Q1**A****A.** extensive: a

Choice A is the best answer. The convention being tested is the use of a colon within a sentence. In this choice, the colon is correctly used to introduce the following explanation of what the Patriot cause had grown into by 1774.

Choice B is incorrect because a semicolon can't be used in this way to join the main clause ("what...extensive") and the supplementary element ("a network...Congress"). A semicolon is conventionally used to join two main clauses, whereas a colon is conventionally used to introduce an element that explains or amplifies the information in the preceding clause, making the colon the better choice in this context. Choice C is incorrect because it results in a comma splice. The addition of the pronoun and verb "it was" forms the start of a new main clause in the sentence, and a comma can't be used in this way to mark the boundary between two main clauses. Choice D is incorrect because it results in a rhetorically unacceptable sentence fragment beginning with "a network."

Q2**C****C.** its

Choice C is the best answer. The convention being tested is the use of possessive determiners. The singular possessive determiner "its" agrees in number with the singular subject "the Tajik Republic" and thus indicates that the other republics were its peers.

Choice A is incorrect because the plural possessive determiner "their" doesn't agree in number with the singular subject "the Tajik Republic." Choice B is incorrect because "they're" is the contraction for "they are," not a possessive determiner. Choice D is incorrect because "it's" is the contraction for "it is" or "it has," not a possessive determiner.

Q3

C

C. system. Analyzing

Choice C is the best answer. The convention being tested is punctuation use between sentences. In this choice, the period is used correctly to mark the boundary between one sentence ("The city...system") and another ("Analyzing...footage"). The participial phrase beginning with "analyzing" modifies the subject of the second sentence, "the AI algorithm."

Choice A is incorrect. Placing a dash before "analyzing" creates a confusing and ambiguous modifying element ("analyzing...areas") and a comma splice between "areas" and "the AI algorithm." (A comma can't be used in this way to mark the boundary between sentences.)

Choice B is incorrect because it results in a comma splice. A comma can't be used in this way to mark the boundary between sentences. Choice D is incorrect because it results in a run-on sentence. The sentences ("The city...system" and "analyzing...footage") are fused without punctuation and/or a conjunction.

Q4

B

B. increase

Choice B is the best answer. The convention being tested is subject-verb agreement. The plural verb "increase" agrees in number with the plural subject "toxins."

Choice A is incorrect because the singular verb "is increasing" doesn't agree in number with the plural subject "toxins." Choice C is incorrect because the singular verb "increases" doesn't agree in number with the plural subject "toxins." Choice D is incorrect because the singular verb "has increased" doesn't agree in number with the plural subject "toxins."

Q5

B

B. continents: geological

Choice B is the best answer. The convention being tested is punctuation use between a main clause and a supplementary phrase. In this choice, a colon is correctly used to mark the boundary between the main clause (“A study...continents”) and the supplementary phrase (“geological...above”) and to introduce the following explanation of the origin of Earth’s continents.

Choice A is incorrect because it fails to mark the boundary between the main clause (“A study...continents”) and the supplementary phrase (“geological...above”) with appropriate punctuation. Choice C is incorrect because a semicolon can’t be used in this way to join the main clause (“A study...continents”) and the supplementary phrase (“geological...above”). A semicolon is conventionally used to join two main clauses, whereas a colon is conventionally used to introduce an element that explains or amplifies the information in the preceding clause, making it the better choice in this context. Choice D is incorrect because it results in a rhetorically unacceptable sentence fragment beginning with “geological.”

Q6

A

A. changes, including

Choice A is the best answer. The convention being tested is the use of verb forms within a sentence. The nonfinite present participle “including” is correctly used to form a supplementary element that interrupts the main clause “These extensive changes...reflected the poet’s evolving literary perspective and experience of the US Civil War.” This supplementary element, offset by commas after “changes” and “material,” provides examples of the changes Whitman made to *Leaves of Grass*.

Choice B is incorrect because it results in an ungrammatical sentence. The finite modal verb “would include” can’t be used in this way to form a supplementary element within the main clause. Choice C is incorrect because it results in an ungrammatical sentence. The finite past tense verb “included” can’t be used in this way to form a supplementary element within the main clause. Choice D is incorrect because it results in an ungrammatical sentence. The finite present tense verb “include” can’t be used in this way to form a supplementary element within the main clause.

Q7**C**

C. antiquity, however;

Choice C is the best answer. The convention being tested is the punctuation of a supplementary phrase following a clause. This choice uses a comma to separate the supplementary adverb phrase "however" from the independent clause it modifies ("They...antiquity") and uses a semicolon to join the first independent clause ("They...antiquity") and the second independent clause ("some...literature"). Further, placing the semicolon after "however" indicates that the information in the clause that this is part of (that neoclassical writers were not the first to adopt classical literary modes) is contrary to what might be assumed from the information in the previous sentence (that the neoclassical writers were unique in imitating classical epic poetry and satires).

Choice A is incorrect because it fails to mark the boundary after "however" between the two independent clauses with appropriate punctuation. Choice B is incorrect because the comma after "however" can't be used in this way to mark the boundary between the two independent clauses. Choice D is incorrect because placing the semicolon after "antiquity" illogically indicates that the information in the clause that this is part of (that prominent Renaissance figures were also influenced by classical literature) is contrary to the information in the previous clause (that neoclassical writers were not the first to adopt classical literary modes).

Q8**A**

A. animates

Choice A is the best answer. The convention being tested is subject-verb agreement. The singular verb "animates" agrees in number with the singular subject "question."

Choice B is incorrect because the plural verb "have animated" doesn't agree in number with the singular subject "question." Choice C is incorrect because the plural verb "animate" doesn't agree in number with the singular subject "question." Choice D is incorrect because it results in an ungrammatical sentence. The nonfinite participle "animating" doesn't supply the clause with a finite verb.

Q9**B**

B. leaves; man-made trash,

Choice B is the best answer. The convention being tested is the punctuation of elements in a complex series. It's conventional to use a semicolon to separate items in a complex series with internal punctuation, and in this choice, the semicolon after "leaves" is conventionally used to separate the first item ("natural debris, such as dried leaves") and the second item ("man-made trash, such as plastic bags") in the series of materials used by Gavua. Further, the comma after "trash" correctly separates the noun phrase "man-made trash" from the supplementary phrase ("such as plastic bags") that describes it.

Choice A is incorrect because a comma after "leaves" doesn't match the semicolon used later to separate the second and third items in the series ("man-made...bags" and "and...glue"). Additionally, it's not conventional to use a colon in this way to separate a supplementary phrase ("such as plastic bags") from the noun phrase it modifies ("man-made trash"). Choice C is incorrect because a comma after "leaves" doesn't match the semicolon used later to separate the second and third items in the series ("man-made...bags" and "and...glue"). Choice D is incorrect because it's not conventional to use a semicolon in this way to separate a supplementary phrase ("such as plastic bags") from the noun phrase it modifies ("man-made trash").

Q10**D**

D. was

Choice D is the best answer. The convention being tested is subject-verb agreement. The singular verb "was" agrees in number with the singular subject "amplifying." Gerunds such as "amplifying" are always singular.

Choice A is incorrect because the plural verb "were" doesn't agree in number with the singular subject "amplifying." Choice B is incorrect because the plural verb "have been" doesn't agree in number with the singular subject "amplifying." Choice C is incorrect because the plural verb "are" doesn't agree in number with the singular subject "amplifying."

Notes

Accept equivalent forms (e.g. $0.25 \equiv 1/4$). For grid-in items, decimal and fraction answers are both valid.
