3 answers · Rationale-rich · Teach from doc

Q1**C**

- C. The NCAI's advocacy was key to the passing of Public Law 96-638, legislation formally acknowledging Indigenous tribes' right to self-governance.

Choice C is the best answer. The sentence directly identifies an accomplishment of the NCAI: that its advocacy was key to the passing of Public Law 96-638, which formally acknowledged Indigenous tribes' right to self-governance.

Choice A is incorrect. The sentence provides information about the NCAI's founding and its first president, but it doesn't identify an accomplishment of the organization. Choice B is incorrect. The sentence describes the NCAI's founding, but it doesn't identify an accomplishment of the organization. Choice D is incorrect. The sentence misrepresents the information in the notes: the US Congress, not the NCAI, passed the Indian Self-Determination and Education Assistance Act.

Q2**C**

- C. Having entered the poststarburst phase, a quenched galaxy is one that no longer forms stars.

Choice C is the best answer. This choice defines a quenched galaxy as "one that no longer forms stars."

Choice A is incorrect. This choice only describes what happens before quenching. Choice B is incorrect. This choice only describes what happens after quenching. Choice D is incorrect. This choice only describes what causes quenching.

Q3

D

- D. According to Padmanabhan and Chen, the brain can toggle between capturing olfactory information at a given moment and tracking changes in that information over time.
-

Choice D is the best answer. The sentence effectively summarizes the study's findings, explaining what Padmanabhan and Chen found: that the brain can toggle between one method of processing smells (capturing information at a given moment) and another (tracking changes in information over time).

Choice A is incorrect. While the sentence mentions findings, it mainly focuses on Padmanabhan and Chen's methodology. It doesn't effectively summarize the study's findings. Choice B is incorrect. The sentence notes a fact about the olfactory system—that the perception of odor forms in the piriform cortex—but doesn't summarize the findings of Padmanabhan and Chen's study. Choice C is incorrect. The sentence presents the goal of Padmanabhan and Chen's study; it doesn't summarize the study's findings.

Notes

Accept equivalent forms (e.g. $0.25 \equiv 1/4$). For grid-in items, decimal and fraction answers are both valid.
