10 answers · Rationale-rich · Teach from doc

Q1**B**

- B. Inspired by the sistrum played by Egyptian priestesses, *Here I Have Returned* symbolizes “women who have lifted and supported Egyptian society and culture,” according to Guirguis.

Choice B is the best answer. The sentence uses a quotation from Guirguis to explain what *Here I Have Returned* represents, noting that Guirguis said the sculpture symbolizes “women who have lifted and supported Egyptian society and culture.”

Choice A is incorrect. The sentence explains what Guirguis says she wants her work to achieve and provides an example of her work; it doesn’t use a quotation to explain what the sculpture represents. Choice C is incorrect. The sentence mentions the instrument whose shape inspired the sculpture but doesn’t use a quotation to explain what the sculpture represents. Choice D is incorrect. While the sentence does use a quotation from Guirguis, the quotation explains what she hopes her works in general achieve, not what the sculpture in particular represents.

Q2**D**

- D. While there have been only about 1,200 recorded meteorite falls, there have been over 60,000 meteorite finds.

Choice D is the best answer. The sentence contrasts the number of meteorite falls with the number of meteorite finds, noting that there have been over 60,000 meteorite finds but only about 1,200 recorded meteorite falls.

Choice A is incorrect. While the sentence explains the difference between meteorite falls and meteorite finds, it doesn’t contrast the number of meteorite falls and meteorite finds. Choice B is incorrect. The sentence indicates the two categories of meteorites found on Earth; it doesn’t contrast the number of meteorite falls and meteorite finds. Choice C is incorrect. While the sentence notes the number of recorded meteorite falls, it doesn’t contrast this with the number of meteorite finds.

Q3

D

- D. The authority to regulate US airline safety transferred from the US Commerce Department to the CAA in 1938, then from the CAA to the FAA in 1958.
-

Choice D is the best answer. The sentence specifies the order in which different government entities were given the authority to regulate US airline safety, noting that this role shifted from the US Commerce Department to the CAA in 1938, then from the CAA to the FAA in 1958.

Choice A is incorrect because it misrepresents information from the notes. The authority to regulate airline safety was transferred to the FAA in 1958, not to the US Commerce Department. Moreover, the sentence misrepresents Quesada's role as described in the notes. Choice B is incorrect. While the sentence mentions that all three entities had the authority to regulate US airline safety at different times, it doesn't specify the chronological order in which they held that authority. Choice C is incorrect. The sentence only mentions when the FAA began regulating US airline safety; it doesn't specify the order in which different government entities held that authority.

Q4

B

- B. The pineapple (*Ananas comosus*) has fifty chromosomes.
-

Choice B is the best answer. The sentence directly specifies how many chromosomes the pineapple has, as indicated in the notes: fifty.

Choice A is incorrect. While the sentence mentions the pineapple's chromosomes, it doesn't specify how many it has. Choice C is incorrect. The sentence indicates that the pineapple has more chromosomes than the melon; it doesn't specify the exact number of chromosomes the pineapple has. Choice D is incorrect. The sentence specifies how many chromosomes the melon has, not how many the pineapple has.

Q5

B

- B. To find out how many medical schools have guidelines about student social media use, Terry Kind and her team examined the student policies of 132 medical schools.
-

Choice B is the best answer. The sentence effectively emphasizes Kind's methodology: examining the student policies of 132 medical schools for guidelines about student social media use.

Choice A is incorrect. The sentence specifies how many medical schools' student policies are available online; it doesn't emphasize the study's methodology. Choice C is incorrect. The sentence emphasizes the study's results, not the study's methodology. Choice D is incorrect. The sentence emphasizes the aim of the study, not the study's methodology.

Q6

D

- D. Rai's approach substitutes a natural, plant-based substance for the hazardous chemicals that manufacturers have traditionally used.
-

Choice D is the best answer. The sentence emphasizes a difference between the two approaches to dyeing blue jeans, noting that Rai's approach uses a natural, plant-based substance in place of hazardous chemicals.

Choice A is incorrect. The sentence emphasizes a similarity between the dyes used in the two approaches, noting that the dyes contain the same ingredient; it doesn't emphasize a difference between the two approaches to dyeing blue jeans. Choice B is incorrect. The sentence explains what nanocellulose is; it doesn't emphasize a difference between the two approaches to dyeing blue jeans. Choice C is incorrect. The sentence explains the traditional approach to dyeing blue jeans; it doesn't emphasize a difference between the traditional approach and Rai's approach.

Q7

C

- C. Bharati Mukherjee's novel *The Holder of the World* centers around two women, one living in twentieth-century United States and the other in seventeenth-century India.
-

Choice C is the best answer. The sentence effectively introduces *The Holder of the World* to an audience already familiar with Mukherjee, explaining that the novel centers around two women and mentioning the author without providing any other identifying information.

Choice A is incorrect. The sentence provides a detail about Mukherjee's settings; it doesn't introduce, or even mention, the novel. Choice B is incorrect. The sentence provides introductory information about Mukherjee; it doesn't effectively introduce her novel to an audience already familiar with the author. Choice D is incorrect. The sentence provides introductory information about Mukherjee; it doesn't effectively introduce her novel to an audience already familiar with the author.

Q8

D

- D. In first-class levers, the fulcrum is located between the effort and the load, but in second-class levers, the load is located between the effort and the fulcrum.
-

Choice D is the best answer. The sentence contrasts first-class levers and second-class levers, explaining that the fulcrum in a first-class lever is between the effort and the load, whereas in a second-class lever the load is between the effort and the fulcrum.

Choice A is incorrect. The sentence defines two terms associated with levers; it doesn't contrast first-class levers and second-class levers. Choice B is incorrect. While the sentence seems to acknowledge a general difference in fulcrum and load locations between first-class and second-class levers, it does not specify what this difference is. Moreover, the sentence could be read as emphasizing a similarity—that in both types of levers, the fulcrum and load are in different locations. The sentence thus fails to effectively contrast the two types of levers. Choice C is incorrect. The sentence describes a similarity between first-class and second-class levers; it doesn't contrast them.

Q9

A

- A. A study led by Arelee Estefanía Muñoz-Hernández identified a total of 74 Orchidaceae species in the temperate forests of Oaxaca, Mexico.
-

Choice A is the best answer. This choice most effectively presents the study and its findings. It opens with the study and names its lead researcher, then tells us its finding: that they identified 74 Orchidaceae species in the temperate forests of Oaxaca, Mexico.

Choice B is incorrect. This choice doesn't include the study's findings, so it fails to achieve the goal. It doesn't mention that there was a study at all. Choice C is incorrect. This choice doesn't present the study, so it fails to achieve the goal. It doesn't mention that there was a study at all.

Choice D is incorrect. This choice doesn't include the study's findings, so it fails to achieve the goal.

Q10

D

- D. Whereas the reflective metal fibers had an emissivity of just 0.02, the silicon carbide fibers absorbed large amounts of heat, resulting in an emissivity of 0.74.
-

Choice D is the best answer. The sentence uses "whereas" to contrast the emissivities of the two fibers, noting that the emissivity of the reflective metal fibers was just 0.02, far lower than that of the silicon carbide fibers (0.74).

Choice A is incorrect. The sentence emphasizes the ability of reflective metal fibers and silicon carbide fibers to emit heat; it doesn't contrast the emissivities of the two fibers. Choice B is incorrect. The sentence states a law of thermodynamics: the amount of heat a material absorbs is equal to the amount it emits. The sentence doesn't contrast the emissivity of reflective metal fibers with that of silicon carbide fibers. Choice C is incorrect. While the sentence includes a generalization about the emissivities of reflective metal fibers and silicon carbide fibers, it emphasizes Abebe's plans for their use in a garment; it doesn't contrast the emissivities of the two fibers.

Notes

Accept equivalent forms (e.g. $0.25 \equiv 1/4$). For grid-in items, decimal and fraction answers are both valid.
