Q1**A**

A. models—which

Choice A is the best answer. The convention being tested is the use of punctuation within a sentence. The dashes after "models" and "decision-makers" correctly separate the supplementary element "which assume that people are consistently rational decision-makers" from the rest of the sentence. This punctuation indicates that this element could be removed without affecting the grammatical coherence of the sentence.

Choice B is incorrect because a comma can't be paired with a dash in this way to separate the supplementary element from the rest of the sentence. Choice C is incorrect because it fails to use appropriate punctuation to separate the supplementary element from the rest of the sentence. Choice D is incorrect because it interrupts the sentence at an illogical and grammatically incoherent point. The dash should be placed before "which," not after it, to mark the beginning of the supplementary element.

Q2**D**

D. rain

Choice D is the best answer. "That...[rain] back onto Mars's surface" is a relative clause that describes the "bits of molten rock." Forming the clause requires a conjugated, finite verb, and this is the only choice that provides that.

Choice A is incorrect. "To rain" is an infinitive and can't serve as the main verb of a clause. A conjugated verb is needed here to form the main verb of the relative clause "that...[rain] back onto Mars's surface," which describes the "bits of molten rock." Choice B is incorrect. "Raining" is a present participle and, on its own, can't serve as the main verb of a clause. A conjugated verb is needed here to form the main verb of the relative clause "that...[rain] back onto Mars's surface," which describes the "bits of molten rock." Choice C is incorrect. "Having rained" is a perfect participle and can't serve as the main verb of a clause. A conjugated verb is needed here to form the main verb of the relative clause "that...[rain] back onto Mars's surface," which describes the "bits of molten rock."

Q3

A

A. effect, though;

Choice A is the best answer. The convention being tested is the use of punctuation within a sentence. This choice correctly uses a comma to separate the supplementary adverb "though" from the preceding main clause ("Jetties can sometimes have the opposite effect") and uses a semicolon to join the next main clause ("obstructing...areas") to the rest of the sentence. Further, placing the semicolon after "though" logically indicates that the information earlier in this sentence (that jetties can sometimes cause erosion) is contrary to what might be assumed from the information in the previous sentence (that jetties are often constructed for the purpose of protecting coastlines from erosion).

Choice B is incorrect because it fails to mark the boundary between the two main clauses with appropriate punctuation. With "though...areas" functioning as a subordinate clause following the comma, this choice illogically indicates that the following information (that obstructing the natural flow of sand along the shore can sometimes lead to erosion) is contrary to the information earlier in the sentence (that jetties can sometimes cause erosion). Instead, the information following "though" supports the previous claim about the erosive effects of jetties. Choice C is incorrect because it's not conventional to use a semicolon in this way to separate a main clause from a dependent clause. Further, it illogically indicates that the following information (that obstructing the natural flow of sand along the shore can sometimes lead to erosion) is contrary to the information earlier in the sentence (that jetties can sometimes cause erosion). Instead, the information following "though" supports the previous claim about the erosive effects of jetties. Choice D is incorrect because it results in a comma splice. Commas can't be used in this way to set off a supplementary word or phrase between two main clauses.

Q4

A

A. Henry resumed his reign,

Choice A is the best answer. The convention being tested is subject-modifier placement. This choice ensures that the introductory phrase “upon recovering two years later” appears immediately before the noun it modifies (“Henry”), clearly establishing that Henry recovered two years later.

Choice B is incorrect because it results in a dangling modifier. The placement of the noun phrase “the reign of Henry” immediately after the introductory phrase illogically suggests that the reign of Henry recovered two years later. Choice C is incorrect because it results in a dangling modifier. The placement of the noun phrase “Henry’s reign” immediately after the introductory phrase illogically suggests that Henry’s reign recovered two years later. Choice D is incorrect because it results in a dangling modifier. The placement of the function word “it” immediately after the introductory phrase illogically suggests that “it” recovered two years later.

Q5

A

A. food:

Choice A is the best answer. The convention being tested is colon use within a sentence. A colon used in this way introduces information that illustrates or explains information that has come before it. In this case, the colon introduces the following explanation of why some roundworms in the Southern Hemisphere move in the opposite direction of Earth’s magnetic field.

Choice B is incorrect because it results in a comma splice. A comma can’t be used in this way to join two long independent clauses (“Researchers...food” and “in...sources”) such as these.

Choice C is incorrect because it results in a run-on sentence. The two clauses (“Researchers...food” and “in...sources”) are fused without punctuation. Furthermore, the conjunction “while” fails to indicate that what follows is an explanation of why some roundworms in the Southern Hemisphere move in the opposite direction of Earth’s magnetic field. Choice D is incorrect because it results in a run-on sentence. The two clauses (“Researchers...food” and “in...sources”) are fused without punctuation and/or a conjunction.

Q6

A

A. explore

Choice A is the best answer. The convention being tested is subject-verb agreement. The plural verb “explore” agrees in number with the plural subject “Barrada’s pieces.”

Choice B is incorrect because the singular verb phrase “has explored” doesn’t agree in number with the plural subject “Barrada’s pieces.” Choice C is incorrect because the singular verb “explores” doesn’t agree in number with the plural subject “Barrada’s pieces.” Choice D is incorrect because the nonfinite participle “exploring” doesn’t supply the main clause with a finite verb.

Q7

C

C. novel; rather,

Choice C is the best answer. The convention being tested is the coordination of main clauses within a sentence. This choice correctly uses a semicolon to join a main clause (“Saville...novel”) and a second main clause (“she’s...it”) preceded by supplementary elements (“rather...narrative”).

Choice A is incorrect because it results in a run-on sentence. The two main clauses are fused without punctuation and/or a conjunction. Choice B is incorrect because it results in a comma splice. Without a conjunction following it, a comma can’t be used in this way to join two main clauses. Choice D is incorrect because it results in a comma splice. Without a conjunction following it, the comma after “novel” can’t be used in this way to join the two main clauses.

Q8

B

B. is

Choice B is the best answer. The convention being tested is subject-verb agreement. The singular verb "is" agrees in number with the singular subject "the shape."

Choice A is incorrect because the plural verb "are" doesn't agree in number with the singular subject "the shape." Choice C is incorrect because the plural verb "were" doesn't agree in number with the singular subject "the shape." Choice D is incorrect because the plural verb "have been" doesn't agree in number with the singular subject "the shape."

Q9

A

A. tenets. Developed

Choice A is the best answer. The convention being tested is punctuation use between sentences. This choice correctly uses a period to mark the boundary between one sentence ("The pedagogy...tenets") and another ("Developed...March in G"). The participial phrase "developed by Japanese violinist Shinichi Suzuki" modifies the subject of the next sentence, "the method."

Choice B is incorrect because it results in a run-on sentence. The sentences ("The pedagogy...tenets" and "Developed...March in G") are fused without punctuation and/or a conjunction. Choice C is incorrect because it creates a confusing and illogical sentence structure. The relative pronoun "that" followed by a comma can't be used in this way to mark the boundary between sentences. Choice D is incorrect because it results in a comma splice. A comma can't be used in this way to mark the boundary between sentences.

Q10

C

C. underlie

Choice C is the best answer. The convention being tested is subject-verb agreement. The plural verb "underlie" agrees in number with the plural subject "frameworks."

Choice A is incorrect because the singular verb "underlies" doesn't agree in number with the plural subject "frameworks." Choice B is incorrect because the singular verb "is underlying" doesn't agree in number with the plural subject "frameworks." Choice D is incorrect because the singular verb "has been underlying" doesn't agree in number with the plural subject "frameworks."

Notes

Accept equivalent forms (e.g. $0.25 \equiv 1/4$). For grid-in items, decimal and fraction answers are both valid.
