Q1**C****C. microsculptures. Creations**

Choice C is the best answer. The convention being tested is punctuation between sentences. In this choice, the period is used to correctly mark the boundary between one sentence ("Jamaican...microsculptures") and another ("Creations...strands"). The noun phrase beginning with "creations" modifies the subject of the next sentence, "Wigan's sculptures."

Choice A is incorrect because it results in a run-on sentence. The sentences ("Jamaican...microsculptures" and "Creations...strands") are fused without punctuation and/or a conjunction. Choice B is incorrect because it results in a comma splice. A comma can't be used in this way to mark the boundary between sentences. Choice D is incorrect. Without a comma preceding it, the conjunction "and" can't be used in this way to join sentences.

Q2

B

B. Chraïbi's debut novel, published two years before Morocco gained its independence,

Choice B is the best answer. Subject-modifier placement requires a modifier and its subject to be next to each other. The subject of the modifier "a coming-of-age story...colonialism" is Chraïbi's novel *The Simple Past*, so the subject "Chraïbi's debut novel" fits perfectly after this introductory modifying phrase.

Choice A is incorrect. Modifiers and their subjects must go next to each other. The introductory modifier "a coming-of-age story...colonialism" is describing Chraïbi's novel, not Morocco. However, this choice places Morocco directly next to that modifier. Choice C is incorrect. Modifiers and their subjects must go next to each other. The introductory modifier "a coming-of-age story...colonialism" all describes Chraïbi's novel, not Chraïbi himself. However, this choice places Chraïbi directly next to that modifier. Choice D is incorrect. Modifiers and their subjects must go next to each other. The modifier "a coming-of-age story..." is describing Chraïbi's novel, so that needs to be the subject immediately after the modifier. This choice adds another modifier that describes Chraïbi's novel, but then puts "Chraïbi" himself—not the novel—right after that modifier, which doesn't make sense. Chraïbi wasn't "published two years before" Moroccan independence; his novel *The Simple Past* was.

Q3

C

C. nickname, however,

Choice C is the best answer. The convention being tested is punctuation use between a main clause and two supplementary elements. In this choice, the commas after “nickname” and “however” are correctly used to separate the supplementary adverb “however” from the main clause (“Scott-Heron...nickname”) on one side and the supplementary participial phrase (“feeling...bluesologist”) on the other.

Choice A is incorrect because it fails to mark the boundary between the supplementary adverb “however” and the supplementary phrase (“feeling...bluesologist”). Choice B is incorrect because a semicolon can’t be used in this way to join the supplementary adverb “however” and the supplementary phrase (“feeling...bluesologist”). Choice D is incorrect because a semicolon can’t be used in this way to join the main clause (“Scott-Heron...nickname”) and the supplementary word and phrase (“however” and “feeling...bluesologist”). Moreover, placing the semicolon after “nickname” illogically signals that the following information (Scott-Heron’s feeling that the nickname didn’t encapsulate his devotion to the blues tradition) is contrary to the information in the previous clause (Scott-Heron’s resistance to the nickname).

Q4

D

D. prioritizing

Choice D is the best answer. The convention being tested is the use of verb forms within a sentence. The nonfinite present participle “prioritizing” is correctly used to form a supplementary element that modifies “their design,” describing what the headrests’ design prioritized.

Choice A is incorrect because it results in a comma splice. The finite past perfect verb “had prioritized” creates a second main clause in the sentence, and the comma after “headrests” can’t be used in this way to join two main clauses. Choice B is incorrect because it results in a comma splice. The finite past progressive verb “was prioritizing” creates a second main clause in the sentence, and the comma after “headrests” can’t be used in this way to join two main clauses. Choice C is incorrect because it results in a comma splice. The finite past tense verb “prioritized” creates a second main clause in the sentence, and the comma after “headrests” can’t be used in this way to join two main clauses.

Q5

D

D. involved;

Choice D is the best answer. The convention being tested is the use of punctuation within a sentence. This choice uses a semicolon in a conventional way to join the first main clause ("That the...involved") and the second main clause ("establishing...divisive"). Further, the semicolon is the most appropriate choice when joining two separate, parallel statements, such as here, where the information following the semicolon contrasts with the information before.

Choice A is incorrect because placing a colon after "involved" illogically indicates that the information in the second main clause (the precise location was the subject of disagreement) explains or amplifies the information in the previous main clause (the general location was agreed upon by all). Instead, the information in the second clause contrasts with the previous information. Choice B is incorrect because it results in a comma splice. Without a conjunction following it, a comma can't be used in this way to join two main clauses. Choice C is incorrect because it results in a run-on sentence. The two main clauses are fused without punctuation and/or a conjunction.

Q6

C

C. it often consists

Choice C is the best answer. The convention being tested is pronoun-antecedent agreement. The singular pronoun "it" agrees in number with the singular antecedent "industry" and clearly indicates that the industry consists of just one or two suppliers per municipality.

Choice A is incorrect. The plural pronoun "these" neither agrees in number with the singular antecedent "industry" nor clearly indicates that the industry—not another plural noun in the sentence, such as "start-up costs" or "barriers"—consists of just one or two suppliers per municipality. Choice B is incorrect because the plural pronoun "they" doesn't agree in number with the singular antecedent "industry." Choice D is incorrect because the singular pronoun "this" is ambiguous in this context; the resulting sentence leaves unclear what consists of just one or two suppliers per municipality.

Q7

A

A. Tribe, and

Choice A is the best answer. This choice uses a comma and a coordinating conjunction (“and”) to join two independent clauses (“The Tantaquidgeon...Tribe” and “Today...country”).

Choice B is incorrect. This choice results in a grammar error known as a run-on sentence. The clauses before and after “Tribe” are both independent, so they need to be separated with some sort of punctuation. Choice C is incorrect. This choice results in a grammar error known as a run-on sentence. The clauses before and after “and” are both independent, so they can’t be linked with just a conjunction. A comma would also be required. Choice D is incorrect. This choice results in a grammar error called a comma splice. The clauses before and after “Tribe” are both independent, so they can’t be linked with just a comma. A coordinating conjunction like “and” or “but” would also be required.

Q8

D

D. aren’t

Choice D is the best answer. The subject “talents” is plural, and so is the verb “aren’t”: “the artistic talents...aren’t limited.”

Choice A is incorrect. The subject “talents” is plural, but the verb “hasn’t been” is singular. Choice B is incorrect. The subject “talents” is plural, but the verb “wasn’t” is singular. Choice C is incorrect. The subject “talents” is plural, but the verb “isn’t” is singular.

Q9

D

D. rare;

Choice D is the best answer. The convention being tested is the use of punctuation within a sentence. This choice uses a semicolon in a conventional way to join the first main clause ("In many...rare") and the second main clause ("in some...common") in this sentence.

Choice A is incorrect. Joining the first main clause ("In many...rare") and the second main clause ("in some...common") with the conjunction "and" conflicts with the use of "however" later in the sentence, resulting in a confusing and illogical sentence. Choice B is incorrect because it results in a comma splice. Without a conjunction following it, a comma can't be used in this way to join two main clauses. Choice C is incorrect because it results in a run-on sentence. The two main clauses are fused without punctuation and/or a conjunction.

Q10

D

D. is

Choice D is the best answer. The convention being tested is subject-verb agreement. The singular verb "is credited" agrees in number with the singular subject "mathematician Grigori Perelman."

Choice A is incorrect because the plural verb "are credited" doesn't agree in number with the singular subject "mathematician Grigori Perelman." Choice B is incorrect because the plural verb "have been credited" doesn't agree in number with the singular subject "mathematician Grigori Perelman." Choice C is incorrect because the plural verb "are being credited" doesn't agree in number with the singular subject "mathematician Grigori Perelman."

Notes

Accept equivalent forms (e.g. $0.25 \equiv 1/4$). For grid-in items, decimal and fraction answers are both valid.
