to separate list items, this list uses commas to separate the other list items, and lists must use the same punctuation throughout. Choice C is incorrect. This choice creates a punctuation error. Notice that "the sanctity of animal life" is the first item in a list of three things. While colons can be used to introduce lists, they can't be used to separate items within a list.

Q6

A

A. them

Choice A is the best answer. The convention being tested is pronoun-antecedent agreement. The plural pronoun "them" agrees in number with the plural antecedent "utensils."

Choice B is incorrect because the singular pronoun "this" doesn't agree in number with the plural antecedent "utensils." Choice C is incorrect because the singular pronoun "that" doesn't agree in number with the plural antecedent "utensils." Choice D is incorrect because the singular pronoun "it" doesn't agree in number with the plural antecedent "utensils."

Q7

C

C. advance;

Choice C is the best answer. The clause "A subseasonal...advance" and the clause "its predictions...forecast" are both independent clauses, so using a semicolon to separate them is grammatically correct.

Choice A is incorrect. This choice creates a run-on sentence error. The clause "A subseasonal...advance" and the clause "its predictions...forecast" are both independent clauses, so a comma is not enough to separate them. Choice B is incorrect. This choice creates a run-on sentence error. The clause "A subseasonal...advance" and the clause "its predictions...forecast" are both independent clauses, so they need to be separated with specific punctuation (a period, a semicolon, a colon, a dash, or a comma + a coordinating conjunction). Choice D is incorrect. This choice creates a run-on sentence error. The clause "A subseasonal...advance" and the clause "its predictions...forecast" are both independent clauses, so the word "and" by itself is not enough to separate them. There would need to be a comma before "and" for this choice to work.

Q8

C

C. outlines

Choice C is the best answer. The convention being tested is subject-verb agreement. The singular verb “outlines” agrees in number with the singular subject “document.”

Choice A is incorrect because the plural verb “have outlined” doesn’t agree in number with the singular subject “document.” Choice B is incorrect because the plural verb “were outlining” doesn’t agree in number with the singular subject “document.” Choice D is incorrect because the plural verb “outline” doesn’t agree in number with the singular subject “document.”

Q9

C

C. century, but

Choice C is the best answer. The convention being tested is the coordination of main clauses within a sentence. This choice correctly uses a comma and a coordinating conjunction (“but”) to join the first main clause (“Leibniz...century”) and the second main clause (“these ingenious...calculators”).

Choice A is incorrect because it results in a run-on sentence. The two main clauses are fused without punctuation and/or a conjunction. Choice B is incorrect because it results in a comma splice. Without a conjunction following it, a comma can’t be used in this way to join two main clauses. Choice D is incorrect because joining the two main clauses in this way with the subordinating conjunction “that” results in an ungrammatical and illogical sentence.

Q10

C

C. stands

Choice C is the best answer. The convention being tested is subject-verb agreement. The singular verb "stands" agrees in number with the singular subject "sculpture."

Choice A is incorrect because the plural verb "are standing" doesn't agree in number with the singular subject "sculpture." Choice B is incorrect because the plural verb "have been standing" doesn't agree in number with the singular subject "sculpture." Choice D is incorrect because the plural verb "were standing" doesn't agree in number with the singular subject "sculpture."

Notes

Accept equivalent forms (e.g. $0.25 \equiv 1/4$). For grid-in items, decimal and fraction answers are both valid.
