Q1**A****A. of**

Choice A is the best answer. The convention being tested is punctuation use between a preposition and its complement. No punctuation is needed between the preposition "of" and its complement "all the elements on the periodic table." The complement completes the meaning of the preposition in the phrase "the highest melting point of all the elements on the periodic table," and using punctuation to separate the complement from the preposition results in an ungrammatical sentence.

Choice B is incorrect because no punctuation is needed between the preposition and its complement. Choice C is incorrect because no punctuation is needed between the preposition and its complement. Choice D is incorrect because no punctuation is needed between the preposition and its complement.

Q2**D****D. survives**

Choice D is the best answer. The convention being tested is the use of verbs to express tense. In this choice, the present tense verb "survives" correctly indicates that the wood frog regularly survives subfreezing temperatures by producing large amounts of glucose.

Choice A is incorrect because the past perfect verb "had survived" doesn't indicate that the wood frog regularly survives subfreezing temperatures by producing large amounts of glucose. Choice B is incorrect because the past tense verb "survived" doesn't indicate that the wood frog regularly survives subfreezing temperatures by producing large amounts of glucose. Choice C is incorrect because the conditional verb "would survive" doesn't indicate that the wood frog regularly survives subfreezing temperatures by producing large amounts of glucose.

Q3

C

C. popularized

Choice C is the best answer. The convention being tested is punctuation use between a verb and an object. No punctuation is needed between the verb "popularized" and its object "the use of Jamaican Creole." The object helps complete the idea of the verb—in this case, it explains what Louise Bennett popularized—and any punctuation between the two results in an ungrammatical sentence.

Choice A is incorrect because no punctuation is needed between the verb and its object. Choice B is incorrect because no punctuation is needed between the verb and its object. Choice D is incorrect because no punctuation is needed between the verb and its object.

Q4

B

B. reach

Choice B is the best answer. The convention being tested is the use of verbs to express tense in a sentence. In this choice, the present tense verb "reach" is consistent with the present tense verbs "travel" and "are diverted" used to describe how atoms move through the synchrotron.

Choice A is incorrect because the future tense verb "will reach" is inconsistent with the present tense verbs used to describe how atoms move through the synchrotron. Though the atoms' movement is a recurring action and "will reach" can also be used to indicate a habitual or recurring action, it creates a logical inconsistency in this sentence when paired with the present tense verbs "travel" and "are diverted." Choice C is incorrect because the past perfect tense verb "had reached" is inconsistent with the present tense verbs used to describe how atoms move through the synchrotron. Choice D is incorrect because the present progressive tense verb "are reaching" is inconsistent with the present tense verbs used to describe how atoms move through the synchrotron. While both verbs occur in the present, the present progressive tense suggests that the action is currently in progress. This creates a logical inconsistency when paired with the present tense verbs "travel" and "are diverted," which offer a general description of the tendencies of the atoms' movement, rather than a description of an action that is currently in progress.

Q5

D

D. you should choose.

Choice D is the best answer. The convention being tested is end-of-sentence punctuation. This choice correctly uses a period to punctuate a declarative sentence that ends with an indirect question (“which link you should choose.”)

Choice A is incorrect. The structure requires a declarative clause that presents an indirect question about what is evaluated in click restraint, not an interrogative clause that presents a direct question, such as “which link should you choose.” Choice B is incorrect. It’s unconventional to use a question mark in this way to punctuate a declarative clause that presents an indirect question, such as “which link you should choose.” Choice C is incorrect. The structure requires a declarative clause that presents an indirect question about what is evaluated in click restraint, not an interrogative clause that presents a direct question, such as “which link should you choose.”

Q6

D

D. is

Choice D is the best answer. The convention being tested is the use of verbs to express tense. In this choice, the present tense verb "is," used in conjunction with the word "today," correctly indicates that Paik is currently considered the first video artist.

Choice A is incorrect because the future tense verb "will be" doesn’t indicate that Paik is currently considered the first video artist. Choice B is incorrect because the past perfect tense verb "had been" doesn’t indicate that Paik is currently considered the first video artist. Choice C is incorrect because the past tense verb "was" doesn’t indicate that Paik is currently considered the first video artist.

Q7

D

D. unearthed

Choice D is the best answer. No punctuation should separate the verb "unearthed" and its objects (i.e, what was "unearthed"): "knives, horseshoes, wool tunics, and thousands of other artifacts."

Choice A is incorrect. This choice creates a punctuation error, separating the verb "unearthed" from its objects (i.e, what was "unearthed") with a colon. Choice B is incorrect. This choice creates a punctuation error, separating the verb "unearthed" from its objects (i.e, what was "unearthed") with a comma. Choice C is incorrect. This choice creates a punctuation error, separating the verb "unearthed" from its objects (i.e, what was "unearthed") with a dash.

Q8

A

A. Moon's

Choice A is the best answer. The convention being tested is the use of possessive nouns. The singular possessive noun "Moon's" correctly indicates that there is only one Moon, and it has a gravitational pull.

Choice B is incorrect because the context requires the singular possessive noun "Moon's," not the plural noun "Moons." Choice C is incorrect because the context requires the singular possessive noun "Moon's," not the plural possessive noun "Moons'." Choice D is incorrect because the context requires the singular possessive noun "Moon's," not the singular noun "Moon."

Q9**A****A. Act, which**

Choice A is the best answer. The convention being tested is the use of punctuation between a main clause and a supplementary element. In this choice, the comma is used correctly to mark the boundary between the main clause ("This...Act") and the supplementary relative clause ("which...designs") that provides additional information about the Engravers' Copyright Act.

Choice B is incorrect because a semicolon can't be used in this way to mark the boundary between a main clause and a supplementary relative clause. A semicolon is conventionally used to join two main clauses, and "which...designs" isn't a main clause. Choice C is incorrect because it results in a rhetorically unacceptable sentence fragment. Choice D is incorrect. Joining the main clause and the additional information about the Engravers' Copyright Act ("gave...designs") without the comma and relative pronoun "which" results in a confusing and ungrammatical sentence.

Q10**D****D. to tell**

Choice D is the best answer. The convention being tested is the use of finite and nonfinite verb forms within a sentence. The nonfinite to-infinitive "to tell" is correctly used to form a nonfinite (infinitive) clause that explains the reason Engle uses poetry in her novel.

Choice A is incorrect because the finite present tense verb "tells" can't be used in this way to explain the reason that Engle uses poetry in her novel. Choice B is incorrect because the finite past tense verb "told" can't be used in this way to explain the reason that Engle uses poetry in her novel. Choice C is incorrect because the finite present progressive tense verb "is telling" can't be used in this way to explain the reason that Engle uses poetry in her novel.

Notes

Accept equivalent forms (e.g. $0.25 \equiv 1/4$). For grid-in items, decimal and fraction answers are both valid.
