Q1**C**

C. To that end,

Choice C is the best answer. “To that end” logically signals that the information in this sentence—that Dowsett founded the National Women’s Equal Suffrage Association of Hawai‘i—describes an action Dowsett took to achieve the goal stated in the previous sentence: to coordinate the efforts of suffragists in Hawai‘i.

Choice A is incorrect because “in other words” illogically signals that the information in this sentence about Dowsett founding a women’s suffrage association is a paraphrase or restatement of the previous information about Dowsett seeking to coordinate suffragists’ efforts. Instead, the sentence describes a specific action Dowsett took to achieve this goal. Choice B is incorrect because “conversely” illogically signals that the information in this sentence about Dowsett founding a women’s suffrage association contrasts with the previous information about Dowsett seeking to coordinate suffragists’ efforts. Instead, the sentence describes a specific action Dowsett took to achieve this goal. Choice D is incorrect because “alternatively” illogically signals that the information in this sentence about Dowsett founding a women’s suffrage association presents an alternative to her seeking to coordinate suffragists’ efforts. Instead, the sentence describes a specific action Dowsett took to achieve this goal.

Q2

D

- D. Researchers have used statistical methods to address questions of authorship within the field of music.
-

Choice D is the best answer. The sentence uses information from the notes to make a generalization about the kind of study Glickman, Brown, and Song conducted. Specifically, the sentence indicates that the study was of a kind that used statistical methods to address questions of authorship within the field of music.

Choice A is incorrect because the sentence summarizes the methodology and findings of a particular analysis of a single song; it doesn't make a generalization about the kind of study conducted. Choice B is incorrect because the sentence mentions the data and conclusion of a particular analysis of a single song; it doesn't make a generalization about the kind of study conducted. Choice C is incorrect because the sentence focuses on a specific conclusion from a particular analysis of a single song; it doesn't make a generalization about the kind of study conducted.

Q3

B

- B. then,
-

Choice B is the best answer. "Then" signals that this sentence's claim about Darwin and Wallace follows logically from the previous information. In other words, both scientists independently arriving at the theory of natural selection was, arguably, an expected outcome of the circumstances mentioned in the previous sentence.

Choice A is incorrect because "however" illogically signals that the claim in this sentence contrasts with the previous information about the ideas circulating among British scientists in the 1800s. Instead, this claim follows logically from that information. Choice C is incorrect because "moreover" illogically signals that the claim in this sentence merely adds to the previous information about the ideas circulating among British scientists in the 1800s. Instead, this claim follows logically from that information. Choice D is incorrect because "for example" illogically signals that this sentence provides an example supporting the previous information about the ideas circulating among British scientists in the 1800s. Instead, it presents a claim that follows logically from that information.

Q4

C

- C. Researchers found that gas giants featuring a thermal inversion were likely to contain heat-absorbing metals, which may reside in the planets' upper atmospheres.
-

Choice C is the best answer. It describes the study's findings in a way that assumes the audience is already familiar with thermal inversions.

Choice A is incorrect. This choice doesn't fully describe the findings of the study, because it doesn't include anything about thermal inversions. Choice B is incorrect. This choice doesn't describe the study's findings. Choice D is incorrect. This choice isn't suited for an audience already familiar with thermal inversion. A familiar audience wouldn't need to have the term defined.

Q5

C

- C. Ultimately,
-

Choice C is the best answer. The first sentence describes an experience that the viewer has when they're looking at the photos: they imagine other planets. This sentence describes an experience that the viewer has afterward: the title reminds them that the photos are of frying pans, bringing them back to reality. "Ultimately" is a transition that means "eventually" or "in the end," so it fits the context perfectly.

Choice A is incorrect. This choice uses a cause-and-effect transition, which doesn't make sense here. The viewer imagining other planets when they're looking at the photos doesn't cause the title to bring them back to reality. Choice B is incorrect. This choice uses a transition that indicates another option or possibility, which doesn't make sense here. Rather, the viewer has both experiences: first the viewer imagines that they're looking at another planet, and then the title reminds them that it's just a frying pan. Choice D is incorrect. This choice uses a transition that indicates the addition of an agreeing idea. But the viewer's experience in the second sentence is actually the opposite of the viewer's experience in the first sentence. In the first sentence, the viewer is imagining that they're seeing a landscape from another planet. In the second sentence, the viewer is reminded that they're looking at a frying pan.

Q6

C

- C. Using a novel digital imaging technique, Tan revealed hundreds of images hidden on the walls of Angkor Wat, a Cambodian temple.
-

Choice C is the best answer. The sentence effectively presents Tan’s research to an audience unfamiliar with Angkor Wat, explaining the results of the research and identifying Angkor Wat as a temple in Cambodia.

Choice A is incorrect. While the sentence presents Tan’s research, it fails to explain what Angkor Wat is for an audience unfamiliar with the temple. Choice B is incorrect. The sentence emphasizes the role that decorrelation stretch analysis played in Tan’s research; it doesn’t present the research, which would require specifying where it was conducted. Choice D is incorrect. While the sentence explains what Angkor Wat is, it fails to present Tan’s research.

Q7

D

- D. That is,
-

Choice D is the best answer. “That is” logically signals that this sentence clarifies the terms of the scientific debate introduced in the previous sentence by explaining the difference between dispersalists and vicariancists.

Choice A is incorrect because “furthermore” illogically signals that the information in this sentence is merely additional to (and separate from) the information in the previous sentence about the scientific debate. Instead, the information about dispersalists and vicariancists clarifies the terms of that debate. Choice B is incorrect because “by contrast” illogically signals that the information in this sentence contrasts with the information in the previous sentence about the scientific debate. Instead, the information about dispersalists and vicariancists clarifies the terms of that debate. Choice C is incorrect because “similarly” illogically signals that the information in this sentence is merely similar to the information in the previous sentence about the scientific debate. Instead, the information about dispersalists and vicariancists clarifies the terms of that debate.

Q8

A

- A. Researchers wanted to know which factors influence lizard egg clutch size because such factors have been well studied in birds but not in lizards.
-

Choice A is the best answer. The sentence emphasizes the aim of the research study by highlighting what the researchers conducting the study wanted to know—specifically, which factors influence clutch size among lizards.

Choice B is incorrect because the sentence emphasizes what researchers determined at the end of the study, not what the study’s aim was. Choice C is incorrect because the sentence emphasizes a finding from the research study, not the aim of the study. Choice D is incorrect because the sentence emphasizes the research study’s methodology, not its aim.

Q9

A

- A. though,
-

Choice A is the best answer. “Though” logically signals that the information in this sentence—that Morgado and colleagues detected a dense ring orbiting outside the Roche limit that remained intact—presents an exception to the previous sentence’s claim about debris orbiting outside an object’s Roche limit. Such debris would be expected to accrete into a satellite, not remain intact as a ring.

Choice B is incorrect because “for example” illogically signals that the information about Morgado’s discovery exemplifies the previous sentence’s claim about debris orbiting outside an object’s Roche limit. Instead, the sentence presents an exception to the claim. Choice C is incorrect because “fittingly” illogically signals that the information about Morgado’s discovery aligns with the previous sentence’s claim about debris orbiting outside an object’s Roche limit. Instead, the sentence presents an exception to the claim. Choice D is incorrect because “likewise” illogically signals that the information about Morgado’s discovery is similar to the previous sentence’s claim about debris orbiting outside an object’s Roche limit. Instead, the sentence presents an exception to the claim.

Q10

D

- D. Though some of the languages differed in number of syllables spoken per second, all 17 conveyed information at roughly the same rate.
-

Choice D is the best answer. The sentence presents an overview of the study's findings, noting that, for some of the languages (the examples of Spanish and Vietnamese are given in the notes), the number of syllables spoken per second varied, while the amount of information conveyed per second remained roughly constant across all 17 languages.

Choice A is incorrect. While the sentence describes one of the metrics the study assessed, it doesn't present any of the study's findings. Choice B is incorrect. While the sentence compares specific findings about two of the languages studied, it doesn't provide an overview of the study's findings across all 17 languages. Choice C is incorrect. The sentence compares specific findings about two of the languages studied; it doesn't provide an overview of the study's findings across all 17 languages. It also misrepresents the information from the notes about Spanish's information rate.

Notes

Accept equivalent forms (e.g. $0.25 \equiv 1/4$). For grid-in items, decimal and fraction answers are both valid.
