Q1**B**

B. do consumers actually prefer this simpler style?

Choice B is the best answer. The convention being tested is end-of-sentence punctuation. This choice correctly uses a question mark to punctuate the interrogative clause “do consumers actually prefer this simpler style,” which asks a direct question at the end of the sentence. This is the question that the researchers in the next sentence were trying to investigate.

Choice A is incorrect because the context requires an interrogative clause. The declarative clause “consumers actually do prefer this simpler style” incorrectly indicates the consumers’ preference was already known, whereas the researchers had yet to find this out. Choice C is incorrect because a period can’t be used in this way to punctuate an interrogative clause at the end of a sentence. Choice D is incorrect because a question mark can’t be used in this way to punctuate a declarative clause, such as “consumers actually do prefer this simpler style,” at the end of a sentence.

Q2**D**

D. to include

Choice D is the best answer. The convention being tested is the use of verb forms within a sentence. The nonfinite to-infinitive verb “to include” is correctly used to form a subordinate clause that indicates what the Olympic committee decided (to include tug-of-war as an Olympic event).

Choice A is incorrect because it results in an ungrammatical sentence. The finite verb “included” can’t be used in this way to form a subordinate clause that indicates what the Olympic committee decided. Choice B is incorrect because it results in an ungrammatical sentence. The nonfinite participle “including” can’t be used in this way to form a subordinate clause that indicates what the Olympic committee decided. Choice C is incorrect because it results in an ungrammatical sentence. The finite verb “include” can’t be used in this way to form a subordinate clause that indicates what the Olympic committee decided.

Q3

D

D. settings. She

Choice D is the best answer. It appropriately uses a period to mark the end of one independent clause ("In 2000...settings") and the start of another ("She founded...professionals").

Choice A is incorrect. This choice results in a run-on sentence error. Both the clause before the blank ("In 2000...settings") and the clause after the blank ("she...professionals") are independent clauses, so they need to be separated by punctuation. Choice B is incorrect. This choice results in a comma splice error. It incorrectly joins two independent clauses with just a comma. Linking two independent clauses with a comma also requires the use of a coordinating conjunction (like *for*, *and*, *nor*, *but*, *or*, *yet*, or *so*). Choice C is incorrect. This choice results in a run-on sentence, an error caused when two independent clauses are joined without punctuation or appropriate conjunctions. Since both the clause before the blank ("In 2000...settings") and the clause after the blank ("she...professionals") are independent, a comma would be required in addition to the coordinating conjunction "and."

Q4

D

D. to place

Choice D is the best answer. The object for the verb "was" is "first," and "to place" is acting as a modifier for "first." What was the finding? It was "the first." The first to do what? The first "to place humans in North America" 10,000 years ago. When a verb serves as a modifier within a noun phrase, it must be nonfinite (i.e., not conjugated to a specific subject). The infinitive form "to place" is the only nonfinite option among the choices that makes sense in context.

Choice A is incorrect. The object for the verb "was" is "first," and "places" is acting as a modifier for "first." What was the thing that Parker's finding did? What was it the first to do? Place humans in North America 10,000 years ago. When a verb acts as a modifier, it must be nonfinite (i.e., not conjugated to a specific subject), but "places" is a finite form of the verb. Choice B is incorrect. The object for the verb "was" is "first," and "placed" is acting to modify "first." What was it that Parker's finding was the first to do? Place humans in North America 10,000 years ago. When a verb acts as a modifier, it must be nonfinite (i.e., not conjugated to a specific subject), but "placed" is a finite form. "Placed" can also be a past participle, but that wouldn't make sense here because the meaning of "the first placed humans" would be unclear. Choice C is incorrect. The object for the verb "was" is "first," and "place" is modifying "first." What was the thing that Parker's finding did? What was it the first to do? Place humans in North America. When a verb acts as a modifier, it must be nonfinite (i.e., not conjugated to a specific subject), but "place" is a finite form of the verb. Additionally, "place" can't serve as a noun here, because it results in an illogical sentence (the "finding" wasn't "the first place").

Q5

C

C. do they affect our weather?

Choice C is the best answer. The convention being tested is end-of-sentence punctuation. This choice correctly uses a question mark to punctuate the coordinated interrogative clauses "What are atmospheric rivers" and "how do they affect our weather," both of which ask direct questions.

Choice A is incorrect because a period can't be used in this way to punctuate an interrogative clause, such as "how do they affect our weather," at the end of a sentence. Choice B is incorrect because the structure requires an interrogative clause and a question mark at the end of the sentence. Choice D is incorrect because the structure requires an interrogative clause at the end of the sentence.

Q6

D

D. it

Choice D is the best answer. The convention being tested here is pronoun-antecedent agreement. The singular pronoun "it" agrees in number with the singular antecedent "object."

Choice A is incorrect. The singular pronoun "this" is used to refer to a specific thing, but here there is no specific object being referred to. Instead, the sentence is referring back to a hypothetical object that Cave might use in a Soundsuit. Choice B is incorrect. The singular pronoun "that" is used to refer to a specific thing, but here there is no specific object being referred to. Instead, the sentence is referring back to a hypothetical object that Cave might use in a Soundsuit. Choice C is incorrect because the plural pronoun "these" doesn't agree in number with the singular antecedent "object."

Q7

D

D. most people prefer in a diet drink.

Choice D is the best answer. This sentence is a statement: “Moskowitz was hired by a soda company to determine how much artificial sweetener most people prefer in a diet drink.” So a period is the most appropriate punctuation mark.

Choice A is incorrect. This doesn’t complete the text in a way that conforms to the conventions of Standard English. This sentence is not a question—it’s a statement. So a question mark is not the appropriate punctuation. Choice B is incorrect. This doesn’t complete the text in a way that conforms to the conventions of Standard English. We already have the verbs “was hired...to determine” in this sentence. The verb “do” is not needed and results in a confusing, ungrammatical sentence. Choice C is incorrect. This doesn’t complete the text in a way that conforms to the conventions of Standard English. This sentence is not a question—it’s a statement. So a question mark is not the appropriate punctuation.

Q8

A

A. describes

Choice A is the best answer. The convention being tested is the use of verb forms within a sentence. The singular verb “describes” agrees in number with the singular subject “map.”

Choice B is incorrect because the plural verb “describe” doesn’t agree in number with the singular subject “map.” Choice C is incorrect because the plural verb “have described” doesn’t agree in number with the singular subject “map.” Choice D is incorrect because the plural verb “are describing” doesn’t agree in number with the singular subject “map.”

Q9**D**

D. people perceive acts of kindness.

Choice D is the best answer. The convention being tested is end-of-sentence punctuation. This choice correctly uses a period to punctuate a declarative sentence that asks an indirect question ("Researchers Amit Kumar and Nicholas Epley investigated how people perceive acts of kindness").

Choice A is incorrect. The structure of the sentence requires a declarative clause at the end of the sentence that states what Kumar and Epley did, not an interrogative clause that asks a direct question, such as "how do people perceive acts of kindness." Choice B is incorrect. The structure of the sentence requires a declarative clause at the end of the sentence that states what Kumar and Epley did, not an interrogative clause that asks a direct question, such as "how do people perceive acts of kindness?" Choice C is incorrect. It's unconventional to use a question mark in this way to punctuate a declarative sentence that asks an indirect question, such as "Researchers...kindness."

Q10**C**

C. finished

Choice C is the best answer. The convention being tested is the use of a verb to express tense in a sentence. In this choice, the past tense verb "finished" is consistent with the other past tense verb ("retired") used to refer to Girgrah's retirement in 2004.

Choice A is incorrect because the present tense verb "finish" isn't consistent with the other past tense verb ("retired") used to refer to Girgrah's retirement in 2004. Furthermore, the plural verb "finish" doesn't agree in number with the sentence's singular subject "The Yemeni American athlete." Choice B is incorrect because the present perfect progressive tense verb "has been finishing" isn't consistent with the other past tense verb ("retired") used to refer to Girgrah's retirement in 2004. Choice D is incorrect because the future progressive tense verb "will be finishing" isn't consistent with the other past tense verb ("retired") used to refer to Girgrah's retirement in 2004.

Notes

Accept equivalent forms (e.g. $0.25 \equiv 1/4$). For grid-in items, decimal and fraction answers are both valid.
