Q1**B**

B. described, from hair to grass to sculptures—

Choice B is the best answer. The convention being tested is the punctuation of supplementary elements within a sentence. The comma after "described" separates the first supplementary element ("both of interviewees and the items they described") from the second supplementary element ("from hair to grass to sculptures"). Furthermore, the dash after "sculptures" pairs with the dash after "photographs" to separate these two supplementary elements from the rest of the sentence. The pair of dashes, which operate at a higher organizing level than the comma, indicates that the elements between the dashes function together—in this case, the second supplement ("from...sculptures") describes the range of items mentioned in the first supplement—and could be removed without affecting the grammatical coherence of the sentence.

Choice A is incorrect because it fails to appropriately punctuate the supplementary elements in the sentence. A dash is needed after "sculptures" to separate the supplementary elements ("both...sculptures") from the rest of the sentence. Choice C is incorrect because it fails to appropriately punctuate the supplementary elements in the sentence. The two supplementary elements "both...described" and "from...sculptures" function together to describe the photographs, and placing a dash between them would make this relationship less clear, suggesting that the supplement "both...described" is a standalone element that could be removed without affecting the grammatical coherence of the sentence, which isn't the case. Choice D is incorrect because it fails to appropriately punctuate the supplementary elements in the sentence. A colon isn't conventionally used in this way to separate a supplementary element ("from hair to grass to sculptures") from the noun phrase it is modifying ("items they described"). Additionally, a dash is needed after "sculptures" to separate the supplementary elements ("both...sculptures") from the rest of the sentence.

Q2**C****C.** works,

Choice C is the best answer. The convention being tested is the use of punctuation and verb forms within a sentence. This choice leaves the verb "admired" in its nonfinite past participle form to function within a supplementary element ("much...followed"). Offset by commas after "works" and "followed," this supplementary element interrupts the main clause ("English poet and Shakespeare contemporary John Donne's works...had...been essentially gathering dust...") with additional information about the works' reception during Donne's lifetime.

Choice A is incorrect because it fails to offset the supplementary element ("much...followed") with appropriate punctuation, and using the finite verb "were much admired" results in an ungrammatical sentence. Choice B is incorrect because using the finite verb "were much admired" results in an ungrammatical sentence. Choice D is incorrect because it fails to offset the supplementary element ("much...followed") with appropriate punctuation, and using the finite verb "had been much admired" results in an ungrammatical sentence.

Q3**C****C.** photosynthesis:

Choice C is the best answer. The convention being tested is the use of punctuation in a sentence. In this choice, a colon is correctly used to mark the boundary between one main clause ("Along with...photosynthesis") and another main clause ("as light...oxygen") and to introduce the following explanation of how light intensity affects photosynthesis.

Choice A is incorrect because when coordinating two longer main clauses such as these, it's conventional to use a comma before the coordinating conjunction ("and"). Choice B is incorrect because it results in a comma splice. Without a coordinating conjunction following it, a comma can't be used in this way to join two main clauses ("Along with...photosynthesis" and "as light...oxygen"). Choice D is incorrect because it results in a run-on sentence. The two main clauses ("Along with...photosynthesis" and "as light...oxygen") are fused without punctuation and/or a conjunction.

Q4

B

- B. the bioswales have mitigated both street flooding and the resulting pollution of nearby waterways.
-

Choice B is the best answer. The convention being tested is subject-modifier placement. This choice makes the noun phrase “the bioswales” the subject of the sentence and places it immediately after the modifying phrase “By reducing...sewers.” In doing so, this choice clearly establishes that the bioswales—and not another noun in the sentence—are reducing runoff flowing into city sewers.

Choice A is incorrect because it results in a dangling modifier. The placement of the noun phrase “the mitigation...waterways” immediately after the modifying phrase results in unclear modification. The resulting sentence makes it hard to determine what is responsible for “reducing the runoff”: the bioswales or some other noun in the sentence. Choice C is incorrect because it results in a dangling modifier. The placement of the noun phrase “the bioswales’ mitigation...waterways” immediately after the modifying phrase results in unclear modification. The resulting sentence makes it hard to determine what is responsible for “reducing the runoff”: the bioswales or some other noun in the sentence. Choice D is incorrect because it results in a dangling modifier. The placement of the noun phrase “street flooding and the resulting pollution” immediately after the modifying phrase illogically suggests that the “flooding and pollution” are reducing runoff flowing into city sewers.

Q5

A

- A. 1950s, and
-

Choice A is the best answer. The convention being tested is the coordination of main clauses within a sentence. This choice correctly uses a comma and the coordinating conjunction “and” to join the first main clause (“Featuring...1950s”) and the second main clause (“given...successful”).

Choice B is incorrect because when coordinating two longer main clauses such as these, it’s conventional to use a comma before the coordinating conjunction. Choice C is incorrect because it results in a run-on sentence. The two main clauses are fused without punctuation and/or a conjunction. Choice D is incorrect because it results in a comma splice. Without a conjunction following it, a comma can’t be used in this way to join two main clauses.

Q6

D

- D. findings from a 2022 study suggested that vegetables and grains were the primary components of early medieval rulers' diets.
-

Choice D is the best answer. The convention being tested is subject-modifier placement. This choice makes the noun phrase "findings from a 2022 study" the subject of the sentence and places it immediately after the modifying phrase "supported...Ages." In doing so, this choice clearly establishes that the findings—and not another noun in the sentence—are supported by the biochemical analyses.

Choice A is incorrect because it results in a dangling modifier. The placement of "vegetables and grains" immediately after the modifying phrase illogically suggests that vegetables and grains are supported by biochemical analyses. Choice B is incorrect because it results in a dangling modifier. The placement of "early medieval rulers' diets" immediately after the modifying phrase illogically suggests that the rulers' diets are supported by biochemical analyses. Choice C is incorrect because it results in a dangling modifier. The placement of "the primary components" immediately after the modifying phrase illogically suggests that the primary components are supported by biochemical analyses.

Q7

D

D. however. It

Choice D is the best answer. The clause “Like an Elvis impersonator...real thing” and the clause “it is...look-alike” are both independent clauses, so making them into two separate sentences is grammatically correct.

Choice A is incorrect. This choice creates a run-on sentence error. The clause “Like an Elvis impersonator...real thing” and the clause “it is...look-alike” are both independent clauses, so they need to be separated with at least a comma + a coordinating conjunction. This choice provides the coordinating conjunction “but,” but it’s missing a comma. Choice B is incorrect. This choice creates a run-on sentence error. The clause “Like an Elvis impersonator...real thing” and the clause “it is...look-alike” are both independent clauses, so they need to be separated with a semicolon, a colon, a dash, a period, or a comma + a coordinating conjunction. Choice C is incorrect. This choice creates a run-on sentence error. The clause “Like an Elvis impersonator...real thing” and the clause “it is...look-alike” are both independent clauses, so they need to be separated with at least a comma + a coordinating conjunction. This choice provides a comma, but it’s missing a coordinating conjunction.

Q8

D

- D. silica glass's atomic arrangement is more dispersed, resulting in a significant disadvantage:
-

Choice D is the best answer. The convention being tested is subject-modifier placement. This choice makes "silica glass's atomic arrangement" the subject of the sentence and places it immediately after the modifying phrase "compared to that of alumina glass." In doing so, this choice clearly establishes that silica glass's atomic arrangement—and not another noun in the sentence—is being compared to the atomic arrangement ("that") of alumina glass.

Choice A is incorrect because it results in a dangling modifier. The placement of the noun phrase "silica glass" immediately after the modifying phrase illogically suggests that silica glass itself (rather than its atomic arrangement) is being compared to alumina glass's atomic arrangement. Choice B is incorrect because it results in a dangling modifier. The placement of the noun phrase "silica glass" immediately after the modifying phrase illogically suggests that silica glass itself (rather than its atomic arrangement) is being compared to alumina glass's atomic arrangement. Choice C is incorrect because it results in a dangling modifier. The placement of the noun phrase "a significant disadvantage" immediately after the modifying phrase illogically suggests that "a significant disadvantage" is being compared to alumina glass's atomic arrangement.

Q9

A

- A. plant). By
-

Choice A is the best answer. The convention being tested is punctuation use between sentences. In this choice, the period is used correctly to mark the boundary between one sentence ("In... plant") and another ("By...weeds"). The prepositional phrase beginning with "by" modifies the subject of the next sentence, "she," which refers to Macías-Rubalcava.

Choice B is incorrect because it results in a comma splice. A comma can't be used in this way to join two sentences. Choice C is incorrect. Without a comma preceding it, the conjunction "and" can't be used in this way to join two sentences. Choice D is incorrect because it results in a run-on sentence. The two sentences are fused without punctuation and/or a conjunction.

Q10

B

B. rock's and rap's

Choice B is the best answer. The convention being tested is the use of possessive nouns. The singular possessive nouns "rock's" and "rap's" correctly indicate that the chorus-to-verse ratios belong to the genres of rock and rap.

Choice A is incorrect because the context requires the singular possessive nouns "rock's" and "rap's," not the plural nouns "rocks" and "raps." Choice C is incorrect because the context requires the singular possessive noun "rock's," not the plural noun "rocks." Choice D is incorrect because the context requires the singular possessive noun "rock's," not the singular noun "rock." This choice incorrectly suggests that there was a single chorus-to-verse ratio for rock and rap together, whereas the ratio was calculated for each genre individually.

Notes

Accept equivalent forms (e.g. $0.25 \equiv 1/4$). For grid-in items, decimal and fraction answers are both valid.
