Q1**B****B.** practice at the time;

Choice B is the best answer. The convention being tested is the punctuation of elements in a complex series. It's conventional to use a semicolon to separate items in a complex series with internal punctuation, and in this choice, the semicolon after "time" is conventionally used to separate the first item ("offered...time") and the second ("celebrated...holiday") in the series of activities that librarian Pura Belpré offered. Moreover, the semicolon after "time" matches the semicolon used later to separate the second item ("celebrated...holiday") and the third ("and...folktales") in the series.

Choice A is incorrect because it fails to use appropriate punctuation to separate the first item and the second item in the complex series. Furthermore, a comma isn't needed between the noun "practice" and the prepositional phrase "at the time" because the prepositional phrase is essential to the full meaning of the phrase "an uncommon practice at the time." Choice C is incorrect because a comma after "time" doesn't match the semicolon used later to separate the second ("celebrated...holiday") and third ("and...folktales") items in the series. Furthermore, a comma isn't needed between the noun "practice" and the prepositional phrase "at the time" because the prepositional phrase is essential to the full meaning of the phrase "an uncommon practice at the time." Choice D is incorrect because a comma after "time" doesn't match the semicolon used later to separate the second ("celebrated...holiday") and third ("and...folktales") items in the series.

Q2**A**

A. professor Yugang Sun

Choice A is the best answer. The convention being tested is the use of punctuation between titles and proper nouns. No punctuation is needed between the proper noun “Yugang Sun” and the title that describes Sun, “chemistry professor.” Furthermore, no punctuation is needed after “Sun” because “chemistry professor Yugang Sun and his colleagues at Temple University” functions as the coordinated subject of the sentence, and together Sun and colleagues performed the action of developing a new approach to producing iron nanoparticles.

Choice B is incorrect because no punctuation is needed between the proper noun “Yugang Sun” and the coordinated noun phrase “and his colleagues at Temple University.” Choice C is incorrect because no punctuation is needed before or after the proper noun “Yugang Sun.” Setting off the professor’s name with commas suggests that it could be removed without affecting the coherence of the sentence, which isn’t the case. Choice D is incorrect because no punctuation is needed between the title “chemistry professor” and the proper noun “Yugang Sun.”

Q3**D**

D. supposed, a

Choice D is the best answer. The convention being tested is the use of punctuation within a sentence. This choice correctly uses a comma to mark the boundary between the main clause (“Recently...supposed”) and the supplementary element (“a finding...Paleolithic”) that provides additional information about the implications of the Neronian tool discovery.

Choice A is incorrect because a semicolon can’t be used in this way to join the main clause (“Recently...supposed”) and the supplementary element (“a finding...Paleolithic”). Choice B is incorrect because it results in a rhetorically unacceptable sentence fragment beginning with “a finding.” Choice C is incorrect because it results in a run-on sentence. The main clause (“Recently...supposed”) and the supplementary element (“a finding...Paleolithic”) are fused without punctuation and/or a conjunction.

Q4

A

A. competitions, however:

Choice A is the best answer. The convention being tested is the punctuation of supplementary elements within a sentence. This choice correctly uses a comma to separate the supplementary adverb "however" from the preceding main clause ("only...competitions"), and it uses a colon to introduce the list of dances that follows ("rumba...jive"). Further, placing the colon after "however" rather than before indicates that the information in the preceding main clause (only...competitions) is contrary to what might be assumed from the information in the previous sentence (Latin America has many more dance forms).

Choice B is incorrect. The comma after "however" can't be used in this way to introduce a series ("rumba...jive"). Choice C is incorrect because it isn't conventional to use a semicolon in this way to introduce a series of items, such as the list of dances. Choice D is incorrect because placing the semicolon after "competitions" illogically indicates that the following list of five Latin American dances ("rumba...jive") is contrary to the information in the previous clause (only five Latin American dances are included in international ballroom dance competitions).

Q5

C

C. conservation, though;

Choice C is the best answer. The convention being tested is the use of punctuation within a sentence. This choice correctly uses a comma to separate the supplementary adverb "though" from the preceding main clause ("Economists...conservation") and uses a semicolon to join the next main clause ("efficiency gains...rises") to the rest of the sentence. Further, placing the semicolon after "though" indicates that the information in the preceding main clause ("improvements in efficiency often correlate negatively with resource conservation") is contrary to what might be assumed from the information in the previous sentence (resource consumption would be expected to decrease with the development of new, more efficient technologies).

Choice A is incorrect because it results in a comma splice. Commas can't be used in this way to punctuate a supplementary word or phrase between two main clauses. Choice B is incorrect because it fails to mark the boundary between the two main clauses ("Economists...though" and "efficiency gains....rises") with appropriate punctuation. Moreover, placing the semicolon after "conservation" illogically indicates that the information in the next clause (gains in efficiency may lead to an increase in resource consumption) is contrary to the information in the previous clause ("improvements in efficiency often correlate negatively with resource conservation").

Choice D is incorrect because placing a comma after "conservation" illogically indicates that the information in the next clause (gains in efficiency may lead to an increase in resource consumption) is contrary to the information in the previous clause ("improvements in efficiency often correlate negatively with resource conservation").

Q6

C

C. Kingelez

Choice C is the best answer. The convention being tested is punctuation between a subject and a verb. No punctuation is needed when the subject of a sentence is immediately followed by a main verb. In this case, the sentence's subject ("the innovative works of Congolese sculptor and architect Bodys Isek Kingelez") is followed by the main verb "were featured," and no punctuation should come between them.

Choice A is incorrect because no punctuation is needed between the subject and the verb.

Choice B is incorrect because no punctuation is needed between the subject and the verb. Choice D is incorrect because no punctuation is needed between the subject and the verb.

Q7

D

D. exclamation. Translated

Choice D is the best answer. The convention being tested is punctuation use between sentences. In this choice, the period is used correctly to mark the boundary between one sentence ("The poem...exclamation") and another sentence that begins with a supplementary element ("Translated...poem"). The supplementary element "translated as 'hark!' or 'listen!' in some versions" modifies the subject of the second sentence, "the word" (referring to *hwæt*).

Choice A is incorrect because it results in a comma splice after "exclamation." A comma can't be used in this way to mark the boundary between sentences. Choice B is incorrect. Without a comma preceding it, the conjunction "and" can't be used in this way to join sentences. Choice C is incorrect because it results in a comma splice after "versions." A comma can't be used in this way to mark the boundary between sentences.

Q8**C**

C. items; managing

Choice C is the best answer. The convention being tested is the punctuation of elements in a complex series. It's conventional to use a semicolon to separate items in a complex series with internal punctuation, and in this choice, the semicolon after "items" is conventionally used to separate the first item ("overseeing...items") and the second item ("managing...law") in a list of Hayden's responsibilities.

Choice A is incorrect because it fails to use appropriate punctuation to separate the first item and the second item in the complex series. Choice B is incorrect because a comma after "items" doesn't match the semicolon used later to separate the second and third items in the series ("managing...law" and "and appointing the US poet laureate"). Choice D is incorrect because it results in a rhetorically unacceptable sentence fragment beginning with "Managing."

Q9**D**

D. indiscriminate:

Choice D is the best answer. The convention being tested is punctuation use between two main clauses. In this choice, a colon is correctly used to mark the boundary between one main clause ("goats are notoriously indiscriminate") and another main clause ("they will devour all kinds of shrubs and weeds") and to introduce the following explanation of goats' nondiscriminatory behavior when it comes to what they eat.

Choice A is incorrect because when coordinating two longer main clauses such as these, it's conventional to use a comma before the coordinating conjunction. Furthermore, the conjunction "and" fails to indicate that what follows is an explanation of goats' nondiscriminatory behavior when it comes to their diets. Choice B is incorrect because it results in a comma splice. A comma can't be used in this way to join two main clauses ("goats...indiscriminate" and "they...weeds"). Choice C is incorrect because it results in a run-on sentence. The two main clauses ("goats...indiscriminate" and "they...weeds") are fused without punctuation and/or a conjunction.

Q10

A

A. tombs. Built

Choice A is the best answer. The convention being tested is punctuation use between sentences. In this choice, the period after “tombs” is used correctly to mark the boundary between one sentence (“Archaeologist...tombs”) and another (“Built...nature”).

Choice B is incorrect because it results in a comma splice. A comma can’t be used in this way to mark the boundary between sentences. Choice C is incorrect. Without a comma preceding it, the conjunction “and” can’t be used in this way to join the two sentences. Choice D is incorrect because it results in a run-on sentence. The sentences (“Archaeologist...tombs” and “Built...nature”) are fused without punctuation and/or a conjunction.

Notes

Accept equivalent forms (e.g. $0.25 \equiv 1/4$). For grid-in items, decimal and fraction answers are both valid.
