Q1**D**

D. To provide an overview of the founding and mission of the Nuyorican Poets Cafe

Choice D is the best answer. The text presents a brief history of the Nuyorican Poets Cafe, from how it got started in the '70s, to its expansion in the '80s, to its ongoing mission today.

Choice A is incorrect. This isn't the overall purpose. The text never mentions Algarín's motivations. Choice B is incorrect. This isn't the overall purpose. The text never discusses the cultural life of New York as a whole. Choice C is incorrect. This is too narrow. One sentence mentions that the Nuyorican Poets Cafe expanded its scope to include art and music, but this is only one point in the broader history of the Nuyorican Poets Cafe, which is the overall focus of the text.

Q2

D

D. invalidate

Choice D is the best answer because it most logically completes the text’s discussion of the economist’s claim about sales of personal electronic devices. In this context, “invalidate” most nearly means nullify or make invalid. The text indicates that interruptions in the supply of microchips for personal electronics “have challenged” the economist’s claim that sales of personal electronics will show strong growth in the coming months. The text goes on to clarify the effect of the delays on the economist’s projection, stating that the delays are very likely to extend the time frame over which the projected growth in sales will occur. This context suggests that the delays are unlikely to invalidate the economist’s projection entirely—the delays will probably alter the time frame of the projection, not nullify it or make it invalid.

Choice A is incorrect because saying that the delays are unlikely to “dispute,” or argue against, the economist’s projection wouldn’t make sense. Since the delays are an inanimate circumstance, they couldn’t argue against a prediction about the sales of personal electronics. Choice B is incorrect because saying that the delays are unlikely to “withdraw,” or remove from consideration, the economist’s projection wouldn’t make sense. Although the economist could withdraw her projection because of the delays, the delays themselves couldn’t withdraw her projection since they’re an inanimate circumstance and thus can’t choose to remove something from consideration. Choice C is incorrect because there’s nothing in the text to suggest that the delays will “underscore,” or emphasize, the economist’s projection. Instead, the text suggests that the delays are likely to extend the time frame of the economist’s projection but not to undermine the projection entirely.

- D. It presents the favorable opinion of Mr. Ely that other people hold and then describes the behaviors of Mr. Ely that enable him to maintain that favorable opinion.

Choice D is the best answer because it best describes the overall structure of the text. The first part of the text presents the favorable opinions that others hold of Mr. Ely: the laity of Milby regard him as having "remarkable powers and learning" and assume that he also impresses people in London, while his fellow clergy see him as "a discreet and agreeable fellow." The text then goes on to describe Mr. Ely's behaviors that enable him to cultivate and preserve his positive reputation. The text conveys that he avoids confrontations, abstaining from "warm discussion[s]" (that is, heated or contentious ones); that he avoids offending anyone by "rarely [saying] what he thought himself" and by refraining from openly ridiculing anyone; and that he doesn't give anyone any reason to ridicule or belittle his own character ("he never gave any one an opportunity of laughing at *him*"). In other words, these are all behaviors that suggest that Mr. Ely avoids doing anything that might make people dislike him or think poorly of him. Thus, the text begins by presenting the favorable view that people have of Mr. Ely and then describes the behaviors that enable him to maintain that favorable view.

Choice A is incorrect because the text doesn't describe any events that caused people's regard for Mr. Ely to diminish. Instead, the text explains that the people of Milby hold him in high regard and describes behaviors that suggest how he cultivates that regard. Choice B is incorrect because the text doesn't suggest that Mr. Ely's neighbors are more naïve than Londoners are or that they've been misled. Although the text suggests that Mr. Ely is very guarded in his outward behavior and conceals from people when he may be internally mocking them, which might suggest that people know him less well than they think they do, there's nothing in the text to suggest that Londoners are less naïve and therefore less easily misled than Mr. Ely's neighbors are. The text states that the people of Milby believe Mr. Ely to be "remarkable" and that they assume that people in London must find him so, too; it doesn't say anything about what Londoners actually think of him. Choice C is incorrect. While the text discusses Mr. Ely's public conduct at length, describing the ways in which he carefully cultivates an agreeable public persona, the text doesn't discuss how Mr. Ely behaves in private at all; it therefore wouldn't be accurate to say that the text begins by emphasizing a discrepancy between his public and private conduct. Furthermore, although the text concludes with examples illustrating that Mr. Ely typically doesn't share his true thoughts, indicating that he may be hiding aspects of his true personality when in public, and although the text as a whole conveys the idea that Mr. Ely benefits from this behavior, which might hint at his motives for doing so, the text doesn't

conclude by alluding to those motives. Instead, the text merely concludes with a description of the behaviors he engages in to win his neighbors' and colleagues' approval.

Q4

B

B. diminish

Choice B is the best answer because it most logically completes the text's discussion of birdsong. In this context, "diminish" means reduce or lessen. The text establishes that birds sing to communicate over potentially large distances and that researchers believe that birds that live in densely vegetated habitats sing at lower frequencies than birds that live in comparatively sparsely vegetated habitats. The text then explains that researchers hold this belief due to some effect of dense vegetation on the distance that high-frequency sounds can travel. If birds sing to communicate over long distances, it would be logical to conclude that researchers believe that birds in densely vegetated habitats sing at lower frequencies than birds in relatively sparse habitats do because dense vegetation diminishes the distance that high-frequency sounds can travel.

Choice A is incorrect because nothing in the text suggests that dense vegetation can "exceed," or surpass or go beyond, the distance that high-frequency sounds can travel. The text suggests that dense vegetation reduces the distance that high-frequency sounds can travel, not that dense vegetation goes farther than that distance. Choice C is incorrect because it would not be sensible to say that dense vegetation can "encompass," or enclose or encircle, the distance that high-frequency sounds can travel. The distance that sounds can travel is not an object that can be enclosed or encircled by vegetation. Choice D is incorrect because there is no information in the text indicating that dense vegetation can "conceal," or hide or keep from being observed, the distance that high-frequency sounds travel. Instead, the text suggests that dense vegetation reduces the distance that high-frequency sounds can travel.

Q5

B

- B. To explain that Spanish-language newspapers thrived in Texas and especially in El Paso during the late 1800s
-

Choice B is the best answer because it most accurately describes the main purpose of the text. The text begins by stating that there were many Spanish-language newspapers in cities across Texas in the late 1800s, citing San Antonio as a city that produced eleven such newspapers. The text then goes on to note that in El Paso, there were twenty-two newspapers published in Spanish in the late 1800s, more than any other Texas city. The text then concludes by explaining that the reason for this large number of Spanish-language newspapers was likely El Paso's location near Mexico and its large population of Spanish speakers. Therefore, the main purpose of the text is to explain that Spanish-language newspapers thrived in Texas cities, especially in El Paso, in the late 1800s.

Choice A is incorrect because the text doesn't discuss Spanish-language newspapers published in Texas today, let alone compare them with newspapers that were published in the 1800s.

Choice C is incorrect. Although the text characterizes El Paso as a particularly rich site for Spanish-language journalism in the late 1800s, the text doesn't discuss whether newspapers published in El Paso influenced the newspapers published in other cities across Texas, including San Antonio. Choice D is incorrect because the text doesn't mention whether Spanish-language newspapers published in Texas were also widely read in Mexico. The text only focuses on the popularity of Spanish-language newspapers within Texas, and especially in El Paso.

Q6

D

D. scale

Choice D is the best answer because it most logically completes the text's discussion of the *W* boson. In this context, "scale" means size or extent. The text indicates that recent measurements of the *W* boson were remarkable because they revealed the subatomic particle's mass to be much greater ("seven standard deviations higher") than had been expected based on a standard model. This context conveys not only that the measurements differed from predictions but also that the extent of the difference was very large.

Choice A is incorrect. Although the text indicates that there was a very large difference between the predicted mass and the actual measured mass of the subatomic particle, it doesn't explain the cause of, or reason behind, that difference. Choice B is incorrect because it wouldn't make sense to say that the measurements of the subatomic particle were notable because they differed from expectations and also because a difference existed between the measurements and what had been predicted; the text would be repeating the idea that there was a difference instead of adding to that idea. Choice C is incorrect because the text doesn't convey any implications of, or consequences of or conclusions drawn from, the fact that the mass of the subatomic particle differed from expectations; the context indicates only that the actual measured mass was much higher than the predicted mass.

Q7

A

A. To convey how engaging in song makes the speaker feel

Choice A is the best answer because it accurately states the main purpose of the text. The text begins by declaring that although a song is "but a little thing," or seemingly insignificant, singing it brings joy and gives the speaker of the text "zest," or excitement, in "hours of toil." The remainder of the text explores the idea that as night is falling, singing allows the speaker to feel that "all is well." Thus, the main purpose of the text is to convey how engaging in song makes the speaker feel.

Choice B is incorrect. Although the text mentions a shepherd, it neither indicates that the shepherd is singing nor does it compare the shepherd to the speaker. Choice C is incorrect. The text indicates that the speaker works hard, engaging in "hours of toil," and it can be inferred that the speaker likely lives in a rural area, since cows and a cowbell can be heard nearby. However, the text does not suggest that the speaker is a farmer or feels excited about farming. Moreover, the shepherd in the text is not a literal reference to someone who herds sheep but instead a figurative description of the moon as the shepherd of the stars. Choice D is incorrect because in the text, the speaker is singing a song, not listening to others sing one. Moreover, the text describes the feelings that the speaker has when singing a song, not the song itself.

Q8

B

B. concede

Choice B is the best answer because it most logically completes the text’s discussion of the significance of the 2014 archaeological finding at El Algar. In this context, “concede” means to admit something is true after first resisting that admission. The text indicates that some researchers believe “Bronze Age societies were ruled by men.” But the Bronze Age burial of a woman at El Algar included “valuable objects signaling a high position of power,” which would raise the possibility that “women may have also held leadership roles.” Thus, the text is calling into question the notion that only men were leaders in these societies and speculating that people holding this view may reconsider their opinion.

Choice A is incorrect because “waive” means to refrain from insisting that something, such as a right or a requirement, be observed; the word isn’t used, however, in contexts where someone acknowledges that an opinion they hold may be invalid, as is the case in the text. Choice C is incorrect. According to the text, the finding from the El Algar burial site undermines the view that Bronze Age societies were exclusively ruled by men. However, “refute” means to demonstrate that something is false and would not make sense in context. Lull and team’s finding supports the view that women may have also held leadership roles, not that they did not participate in such roles. Choice D is incorrect because in this context, “require” means to demand or specify as mandatory. However, it would not make sense for contemporary researchers to demand that Bronze Age “women may have also held leadership roles.”

Q9

A

A. It presents a claim about Mitchell, then gives an example supporting that claim.

Choice A is the best answer because it accurately describes the organization of the elements within the text. The text begins with the claim that Joni Mitchell's album covers use images she creates in order to emphasize ideas embedded in her albums. It then goes on to provide an example of how Mitchell's self-portrait on the cover of *Turbulent Indigo* resembles a painting by Van Gogh, which the text indicates helps emphasize the strong connection Mitchell feels toward Van Gogh, a connection that is also expressed in the album's title song.

Choice B is incorrect because there are no references in the text to artists other than Joni Mitchell and Van Gogh. Choice C is incorrect because there is nothing in the text that calls attention to any similarities or differences between Joni Mitchell and Van Gogh. Instead, it mentions that Mitchell feels a strong "artistic connection" to Van Gogh. Choice D is incorrect because the text discusses the cover before referring to any songs, and it only references one song from the album not all the songs.

Q10

D

D. homogeneous

Choice D is the best answer because it most logically completes the text's discussion of the art at the National Museum of the American Indian. In this context, "homogenous" means uniform or highly similar. The text explains that the painters whose works are included in this museum's collection employ an array of artistic styles, both Native and non-Native, traditional and new. Given this high degree of stylistic diversity, it is a misconception that Native art is uniform, or homogenous.

Choice A is incorrect because the text doesn't consider whether Native art is controversial, or causes disagreement or discussion; instead, the text discusses the stylistic diversity of the collection of the National Museum of the American Indian. Choice B is incorrect. Although the text indicates that some of the artists whose work is represented in the collection of the National Museum of the American Indian blend various artistic traditions into highly individual styles of their own, this is not the primary focus of the text. Instead, the text is concerned with how Native art is often mistakenly perceived as uniform, when in fact it is stylistically diverse. Choice C is incorrect because the text never implies that people mistakenly conceive of Native art as theoretical, or concerned with philosophical or abstract issues; instead, the text's discussion of Native art is framed around this art's stylistic diversity versus the misconception of it as homogenous.

Notes

Accept equivalent forms (e.g. $0.25 \equiv 1/4$). For grid-in items, decimal and fraction answers are both valid.
