**Q1****B****B. Specifically,**

Choice B is the best answer. "Specifically" logically signals that the information in this sentence—that Molina and Rowland's research laid the foundation for a later treaty—provides specific, precise details elaborating on the previous sentence's more general claim about the influence of the research.

Choice A is incorrect because "regardless" illogically signals that the information in this sentence is true despite the previous sentence's claim about the influence of Molina and Rowland's research. Instead, this information—that the research laid the foundation for a later treaty—provides specific details elaborating on the previous claim. Choice C is incorrect because "however" illogically signals that the information in this sentence contrasts with the previous sentence's claim about the influence of Molina and Rowland's research. Instead, this information—that the research laid the foundation for a later treaty—provides specific details elaborating on the previous claim. Choice D is incorrect because "earlier" illogically signals that the information in this sentence occurred at a time before Molina and Rowland's research influenced the fight against CFCs. Instead, this information—that the research laid the foundation for a later treaty—provides specific details elaborating on the previous claim about the research's influence.

**Q2**

**B**

B. Vitamin C, also known as ascorbic acid, can be found in pineapple as well as other fruits.

---

Choice B is the best answer. The sentence provides an example of a fruit that contains vitamin C, noting that vitamin C (also known as ascorbic acid) can be found in pineapple as well as other fruits.

Choice A is incorrect. While the sentence does explain that humans can get vitamin C from fruits, it doesn't provide an example of a specific fruit that contains vitamin C. Choice C is incorrect. The sentence explains why humans must get vitamin C from foods; it doesn't provide an example of a fruit that contains vitamin C. Choice D is incorrect. The sentence compares vitamin C production in animals with vitamin C production in humans; it doesn't provide an example of a fruit that contains vitamin C.

---

**Q3**

**C**

C. however,

---

Choice C is the best answer. "However" logically signals that the information in this sentence—that Hammurabi is mainly remembered for just a single achievement, the Code of Hammurabi—is contrary to what might be assumed from the previous information about Hammurabi's many achievements.

Choice A is incorrect because "therefore" illogically signals that the information in this sentence is a result of the previous information about Hammurabi's many achievements. Instead, this sentence makes a point that is contrary to what might be assumed from the previous information. Choice B is incorrect because "likewise" illogically signals that the information in this sentence is similar to the previous information about Hammurabi's many achievements. Instead, this sentence makes a point that is contrary to what might be assumed from the previous information. Choice D is incorrect because "for instance" illogically signals that this sentence exemplifies the previous information about Hammurabi's many achievements. Instead, this sentence makes a point that is contrary to what might be assumed from the previous information.

---

**Q4**

**D**

- D. The 1965 Hart-Celler Act abolished the national-origins quota system, which favored immigrants from northern Europe.
- 

Choice D is the best answer. The sentence presents the significance of the Hart-Celler Act to an audience unfamiliar with the history of US immigration, noting that the 1965 act abolished the national-origins quota system and explaining why that mattered, historically: because the old quota system had favored immigrants from northern Europe.

Choice A is incorrect. The sentence describes an aspect of immigration policy at the time the Hart-Celler Act was proposed; it doesn't present the significance of the Hart-Celler Act to an audience unfamiliar with the history of US immigration. Choice B is incorrect. The sentence describes an aspect of immigration policy before the Hart-Celler Act; it doesn't describe or present the significance of the act to an audience unfamiliar with the history of US immigration. Choice C is incorrect. While the sentence indicates that the Hart-Celler Act abolished the old quota system, it doesn't explain the act or the quota system to an audience unfamiliar with the history of US immigration.

---

**Q5**

**C**

C. on the other hand,

---

Choice C is the best answer. "On the other hand" logically signals that the information in the sentence—that the snowpack at higher elevations in the Chuska Mountains was deepest in mid-March—contrasts with the previous information about the snowpack at lower elevations being deepest in early March.

Choice A is incorrect because "in other words" illogically signals that information in the sentence is merely a paraphrase or restatement of the previous information about the snowpack at lower elevations. Instead, the information about the snowpack at higher elevations contrasts with that information. Choice B is incorrect because "for instance" illogically signals that the information in the sentence exemplifies the previous information about the snowpack at lower elevations. Instead, the information about the snowpack at higher elevations contrasts with that information. Choice D is incorrect because "in summary" illogically signals that the information in the sentence summarizes the previous information about the snowpack at lower elevations. Instead, the information about the snowpack at higher elevations contrasts with that information.

---

**Q6**

**D**

D. While still highly effective, the new platinum catalyst requires far less of the rare and expensive metal than do other platinum catalysts.

---

Choice D is the best answer. The sentence explains an advantage of Tang and his colleagues' platinum catalyst, noting that it requires far less platinum (which is rare and expensive) than other platinum catalysts do.

Choice A is incorrect. The sentence describes the platinum catalyst that Tang and his colleagues created; it doesn't explain an advantage of their platinum catalyst. Choice B is incorrect. The sentence emphasizes a similarity between the new platinum catalyst and other platinum catalysts; it doesn't explain an advantage of the new platinum catalyst. Choice C is incorrect. The sentence connects the metal platinum to the functioning of platinum catalysts, noting that large amounts of platinum are typically required for platinum catalysts to be effective; it doesn't explain an advantage of Tang and his colleagues' platinum catalyst.

---

**Q7**

**D**

D. though,

---

Choice D is the best answer. "Though" logically signals that the information in this sentence—that volcanologists can distinguish the two volcanoes by how they were formed—presents a qualification or exception to the previous statement that the volcanoes look similar. The volcanoes are actually of two different types.

Choice A is incorrect because "for example" illogically signals that the information in this sentence exemplifies the previous information about the volcanoes looking similar. Instead, the sentence presents a qualification to that apparent similarity—the volcanoes are actually of two different types. Choice B is incorrect because "in addition" illogically signals that the information in this sentence merely adds to the previous information about the volcanoes looking similar. Instead, the sentence presents a qualification to that apparent similarity—the volcanoes are actually of two different types. Choice C is incorrect because "therefore" illogically signals that the information in this sentence is a result of the previous information about the volcanoes looking similar. Instead, the sentence presents a qualification to that apparent similarity—the volcanoes are actually of two different types.

---

**Q8**

**A**

A. The municipality of Tecozautla in Hidalgo, Mexico, covers an area of roughly 535 km<sup>2</sup>km squared.

---

Choice A is the best answer. The sentence emphasizes the size of Tecozautla, noting that it covers an area of roughly 535 km<sup>2</sup>km squared.

Choice B is incorrect. The sentence gives an example of a public service that municipalities provide; it doesn't emphasize the size of Tecozautla. Choice C is incorrect. While the sentence provides information about Tecozautla, it doesn't emphasize Tecozautla's size. Choice D is incorrect. While the sentence provides information about Tecozautla, it doesn't emphasize Tecozautla's size.

**Q9****A**

A. Hence,

---

Choice A is the best answer. “Hence” logically signals that the information in this sentence—that geologists couldn’t confirm the theory of cyclical Ice Ages until the 1960s—is a consequence of the previous information about the destructiveness of each Ice Age and the erasure of necessary geological evidence.

Choice B is incorrect because “moreover” illogically signals that the information in this sentence is merely additional to the previous information about the destructiveness of each Ice Age. Instead, the sentence identifies a specific consequence of that information. Choice C is incorrect because “nevertheless” illogically signals that the information in this sentence is true despite the previous information about the destructiveness of each Ice Age. Instead, the sentence identifies a specific consequence of that information. Choice D is incorrect because “next” illogically signals that the information in this sentence is the next step in a process. Instead, the sentence identifies a specific consequence of the previous information.

**Q10****B**

B. Greenland’s glaciers and icebergs both melt during the year, contributing to rising sea levels.

---

Choice B is the best answer. The sentence emphasizes a similarity between glaciers and icebergs in Greenland, noting that both melt and thereby contribute to rising sea levels.

Choice A is incorrect. The sentence provides information about the melting rate of icebergs in Greenland; it doesn’t emphasize a similarity between glaciers and icebergs in Greenland. Choice C is incorrect. The sentence emphasizes a difference between glaciers and icebergs in Greenland, noting that their melting rates depend on different factors; it doesn’t emphasize a similarity. Choice D is incorrect. The sentence explains the conditions under which glaciers in Greenland melt; it doesn’t emphasize a similarity between glaciers and icebergs in Greenland.

---

#### Notes

Accept equivalent forms (e.g.  $0.25 \equiv 1/4$ ). For grid-in items, decimal and fraction answers are both valid.
