Q1**A**

- A. To introduce and illustrate Barrier Williams’s integral role in supporting other Black women as their circumstances changed during part of the Great Migration
-

Choice A is the best answer because it most accurately describes the text’s purpose, which is to discuss the important role Barrier Williams played in supporting many other Black women as they relocated to the northern United States during the early years of the Great Migration. After introducing Barrier Williams, the text describes how she helped find jobs for other Black women, who in many cases relocated in search of better employment prospects than the South could offer at the time. The text indicates that by doing so, she eased these women’s transition as their circumstances changed.

Choice B is incorrect. Although the text mentions Barrier Williams’s work as a political activist and writer for the *Chicago Defender*, it doesn’t discuss any professional connections she made in these roles or indicate that she used any such connections in her work to secure employment for other Black women. Choice C is incorrect. Although the text discusses a factor that caused many women to relocate during the Great Migration, their difficulty finding employment in the South, the text doesn’t indicate that this factor motivated the start of the Great Migration. Moreover, the text doesn’t discuss the factors that motivated Black men to migrate. Choice D is incorrect. Although the text mentions the difficult employment prospects for Black women in the domestic and agricultural sectors in the South during the Great Migration, the text’s main purpose isn’t to provide an overview of the employment challenges Black women faced in these sectors. Rather, it provides this information to show that Barrier Williams played a crucial role in supporting many Black women who relocated to the North by helping them achieve one of their main goals, securing a job.

Q2

B

B. discern

Choice B is the best answer because it most logically completes the text's discussion of the utility of the Oase 1 fossil to paleoanthropologists. As used in this context, "discern" means to detect or recognize something, especially something hidden or obscure. The text indicates that the Oase 1 fossil can help paleoanthropologists recognize patterns in the evolutionary process and shed light on ("illuminate") the period in which Oase 1 lived. Thus, the fossil will enable researchers to gain insights into, or discern, facts that are still not well understood.

Choice A is incorrect because in this context, "exploit" would suggest that the paleoanthropologists are using "steps in the evolution of hominids," which does not make logical sense. Rather, the text is about how the Oase 1 fossil could help paleoanthropologists learn about hominid evolution and the Pleistocene epoch more generally. Choice C is incorrect because in this context, "prioritize" would suggest that either the paleoanthropologists are placing more importance on "steps in the evolution of hominids" than they are on something else not identified in the text or that they are placing these steps in some sort of order. Rather, the text is about how the Oase 1 fossil could help paleoanthropologists learn about hominid evolution and the Pleistocene epoch more generally. Choice D is incorrect because to say that paleoanthropologists could "yield" or generate "steps in the evolution of hominids" doesn't make sense. The researchers may develop new insights into those evolutionary steps, but they do not create those steps themselves. Rather, the context makes it clear that they are detecting or discovering patterns based on their study of the Oase 1 fossil.

Q3

D

- D. By suggesting that dance companies should consider offering revised versions of *The Nutcracker* instead of completely rejecting the show
-

Choice D is the best answer because it reflects how the author of Text 2 would most likely respond to the underlined claim in Text 1. Text 1 begins by noting the success of *The Nutcracker* but then claims that the ballet is "stuck in the past" and should "no longer be produced." Text 2 begins by conceding that *The Nutcracker* is indeed outdated but argues that it should continue to be performed, states that the show can be updated to include more contemporary dance styles, and provides an example of one such modernized version, *Hot Chocolate Nutcracker*. Hence, the author of Text 2 would most likely respond to the underlined claim in Text 1 by suggesting that dance companies should consider offering revised versions of *The Nutcracker* instead of completely rejecting the show.

Choice A is incorrect because the author of Text 2 advocates for using creative ways to update *The Nutcracker* and therefore wouldn't respond to the underlined claim by rejecting the suggestion that contemporary audiences would enjoy an updated version. Choice B is incorrect because although the authors of both texts claim that *The Nutcracker* is outdated, neither text suggests that contemporary audiences have largely stopped attending productions of the show. On the contrary, Text 2 states that *The Nutcracker* is a holiday favorite and generates substantial income for some dance companies. Choice C is incorrect because although Text 2 provides an example of a contemporized version of *The Nutcracker*, the text doesn't suggest that offering modernized versions is a way to increase income for most dance companies. Rather, the author of Text 2 suggests that offering modernized versions is a way to make the ballet discussed in Text 1 feel less outdated.

Q4

B

- B. It introduces discussion of a specific example that supports the general claim made in the previous sentence.
-

Choice B is the best answer because it most accurately describes how the underlined portion functions in the text as a whole. The first sentence presents the general claim that industrial activity is not always a threat to wildlife. The underlined portion of the sentence that follows suggests that the silver-studded blue butterfly is an example of wildlife thriving in areas of industrial activity: active limestone quarries. Thus, the function of the underlined portion is to introduce a specific example in support of the general claim in the previous sentence.

Choice A is incorrect. Although the first sentence indicates that “industrial activity is often assumed” to harm wildlife, in the case of the silver-studded blue butterfly the text mentions neither an assumption about this species nor any challenge to such an assumption. Choice C is incorrect because the text mentions only one study: the “survey.” Additional studies are not mentioned in the text. Choice D is incorrect because neither the underlined portion nor any other portion of the text provides a definition for any of the terms used in the text’s argument.

Q5

B

B. marginalize

Choice B is the best answer because it most logically completes the text's discussion of how historians have treated rank-and-file (ordinary) workers in their analyses. In this context, "marginalize" means treat as unimportant or relatively powerless within a group or society. The text explains that according to Austin McCoy, historians have tended to treat "political, business, and labor leaders" as the "major actors" involved in making changes in organized labor in the period after the Second World War. By emphasizing the contributions of these leaders, historians have in effect minimized the contributions of ordinary workers, treating them as relatively unimportant and "nearly devoid of agency," thereby marginalizing them.

Choice A is incorrect. In this context, "epitomize" would mean either serve as an ideal example of something or make into an example of something, neither of which would make sense. In stating that historians have tended to characterize political, business, and labor leaders as the primary actors responsible for changes in the post-Second World War labor movement in a manner that minimizes the influence of ordinary workers, the text suggests that historians have tended to present ordinary workers as unimportant to or uninfluential within the movement, not that historians themselves serve as examples of ordinary workers, or that historians in their analyses have made ordinary workers into examples of the changes that occurred. Choice C is incorrect because in this context, "extol" would mean praise highly or glorify. The text states that historians have tended to present ordinary workers as being "nearly devoid of agency," thereby minimizing their importance. It therefore wouldn't make sense to say that in doing so, historians have tended to praise or glorify them. Choice D is incorrect because "substantiate" would mean verify with evidence, and nothing in the text suggests that historians have verified rank-and-file workers or their contributions in their analyses. If anything, the text suggests the opposite, implying that by minimizing workers' agency in organized labor, historians have likely overlooked evidence demonstrating their influence.

Q6

B

- B. It provides empirical evidence that the current understanding of an aspect of physics at a microscopic level must be incomplete.
-

Choice B is the best answer. Author 1 describes the puzzle that physicists still can't solve: at a microscopic level, the "laws of physics" suggest that we should be able to reverse processes that are not reversible at a macroscopic level (and, maybe, turn back time!). The experiment confirmed that those processes are not reversible even on the microscopic level, but it didn't explain why. This supports Author 1's point that physicists still don't fully understand how things work at a microscopic level—maybe the laws need to be revised.

Choice A is incorrect. We can't infer that the author of Text 1 would respond this way to the experiment. Text 2 does name two of the physicists involved in the experiment, but it never suggests that they disagree on anything. Choice C is incorrect. This is the opposite of what the experiment suggests. The experiment confirmed that the macroscopic-level law ("these things can't be reversed—like time") was still true on the microscopic level—meaning it supports the current understanding of physics at a macroscopic level. Choice D is incorrect. We can't infer that the author of Text 1 would respond this way to the experiment. Neither text makes this distinction between laboratory findings and the way the universe works in general.

Q7

D

D. To emphasize the extent of individuals' struggles to articulate thoughts on art

Choice D is the best answer because it most accurately describes the function of the underlined portions in the text as a whole. The underlined portions describe the young artists and intellectuals at the gathering as trying to "hew out," or give shape to, their views of art more clearly, but with each seeming to be using "an ill-balanced axe" and then feeling that the "strokes had gone awry." In context, the metaphorical language comparing attempts to refine concepts of art to imprecisely cutting wood with an inadequate axe serves to emphasize how much the individuals at the gathering struggled to articulate, or express, their thoughts; indeed, the text explains that the individuals couldn't quite grasp why their statements had gone awry and tended to try to rectify, or correct, them in continued discussion after they sat down.

Choice A is incorrect because the underlined portions characterize aspects of the young artists and intellectuals' attempts to present their general views of art more clearly, not their views of the reputation of a certain artwork; the text never mentions any specific artwork or its reputation. Choice B is incorrect. Although the underlined portions refer to a physical activity—cutting wood with an axe—the descriptions are metaphorical rather than literal. The text isn't describing people constructing works of art, large-scale or otherwise; rather, it's describing people talking at a gathering, using the idea of imprecisely cutting wood with an inadequate axe to suggest that each individual struggled when trying to present their view of art more clearly. Choice C is incorrect. Although the underlined portions do provide a reason for the young artists and intellectuals' discontent, the text focuses on the fact that they were each dissatisfied with their own statements, not on how they felt about the group's full conversation about art. Instead, the text explains that each individual tried to present their view of art more clearly but struggled (as if imprecisely cutting wood with an inadequate axe), couldn't grasp what went awry, and then felt the need to rectify, or correct, what they had just said. It's possible that the individuals were also discontented with the group's conversation overall, but neither the underlined portions nor the text as a whole suggest that.

Q8

D

D. accessible

Choice D is the best answer. When talking about a thing, “accessible” means “easy to understand.” This sets up the contrast in the next sentence, which tells us that critics mostly focus on art that is “cryptic or challenging” (meaning not easy to understand).

Choice A is incorrect. This doesn’t fit the logic of the text. The next sentence tells us that critics focus on art that is mysterious and challenging. If Hannock’s paintings are “innovative” (meaning advanced and original), then critics probably would comment on them. Choice B is incorrect. This doesn’t fit the logic of the text. The next sentence tells us that critics focus on art that is mysterious and challenging. If Hannock’s paintings are “subversive” (meaning disruptive and revolutionary), then critics probably would comment on them. Choice C is incorrect. This doesn’t fit the logic of the text. The next sentence tells us that critics focus on art that is mysterious and challenging. If Hannock’s paintings are “profound” (meaning very deep and insightful), then critics probably would comment on them.

Q9

D

D. By cautioning that the theory overlooks certain important aspects of how the script functioned

Choice D is the best answer. Lacadena’s theory is that Nahuatl script symbols signified syllables, but the consensus described in Text 2 is that they can signify either symbols or full words, depending on the context. So the author of Text 2 would likely consider Lacadena’s theory too simplistic: it’s missing the importance of the context in determining the meaning of a symbol.

Choice A is incorrect. This conflicts with Text 1’s description of Lacadena’s theory. Lacadena’s theory is that Nahuatl script symbols signified syllables. Choice B is incorrect. This conflicts with Text 1’s description of Lacadena’s theory. Text 1 states that Lacadena’s theory differed from what earlier scholars believed. Choice C is incorrect. We can’t infer that this is how the author of Text 2 would characterize Lacadena’s theory. Neither text mentions how or even if the script changed over time.

Q10

D

- D. The speaker describes attempts to control nature and then offers a reminder that not all nature is controllable.
-

Choice D is the best answer. This best describes the overall structure of the text. In the first half of the text, the speaker describes our attempts to control nature: cultivating, taming, and irrigating different kinds of land. In the second half, the speaker states that we can never tame the sea or the beach.

Choice A is incorrect. This doesn't describe the overall structure of the text. The speaker never argues that we should not interfere with nature. Rather, the speaker says that we are able to tame many different kinds of land, but we are unable to tame the sea or beaches. Choice B is incorrect. This doesn't describe the overall structure of the text. The speaker never describes our cultivation, taming, and irrigation of land as "temporary." Rather, the speaker says that we are able to tame many different kinds of land, but we are unable to tame the sea or beaches. Choice C is incorrect. This doesn't describe the overall structure of the text. The speaker never describes our cultivation, taming, and irrigation of land as an "admirable" approach to nature." Rather, the speaker says that we are able to tame many different kinds of land, but we are unable to tame the sea or beaches.

Notes

Accept equivalent forms (e.g. $0.25 \equiv 1/4$). For grid-in items, decimal and fraction answers are both valid.
