**Q1****D****D. essays. Praising**

---

Choice D is the best answer. The convention being tested is punctuation use between sentences. In this choice, the period after “essays” is used correctly to mark the boundary between one sentence (“American...essays”) and another (“praising...Morrison”). The participial phrase beginning with “Praising” modifies the subject of the second sentence, “writer Robert Antoni.”

Choice A is incorrect because it results in a comma splice. A comma can’t be used in this way to mark the boundary between sentences. Choice B is incorrect. Without a comma preceding it, the conjunction “and” can’t be used in this way to join sentences. Choice C is incorrect because it results in a run-on sentence. The sentences (“American...essays” and “Praising...Morrison”) are fused without punctuation and/or a conjunction.

---

Q2

A

A. Union would finally acknowledge

---

Choice A is the best answer. It's the only choice that offers a form of the verb "acknowledge" that can go with the subject "International Astronomical Union" to make a complete sentence. This might seem like an odd use of "would," but when speaking from a point of view in the past, we can actually use "would" to express something that happened later. That's the case here: 200 years after Wang Zhenyi's death, the IAU would finally acknowledge her contributions.

Choice B is incorrect. This choice creates a sentence fragment. There's no main verb elsewhere in the sentence, so we need a form of the verb "acknowledge" that can go with the subject "the International Astronomical Union" and serve as that main verb. "To acknowledge" can't do that. Choice C is incorrect. This choice creates a sentence fragment. There's no main verb elsewhere in the sentence, so we need a form of the verb "acknowledge" that can go with the subject "the International Astronomical Union" and serve as that main verb. "Having acknowledged" can't do that. Choice D is incorrect. This choice creates a sentence fragment. There's no main verb elsewhere in the sentence, so we need a form of the verb "acknowledge" that can go with the subject "the International Astronomical Union" and serve as that main verb. The "-ing" form can't do that.

---

Q3

C

C. emerged:

---

Choice C is the best answer. The convention being tested is punctuation use within a sentence. A colon can be used between two main clauses to signal that what follows is an elaboration of what came before. In this choice, the colon correctly introduces the following explanation of the divergent milk preservation strategies that emerged.

Choice A is incorrect because it results in a run-on sentence. The main clause ("As...emerged") and the subordinate clause followed by another main clause ("whereas...steppe") are fused without punctuation and/or a conjunction. Choice B is incorrect. Without a comma preceding it, the conjunction "and" can't be used in this way to join a main clause ("As...emerged") and a subordinate clause followed by another main clause ("whereas...steppe"). Choice D is incorrect because it results in a comma splice. A comma can't be used in this way to join a main clause ("As...emerged") and a subordinate clause followed by another main clause ("whereas...steppe").

Q4

C

C. these crusts reduce global dust emissions by an estimated 60 percent each year, according to a recent study.

---

Choice C is the best answer. The subject of the modifier "fortifying soil in arid ecosystems against erosion" is "biocrusts." Subject-modifier placement requires a modifier and its subject to be next to each other, so "biocrusts" or some variant meaning "biocrusts" (in this case, "these crusts") must begin the missing clause.

Choice A is incorrect. Modifiers and their subjects must go next to each other. The subject of the modifier "fortifying soil in arid ecosystems against erosion" is "biocrusts," not "a recent study's estimate." Choice B is incorrect. Modifiers and their subjects must go next to each other. The subject of the modifier "fortifying soil in arid ecosystems against erosion" is "biocrusts," not "an estimated 60 percent reduction." Choice D is incorrect. Modifiers and their subjects must go next to each other. The subject of the modifier "fortifying soil in arid ecosystems against erosion" is "biocrusts," not "a recent study."

**Q5**

**B**

B. geologist

---

Choice B is the best answer. “Marie tharp” is essential information that completes the first clause — the first clause doesn’t function without it. So we don’t want to separate it with punctuation.

Choice A is incorrect. This choice creates a punctuation error. “The field of geological oceanography owes much to American geologist” is unclear: which geologist are we talking about? We need the “Marie Tharp” for clarity, which means it’s essential information and should not be separated by a comma. Choice C is incorrect. This choice creates a punctuation error. “The field of geological oceanography owes much to American geologist” is unclear: which geologist are we talking about? We need the “Marie Tharp” for clarity, which means it’s essential information and should not be separated by a semicolon. Choice D is incorrect. This choice creates a punctuation error. “The field of geological oceanography owes much to American geologist” is unclear: which geologist are we talking about? We need the “Marie Tharp” for clarity, which means it’s essential information and should not be separated by a colon.

---

**Q6****C**

C. Serra, intending

Choice C is the best answer. The convention being tested is the use of verb forms within a sentence. This choice pairs the comma after "Serra" with the comma after "environment" and uses the nonfinite present participle "intending" to correctly form a supplementary phrase describing the reaction Serra intends his sculptures to provoke. This supplementary phrase appears between the noun phrase that it modifies ("American abstract artist Richard Serra") and the finite present tense verb ("assembles"), which functions as the sentence's main verb and describes what Serra does.

Choice A is incorrect because it results in an ungrammatical sentence. The finite present continuous tense verb "is intending" can't be used in this way in conjunction with the finite present tense verb "assembles," which already functions as the main verb in the sentence.

Choice B is incorrect because it results in an ungrammatical sentence. The finite present tense verb "intends" can't be used in this way to supplement the noun phrase "American abstract artist Richard Serra." Choice D is incorrect because it results in an ungrammatical sentence. The finite present tense verb "intends" can't be used in this way in conjunction with the finite present tense verb "assembles," which already functions as the main verb in the sentence.

**Q7****D**

D. functions:

Choice D is the best answer. The convention being tested is the use of a colon within a sentence. In this choice, the colon correctly introduces the following explanation of the different functions of genomes and epigenomes.

Choice A is incorrect because it results in a run-on sentence. The two main clauses ("The relationship...functions" and "whereas...expressed") are fused without punctuation and/or a conjunction. Choice B is incorrect because it results in a comma splice. A comma can't be used in this way to join two main clauses ("The relationship...functions" and "whereas...expressed"). Choice C is incorrect. Without a comma preceding it, the conjunction "and" can't be used in this way to join two main clauses. Furthermore, "and" fails to indicate that what follows is an explanation of how cells with identical DNA develop different functions.

Q8

A

A. many critics have focused on Kurosawa’s use of Western literary sources but

---

Choice A is the best answer. The convention being tested is subject-modifier placement. This choice makes the noun phrase “many critics” the subject of the sentence and places it immediately after the modifying phrase “in assessing...Kurosawa.” In doing so, this choice clearly establishes that it is the critics—and not another noun in the sentence—who assess Kurosawa’s films.

Choice B is incorrect because it results in a dangling modifier. The placement of the noun phrase “Kurosawa’s...sources” immediately after the modifying phrase illogically suggests that his use of Western literary sources is what assesses Kurosawa’s films. Choice C is incorrect because it results in a dangling modifier. The placement of the function word “there” immediately after the modifying phrase illogically suggests that “there” is what assesses Kurosawa’s films. Choice D is incorrect because it results in a dangling modifier. The placement of the noun phrase “the focus...critics” immediately after the modifying phrase illogically suggests that the critics’ focus is what assesses Kurosawa’s films.

---

Q9

D

D. plant:

---

Choice D is the best answer. The convention being tested is punctuation use between a main clause and a supplementary phrase. In this choice, a colon is correctly used to mark the boundary between the main clause (“A group...plant”) and the supplementary element (“TN57...pests”) and to introduce the following elaboration on the specific varieties of sweet potato plants that were examined.

Choice A is incorrect because it results in a rhetorically unacceptable sentence fragment beginning with “TN57.” Choice B is incorrect because a semicolon can’t be used in this way to join the main clause (“A group...plant”) and the supplementary element (“TN57...pests”). A semicolon is conventionally used to join two main clauses, whereas a colon is conventionally used to introduce an element that explains or amplifies the information in the preceding clause. Choice C is incorrect because it fails to mark the boundary between the main clause (“A group...plant”) and the supplementary element (“TN57...pests”) with appropriate punctuation.

---

## Q10

B

B. the HHI score of a less concentrated market will be much lower.

---

Choice B is the best answer. The convention being tested is subject-modifier placement. This choice makes the noun phrase "the HHI...market" the subject of the sentence and places it immediately after the modifying phrase "compared...market." In doing so, this choice clearly establishes that the HHI score of a less concentrated market—and not another noun in the sentence—is being compared with the HHI score of a highly concentrated market.

Choice A is incorrect because it results in a dangling modifier. The placement of "a market that is less concentrated" immediately after the modifying phrase illogically suggests that a market is being compared with an HHI score. Choice C is incorrect because it results in a confusing, illogical sentence. The placement of the modifier "when a market is less concentrated" after "a highly concentrated market" is contradictory. Furthermore, it's ambiguous what "its" is referring to in "its HHI score," resulting in an illogical comparison. Choice D is incorrect because it results in a dangling modifier. The placement of "a less concentrated market" immediately after the modifying phrase illogically suggests that a market is being compared with an HHI score.

---
