Q1**D**

D. To explain a study's conclusion and how a research team arrived at that conclusion

Choice D is the best answer because it most accurately describes the main purpose of the text, which is to explain a study's conclusion and how researchers involved in the study arrived at that conclusion. The text begins by summarizing the main conclusion of the study conducted by Paul Hanel and colleagues: when confronted with ideas they disagree with in discussions about controversial topics, people are more likely to respond politely if they think about their personal values before engaging in such discussions. The text then goes on to describe the design of Hanel and colleagues' experiment. By comparing interactions between members of an experimental group (who had been prompted to write about their personal values beforehand) to those between members of a control group (who had been prompted to write about a beverage), the team found that people in the experimental group behaved more civilly, or politely, than people in the control group did during discussions about a controversial topic. This finding led to the conclusion described at the beginning of the text.

Choice A is incorrect. Although the text discusses the results of a study, it doesn't provide any indication that the conclusion the study supported—that when facing disagreement, people behave more politely when they have thought about their values—is a belief that is widely held. Choice B is incorrect because the text doesn't indicate that the researchers found the results of their study to be surprising, or contrary to what they expected. In fact, there's no indication provided in the text about how the researchers felt about the study's results or that the results should be considered surprising. Choice C is incorrect. Although the text discusses the experimental design of a study, it doesn't suggest any improvements to that design; instead, it focuses on how the design enabled the researchers to draw a particular conclusion.

Q2

B

B. ambivalence toward

Choice B is the best answer because it most logically completes the text’s description of how Pico feels about the natural world. In this context, to say that Pico portrays his “ambivalence toward” nature would mean that he portrays his mixed feelings about nature. The text explains that Pico “honors the centrality of nature” and also makes it clear that he doesn’t enjoy being in nature. This context suggests that Pico feels ambivalence toward nature.

Choice A is incorrect because saying that Pico portrays his “responsiveness to” nature would mean that he portrays himself as quick to react to nature, which isn’t supported by the text. Instead, the text focuses on Pico’s mixed feelings toward nature, describing him as both honoring nature’s role in his tribe’s beliefs and expressing his personal dislike for being in nature. Choice C is incorrect because saying that Pico portrays his “renunciation of” nature would mean that he portrays himself as rejecting nature, which isn’t supported by the text. The text conveys that Pico demonstrates both positive and negative responses toward nature, not that he’s giving it up completely. Choice D is incorrect because saying that Pico portrays his “mastery over” nature would mean that he portrays himself as having control over nature, which isn’t supported by the text. The text focuses on Pico’s mixed feelings about nature; nothing in the text suggests that Pico feels mastery over nature.

Q3

A

- A. To convey the narrator's experience of observing and making sense of differences between two cultures she embraces
-

Choice A is the best answer because it most accurately describes the main purpose of the text. The narrator asserts that she loves both her “own” country (Japan) and her “adopted country” (the United States) even though the two countries differ “widely.” She also indicates that, at first, she would try to explain unfamiliar experiences that she had in the United States using the standards ingrained in her from growing up in Japan. Thus, the main purpose of the text is to convey the narrator's experience of observing and making sense of the differences between two cultures she embraces.

Choice B is incorrect because the text makes no reference to possible companions. Although the text does indicate that the narrator sometimes used the cultural framework she acquired growing up in Japan to explain some experiences she's had, there is no suggestion that this was in service of making friends. And although “no one seemed to know” strongly implies that the narrator has interacted with other people in the United States, there is no indication that these conversations involved her discussing Japanese customs. Choice C is incorrect because nothing in the text suggests that the narrator was hesitant to ask questions. In fact, the narrator indicates that “no one seemed to know the origin” of various customs, which provides evidence that, rather than being hesitant, she sought information from several people. Choice D is incorrect because the text makes no reference to the physical distance between Japan and the United States. Although the narrator indicates that the two countries differ “widely” and likens them to “two separate worlds,” these descriptions relate to cultural aspects of the countries and the narrator's feelings about the two countries, not the physical distance between them.

Q4

B

B. contingent on

Choice B is the best answer because it most logically completes the text's discussion of visual balance in photography. In this context, "contingent on" means conditional upon, or determined by. The text indicates that different ways of balancing elements in a photograph convey different ideas to viewers (for example, symmetrical composition tends to emphasize similarity among elements, whereas asymmetry tends to emphasize difference). Thus, there is a strong connection between what a photograph conveys and how its elements are balanced. Therefore, what a photo conveys is contingent on how it is balanced.

Choice A is incorrect. In this context, "inhibited by" most nearly means hindered or undermined by. The text indicates that different ways of balancing elements in a photograph convey different ideas to viewers, thereby indicating a relationship between image balance and what is conveyed. Although this explanation is consistent with a photographer choosing asymmetrical balance even while intending to convey similarity (associated with symmetrical balance), there is nothing to indicate that messages generally are inhibited by balance. Rather the implication is that balance is a tool photographers can use to craft their messages. Choice C is incorrect. In this context, "obligated to" means duty bound toward or answerable to. In context, it would not make sense to assert that a photograph's message is obligated to how that photograph is balanced. Choice D is incorrect. In this context, "reserved for" most nearly means solely available to someone or held aside for some purpose. The text as a whole does not support the claim that a photograph's message is reserved for how that photograph is balanced.

Q5

D

D. To depict the setting as the characters await a visitor's arrival

Choice D is the best answer because it most accurately reflects the main purpose of the text. The text portrays Miss Pyne as awaiting the arrival of a carriage while Martha brings strawberries and flowers from the garden into the house. The text also describes the surroundings of the scene, stating that Miss Pyne looks "stately and calm," the evening is bright and cool, and birds are singing in the garden as the sun sets. Then the last sentence states that the house was "wide open to the long-expected guest," which strongly suggests that Miss Pyne's anticipation and Martha's activities were in preparation for the guest who is expected to arrive in the carriage. Thus, the text depicts the setting and conveys what these characters are doing as they await the arrival of their visitor.

Choice A is incorrect because there is nothing in the text to indicate that the characters feel any worry about the guest's arrival. The text indicates that the guest was "long-expected," but characterizing Miss Pyne as "stately and calm" conflicts with the idea that the characters are worried about the guest. Choice B is incorrect because the text describes a moment in time when two characters are awaiting the arrival of a visitor rather than an extended period over which characters could be seen changing. Choice C is incorrect. Although the text describes the activity indoors (Miss Pyne sitting calmly), it describes a higher level of activity, not stillness, outside (Martha bringing fruit and flowers and birds singing).

Q6

A

A. nullify

Choice A is the best answer because it logically completes the text's discussion of imported goods and consumer prices. In this context, "nullify" most nearly means negate or undermine. The text indicates that importing goods to a country can reduce consumer prices in that country, then cautions that the costs of transporting goods within the country is also a factor. These transportation costs likely raise the prices that must be paid by people who live far from the ports of entry. Therefore, the intranational transportation costs could nullify the price advantages to consumers of importing goods.

Choice B is incorrect. In this context, "denigrate" would most nearly mean disparage or deny the importance of. Since transportation costs would not be capable of denying the importance of price advantages, it would not make sense to state that intranational transportation costs denigrate the price advantages of importing goods. Choice C is incorrect. In this context, "underestimate" would most nearly mean predict a lower value for, or to undervalue, someone or something. Though transportation costs might be undervalued, they cannot themselves undervalue something else, so it would not make sense to state that intranational transportation costs underestimate the price advantages of importing goods. Choice D is incorrect. In this context, "misconstrue" would most nearly mean misunderstand. Since transport costs are not capable of understanding, it would not make sense to claim that intranational transportation costs misconstrue the price advantages of importing goods.

Q7

A

A. It presents a conclusion about Roman trade routes based on the team's findings.

Choice A is the best answer because it most accurately describes how the underlined sentence functions in the text as a whole. The first sentence explains that Bernabei and his team studied growth rings to obtain information about the ancient oak planks found during a construction project in Rome. The next sentence presents what the researchers learned: the wood from the planks came from France's Jura region, which is far from Rome. The underlined sentence then presents the implications of the findings about the planks: the wood must have been brought to Rome by boat, a difficult task that suggests Roman trade routes were complex. Thus, the underlined sentence mainly functions to present a conclusion about Roman trade routes based on the team's findings.

Choice B is incorrect because the text doesn't suggest that the team thought the ancient planks were used in the construction of a boat, nor does the underlined sentence question that conclusion. Instead, the text states that the wood could only have been transported from Jura to Rome in a boat. Choice C is incorrect because the underlined sentence simply offers a conclusion drawn from the team's findings about the likely place of origin of the ancient planks; the text never mentions why oak was chosen for the planks instead of other wood. Choice D is incorrect because neither the underlined sentence nor the text as a whole addresses any methods that Romans used in constructing subways. Instead, the underlined sentence offers a conclusion drawn from the team's findings about the likely place of origin of the ancient wooden planks discovered.

Q8

A

A. reduced

Choice A is the best answer because it most logically completes the text's discussion of how the flow of information between two regions of the brain may affect the ease of people's decision making. In this context, "reduced" means decreased. The text presents the finding from a team of neuroeconomists that decision making may be connected to communication between the prefrontal cortex and the parietal cortex. In presenting this finding, the text suggests a contrast between people who tend to be more decisive and people who make decisions more slowly. According to the text, people tend to be more decisive when the flow of information between the two brain regions is intensified, or strengthened. On the other hand, this context suggests that people make choices more slowly when the flow of information between the two brain regions is decreased.

Choice B is incorrect because "evaluated" means assessed, which wouldn't make sense in context. According to the text, people tend to be more decisive when the flow of information between two brain regions is intensified, or strengthened. This suggests that people's ease of decision making varies based on the rate of information traveling between the regions, not based on an effort to assess the information. Choice C is incorrect because "determined" means judged or influenced, neither of which would make sense in context. According to the text, people tend to be more decisive when the flow of information between two brain regions is intensified, or strengthened. This suggests that people's ease of decision making varies based on the rate of information traveling between the regions, not based on an effort to judge or influence the information. Choice D is incorrect because "acquired" means developed or attained, neither of which would make sense in context. According to the text, people tend to be more decisive when the flow of information between two brain regions is intensified, or strengthened. This suggests that people's ease of decision making varies based on the rate of information traveling between the regions, not based on the development or attainment of the information.

Q9

A

- A. It describes the delivery of a letter, and then portrays a character's happiness at reading that letter.
-

Choice A is the best answer because it most accurately describes the overall structure of the text. The narrator begins by explaining how Charlot carefully delivers Atlante's letter to Rinaldo, and then relates that Rinaldo feels "transported with joy" after reading the letter. Therefore, the overall structure of the text is best described as a description of the delivery of a letter followed by the portrayal of a character's happiness after reading the letter.

Choice B is incorrect because the text indicates that the letter has been written; there's no explanation why another character hasn't written one. In addition, the text's description of Rinaldo "in a melancholy posture" suggests that he's sad and thoughtful, not that he's desperate to receive the letter. Choice C is incorrect. Although the text states that Charlot won't toss the letter to Rinaldo because she doesn't want it to fall, the text doesn't refer to the contents of the letter. Instead, the text describes how happy Rinaldo feels after reading it. Choice D is incorrect. Although the text does describe Rinaldo's reaction to the letter, the text doesn't begin by discussing Atlante's inspiration for writing the letter. Instead, the text begins by discussing the delivery of the letter.

Q10

A

A. indulge

Choice A is the best answer because it most logically completes the text's discussion of the Roman emperor Marcus Aurelius. In this context, "indulge" means treat with excessive leniency. The text states that according to historian Edward Gibbon, Marcus Aurelius, who was widely considered virtuous, had only a single character flaw: his mild temperament. The text suggests that because of this flaw, Marcus Aurelius had an overly permissive nature. This context, in turn, supports the idea that Marcus Aurelius treated the vices, or evils, of those around him with excessive leniency, indulging rather than punishing those vices.

Choice B is incorrect. While the text does state that Marcus Aurelius was widely considered virtuous, it gives no indication that he was inclined to "despise," or hate, others' vices. Rather, the text suggests that he showed undue tolerance for these vices because of his overly permissive nature—that is, his inclination to allow others to do as they wished. Choice C is incorrect because the text's description of Marcus Aurelius as overly permissive suggests that he showed undue tolerance for others' vices, not that he tried to "moderate" those vices, or lessen their intensity. Choice D is incorrect because the text's description of Marcus Aurelius as overly permissive suggests that he showed undue tolerance for others' vices, not that he attempted to "criticize," or speak disapprovingly of, those vices.

Notes

Accept equivalent forms (e.g. $0.25 \equiv 1/4$). For grid-in items, decimal and fraction answers are both valid.
