Q1**C****C.** biologist Yuree Lee

Choice C is the best answer. The convention being tested is the use of punctuation between titles and proper nouns. No punctuation is needed to offset the proper noun "Yuree Lee" from the title "plant cell biologist" that describes Lee.

Choice A is incorrect because no punctuation is needed. Choice B is incorrect because no punctuation is needed. Choice D is incorrect because no punctuation is needed around the proper noun "Yuree Lee." Setting the phrase off with punctuation suggests that it could be removed without affecting the coherence of the sentence, which isn't the case.

Q2**D****D.** *Panchali*. A

Choice D is the best answer. The convention being tested is punctuation use between sentences. In this choice, the period is used correctly to mark the boundary between one sentence ("In... *Panchali*") and another ("A quiet...time"). The phrase beginning with "a quiet" modifies the subject of the next sentence, "Ray's film."

Choice A is incorrect because it results in a run-on sentence. The sentences are fused without punctuation and/or a conjunction. Choice B is incorrect because it results in a comma splice. A comma can't be used in this way to mark the boundary between sentences. Choice C is incorrect because it results in a comma splice. A comma can't be used in this way to mark the boundary between sentences.

Q3

A

A. information, though;

Choice A is the best answer. This choice uses a semicolon to join two independent clauses ("Nakalembe doesn't just...though" and "she also shares..."). This choice also appropriately includes "though" in the first clause, where it logically belongs.

Choice B is incorrect. This choice results in a grammar error called a comma splice. It incorrectly joins two independent clauses with only a comma instead of a comma and a coordinating conjunction like "and" or "but." "Though" is a transition word, but it's not a coordinating conjunction. Choice C is incorrect. This choice results in a punctuation error. A semicolon can only be used to link two independent clauses. However, if "though" is included in the second clause, it turns the second clause into a dependent clause, so a semicolon can't be used after "information." Choice D is incorrect. This choice results in a grammar error called a comma splice. It incorrectly joins two independent clauses with only a comma instead of a comma and a coordinating conjunction like "and" or "but."

Q4

D

D. high on:

Choice D is the best answer. The convention being tested is punctuation use between a main clause and a supplementary phrase. In this choice, a colon is correctly used to mark the boundary between the main clause ("there...on") and the supplementary phrase ("openness to experience") and to introduce the information that identifies which personality trait participants scored especially high on.

Choice A is incorrect because it results in a rhetorically unacceptable sentence fragment beginning with "on" and separates a necessary preposition from the clause beginning with "there." Choice B is incorrect because a semicolon can't be used in this way to join the main clause ("there...on") and the supplementary phrase ("openness to experience"). A semicolon is conventionally used to join two main clauses, whereas a colon is conventionally used to introduce an element that explains or amplifies the information in the preceding clause, making the colon the better choice in this context. Choice C is incorrect because it fails to mark the boundary between the main clause ("there...on") and the supplementary phrase ("openness to experience").

Q5

D

D. windows, transitional

Choice D is the best answer. The convention being tested is the use of punctuation within a sentence. This choice correctly uses a comma to mark the boundary between the introductory subordinate clause ("With...windows") and the main clause ("transitional design splits the difference between old and new").

Choice A is incorrect because a semicolon can't be used in this way to separate the subordinate clause ("With...windows") from the main clause ("transitional...new"). Choice B is incorrect because a dash can't be used in this way to separate the subordinate clause ("With...windows") from the main clause ("transitional...new"). Choice C is incorrect because it results in a rhetorically unacceptable sentence fragment beginning with "with."

Q6

C

C. dependable

Choice C is the best answer. The convention being tested is the punctuation of an integrated relative clause. No punctuation is needed before the relative clause beginning with "that" because the content of the relative clause ("that...Lighthouse") is integral to the meaning of the coordinated adjectival phrase ("so bright, so localized, and so dependable") that it modifies.

Choice A is incorrect because no punctuation is needed between the coordinated adjectival phrase ("so bright...dependable") and the integrated relative clause that modifies it. Choice B is incorrect because no punctuation is needed between the coordinated adjectival phrase ("so bright...dependable") and the integrated relative clause that modifies it. Choice D is incorrect because no punctuation is needed between the coordinated adjectival phrase ("so bright...dependable") and the integrated relative clause that modifies it.

Q7

B

B. and, in the process,

Choice B is the best answer. This choice uses paired punctuation in the form of two commas to set off the nonessential phrase "in the process."

Choice A is incorrect. The phrase "in the process" is a nonessential element and needs to be set off with paired punctuation. We need a comma after "and" to match the one after "process."

Choice C is incorrect. The phrase "in the process" is a nonessential element and needs to be set off with paired punctuation, so we would need a dash after "and" to match the one following "process." Choice D is incorrect. The phrase "in the process" is a nonessential element and needs to be set off with paired punctuation. We would need a comma after "process" to match the one following "and."

Q8

B

B. spectrum:

Choice B is the best answer. The convention being tested is the use of a colon within a sentence. In this choice, the colon correctly introduces the following description of how the painting makes use of the entire visual light spectrum by depicting a rainbow-hued swimmer.

Choice A is incorrect because it results in a run-on sentence. The main clauses ("Like... spectrum" and "sporting...water") are fused without punctuation and/or a conjunction. Choice C is incorrect because it results in a run-on sentence. The main clauses ("Like...spectrum" and "while...water") are fused without punctuation. Furthermore, the conjunction "while" fails to indicate that what follows is a description of how the painting makes use of the entire visual light spectrum. Choice D is incorrect because it results in a logically confusing sentence. The conjunction "while," which suggests that what follows is occurring at the same time as or despite what came before, fails to indicate that what follows is a description of how the painting makes use of the entire visual light spectrum.

Q9**D**

D. Ecuador)—

Choice D is the best answer. The convention being tested is the punctuation of a supplementary element within a sentence. The dash after “Ecuador” and the closing parenthesis pairs with the dash after “territories” to separate the supplementary element (“New...Ecuador”) from the rest of the sentence. The supplementary element specifies the three South American territories that Simón Bolívar liberated, and the pair of dashes indicates that this element could be removed without affecting the grammatical coherence of the sentence.

Choice A is incorrect because it fails to use appropriate punctuation to separate the supplementary element from the rest of the sentence. Furthermore, punctuation isn’t needed between “Ecuador” and the closing parenthesis. Choice B is incorrect because it fails to use appropriate punctuation to separate the supplementary element from the rest of the sentence. Choice C is incorrect because a comma can’t be paired with a dash to separate the supplementary element from the rest of the sentence.

Q10**C**

C. Entomologist Heather Grab

Choice C is the best answer. The convention being tested is punctuation use between a name and title and between a subject and a verb. No punctuation is needed between the proper noun “Heather Grab” and “entomologist,” the title that describes Grab. Additionally, no punctuation is needed between the sentence’s subject (“Entomologist Heather Grab”) and the main verb (“found”) that indicates what Grab did.

Choice A is incorrect because no punctuation is needed between the subject and the verb. Choice B is incorrect because no punctuation is needed. Setting the entomologist’s name off with commas suggests that it could be removed without affecting the coherence of the sentence, which isn’t the case. Choice D is incorrect because no punctuation is needed between the subject and the verb.

Notes

Accept equivalent forms (e.g. $0.25 \equiv 1/4$). For grid-in items, decimal and fraction answers are both valid.
