Q1**B****B. exposure to**

Choice B is the best answer. "Exposure to" means "having contact with." It makes sense that Prasad and Bainbridge were investigating whether seeing false versions of images was a cause of false visual memories. Notice how "exposure to incorrect renditions" matches the idea of "familiarity with erroneous versions," which appears later in the sentence.

Choice A is incorrect. "Compliance with" means "going along with a command or directive." False versions of images can't give commands or directives, so this doesn't apply. Choice C is incorrect. "Criteria" means "standards by which to judge something." It's not clear how people would come to have standards for the wrong version of an image in the first place, let alone how those standards would cause them to falsely remember the correct version. In other words, this choice would result in a confusing, unclear sentence. Choice D is incorrect. "Forfeiture of" means "a giving up of something." It wouldn't make sense to say that false memories of an image might be caused by giving up the wrong version of the image.

Q2

B

B. tenuous

Choice B is the best answer because it most logically completes the text’s discussion of the author’s claim about the relationship between Neanderthals and *Homo sapiens*. As used in this context, “tenuous” means lacking substance. The end of the first sentence states that the author’s claim didn’t consider certain key pieces of evidence—“recent archaeological discoveries”—and is therefore weak.

Choice A is incorrect because it wouldn’t make sense in context to refer to the author’s claim as “disorienting,” or confusing. The text suggests that the author’s claim is insubstantial, not that it’s difficult to grasp. Choice C is incorrect because referring to the claim as “nuanced,” or subtle, wouldn’t make sense in context. According to the text, the claim is incomplete because it didn’t consider certain key information about recent archaeological finds; it doesn’t suggest that what’s in the claim lacks precision. Choice D is incorrect because saying that the claim is “unoriginal,” or imitative, wouldn’t make sense in context. The text faults the claim because it doesn’t consider certain key information about recent archaeological finds; it doesn’t suggest that the author’s claim lacks originality.

Q3

A

A. demarcated from

Choice A is the best answer because it most logically completes the text's discussion of diadromous fish. In this context, "demarcated from" means separate or set apart from. The text indicates that diadromous fish differ from euryhaline fish in that diadromous fish "migrate between freshwater and marine biomes during their life," whereas euryhaline fish do not relocate to a different biome because they can tolerate higher salinity environments. Therefore, this context suggests that because of differences between their migration patterns, diadromous fish are distinct and can be demarcated from euryhaline fish.

Choice B is incorrect. Although the text states that diadromous fish migrate and relocate, the text does not suggest that diadromous fish would be "reconstituted as," or formed again as, anything new. Only their environments change and not the fish themselves. Choice C is incorrect because the text does not suggest that diadromous fish can be "conflated with," or combined with, euryhaline fish. Instead, the text distinguishes the two types of fish by pointing out their differences with regard to migration and tolerance for salinity. Choice D is incorrect because the text indicates that based on migration habits and tolerance for salinity, diadromous fish are different from euryhaline fish; so it would not make logical sense to say that diadromous fish would be "derived from," or be an extension of or result from, euryhaline fish.

Q4

B

B. optimize

Choice B is the best answer because it most logically completes the text's discussion of business marketing practices. In this context, "optimize" means make the most effective possible use of available opportunities. The text indicates that though businesses typically try to promote themselves, they don't always make use of effective tools for doing so, pointing to research showing that 33 percent of restaurants failed to use a free listing service that increased revenue by 5 percent on average for restaurants that did use the service. The text therefore suggests that by foregoing a free and effective marketing tool, some businesses aren't making the best use of, or optimizing, marketing opportunities.

Choice A is incorrect because in this context, "adorn" would mean decorate or enhance the appearance of, and there's nothing in the text to suggest that by failing to use a free and effective promotional tool, some businesses aren't enhancing the appearance of their own marketing. The example in the text illustrates that some businesses aren't utilizing an effective marketing opportunity, not that they aren't improving the appearance of their marketing. Choice C is incorrect because in this context, "endorse" would mean openly approve or recommend, and the text's discussion of the fact that some businesses have overlooked an effective marketing tool doesn't support the idea that those businesses therefore don't approve of their own marketing. Choice D is incorrect because in this context, saying that businesses don't "counteract" their marketing would suggest that they don't actively undermine it or make it ineffective. The text begins by stating that businesses typically try to promote themselves but then continues to imply that some businesses fail to take advantage of good opportunities to do so, citing the example of businesses that failed to use a free and effective marketing tool. Though it's possible that those businesses that did use the site therefore didn't unintentionally counteract their own marketing, the first sentence conveys that the text's focus is on things that some businesses do and that some businesses don't do when trying to promote themselves, and it wouldn't make sense to say that any businesses would actively try to undermine their own marketing in pursuit of that goal.

Q5

D

D. engendering

Choice D is the best answer because it most logically completes the text's discussion of how rising prices affected demand for vintage cassette tapes. In this context, "engendering" means producing or causing to exist. The text indicates that the effect of a dramatic increase in the price of vintage cassettes was counterintuitive, or contrary to what would typically be expected. Generally, when prices rise, demand falls—but the text indicates that in this case, buyers who previously had no interest in cassettes "thronged the market" (that is, many of them began purchasing cassettes) because they saw the cassettes as potential investments. This context conveys that the rising prices surprisingly produced significant demand, producing many new buyers for vintage cassettes.

Choice A is incorrect because the text focuses on a rise in prices of vintage cassettes, and it wouldn't make sense to describe the price increase itself—rather than sellers of vintage cassettes—as "exploiting," or unfairly or selfishly taking advantage of, demand. Further, wanting to take advantage of new demand would be a motivation for a price increase, not a counterintuitive effect of it. Choice B is incorrect. In this context, "monetizing" would mean utilizing as a source of profit, and it wouldn't make sense to describe a price increase itself, rather than sellers of vintage cassettes, as using demand as a source of profit; moreover, seeking to profit when there's new demand would be a reason for price increases, not a counterintuitive effect of them. Choice C is incorrect. In this context, "appraising" would mean assessing the value or significance of something. The text focuses on a rise in prices of vintage cassettes, and while it would be reasonable to suggest that sellers might have appraised demand for those cassettes, it wouldn't make sense to suggest that a price increase itself could do such an assessment; moreover, an appraisal of demand would most likely precede a price increase rather than be an effect of it.

Notes

Accept equivalent forms (e.g. $0.25 \equiv 1/4$). For grid-in items, decimal and fraction answers are both valid.
