Q1**B****B.** Previously,

Choice B is the best answer. “Previously” logically signals that the fused fiber theory came before Ramón y Cajal’s discovery.

Choice A is incorrect. “However” illogically signals that the fused fiber theory in this sentence contrasts with the information in the previous sentence. While this theory does contrast with Ramón y Cajal’s discovery, the previous sentence concludes by stating that his discovery went against prior assumptions about the brain. The fact that the fused fiber theory was one of those earlier assumptions makes “however” an illogical choice. Choice C is incorrect because “as a result” illogically signals that the fused fiber theory in this sentence was a result of the discovery in the previous sentence. Instead, the fused fiber theory came before Ramón y Cajal’s discovery. Choice D is incorrect because “likewise” illogically signals that the fused fiber theory in this sentence was similar to the discovery in the previous sentence. Instead, the fused fiber theory, which came before Ramón y Cajal’s discovery, was very different from it.

Q2**D**

D. Minnesota’s definition of a lake—an inland body of water of at least 10 acres—is more restrictive than Wisconsin’s, which doesn’t take size into account.

Choice D is the best answer. The sentence contrasts Minnesota’s definition of a lake with Wisconsin’s, explaining that Minnesota’s definition (which takes size into account) is more restrictive than Wisconsin’s definition (which doesn’t).

Choice A is incorrect. While the sentence notes that Wisconsin’s definition of a lake doesn’t take size into account, it doesn’t contrast Minnesota’s definition with Wisconsin’s. Choice B is incorrect. The sentence states that Wisconsin’s definition of a lake is different from Minnesota’s, but it doesn’t clarify how they differ. In other words, it doesn’t contrast Minnesota’s definition with Wisconsin’s. Choice C is incorrect. The sentence indicates how many lakes Wisconsin has according to Minnesota’s definition of a lake, but it doesn’t clarify how the states’ definitions differ. In other words, it doesn’t contrast Minnesota’s definition with Wisconsin’s.

Q3

A

A. Fittingly,

Choice A is the best answer. "Fittingly" logically signals that the naming of an unprecedented radiocarbon surge for Fusa Miyake is appropriate to the situation, since Miyake is the person who identified the surge (through her Yaku Island tree-ring analysis).

Choice B is incorrect because "similarly" illogically signals that the information in this sentence is similar to the previous information about Miyake's identification of a massive radiation burst through tree-ring analysis. Instead, the naming of the event for its discoverer is a fitting and appropriate outcome. Choice C is incorrect because "however" illogically signals that the information in this sentence contrasts with the previous information about Miyake's identification of a massive radiation burst through tree-ring analysis. Instead, the naming of the event for its discoverer is a fitting and appropriate outcome. Choice D is incorrect because "in other words" illogically signals that the information in this sentence is a paraphrase or restatement of the previous information about Miyake's identification of a massive radiation burst through tree-ring analysis. Instead, the naming of the event for its discoverer is a fitting and appropriate outcome.

Q4

A

A. "Guerdon," the final word of the 2008 Scripps National Spelling Bee, is of Anglo-French origin, while the following year's final word, "Laodicean," derives from ancient Greek.

Choice A is the best answer. Noting that "guerdon" is of Anglo-French origin and "Laodicean" is of ancient Greek origin, the sentence uses "while" to emphasize a difference in the origins of the two words.

Choice B is incorrect. While the sentence emphasizes two words used in the Scripps National Spelling Bee, it doesn't emphasize (or mention) the words' linguistic origins. Choice C is incorrect. While the sentence specifies the linguistic origin of one word used in the Scripps National Spelling Bee, it doesn't mention the other word or emphasize a difference in the two words' origins. Choice D is incorrect. While the sentence makes a generalization about words used in the Scripps National Spelling Bee, it doesn't emphasize a difference in the words' origins.

Q5

B

B. Instead,

Choice B is the best answer. “Instead” logically signals that the information about the researchers’ discovery in this sentence—that jorō spiders are gentle giants who “freeze” in place when disturbed—contradicts their initial hypothesis about the spiders’ aggressiveness described in the previous sentence.

Choice A is incorrect because “therefore” illogically signals that the discovery about jorō spiders’ gentleness is a result of the initial hypothesis about their aggressive behavior. Instead, the sentence presents information that contradicts the initial hypothesis. Choice C is incorrect because “for example” illogically signals that the discovery about jorō spiders’ gentleness exemplifies the initial hypothesis about their aggressive behavior. Instead, the sentence presents information that contradicts the initial hypothesis. Choice D is incorrect because “in other words” illogically signals that the discovery about jorō spiders’ gentleness is merely restating or rephrasing the initial hypothesis about their aggressive behavior. Instead, the sentence presents information that contradicts the initial hypothesis.

Q6

B

B. A 2021 study of the Vinland Map’s ink revealed that it contains a titanium compound not used in inks until the 1920s, indicating that the map was drawn in the twentieth century.

Choice B is the best answer. The sentence effectively presents the study and its findings, providing relevant information: a 2021 study of the Vinland Map found that the map’s ink contains a compound not used in inks until the twentieth century.

Choice A is incorrect. While the sentence introduces the study, it does not present the study’s findings. Choice C is incorrect. While the sentence mentions the study, it does not effectively present the study or its findings. Choice D is incorrect. While the sentence introduces the study, it does not present the study’s findings.

Q7

D

D. thus,

Choice D is the best answer. "Thus" logically signals that the information in this clause—that listeners can "hear" carbon levels increasing—is a result of the previous information about the audio distorting as carbon levels increase.

Choice A is incorrect because "furthermore" illogically signals that the information in this clause merely adds to the previous information about the audio distorting as carbon levels rise.

Instead, the listeners' ability to "hear" carbon levels increasing is a result of that distortion.

Choice B is incorrect because "by comparison" illogically signals that the information in this clause is being compared to the information about the audio distorting as carbon levels rise.

Instead, the listeners' ability to "hear" carbon levels increasing is a result of that distortion.

Choice C is incorrect because "for instance" illogically signals that the information in this clause is an example of how the audio distorts as carbon levels rise. Instead, the audio was distorted for the express purpose of representing ecological data; the listeners' ability to "hear" carbon levels increasing is a direct, intended result of the distortion, not merely an example of it.

Q8

C

C. The fine wool produced by Merino and Rambouillet sheep is used for apparel, whereas the thicker wool of Romney sheep is used in rugs and blankets.

Choice C is the best answer. This choice most effectively emphasizes how Romney wool differs from Merino and Rambouillet wool. It describes the difference in thickness and the difference in what they're used for.

Choice A is incorrect. This choice doesn't emphasize how Romney wool differs from Merino and Rambouillet wool. It doesn't mention Merino or Rambouillet wool at all. Choice B is incorrect. This choice doesn't emphasize how Romney wool differs from Merino and Rambouillet wool. It doesn't mention Merino or Rambouillet wool at all. Choice D is incorrect. This choice doesn't emphasize how Romney wool differs from Merino and Rambouillet wool. It doesn't mention Romney, Merino or Rambouillet wool at all.

Q9**D**

D. Accordingly,

Choice D is the best answer. "Accordingly" logically signals that the information in this sentence—that the voting members awarded Banda Cuisillos the Best Banda Album award—is in accordance with, or results from, the previous information about the voters being impressed by Banda Cuisillos's album.

Choice A is incorrect because "in contrast" illogically signals that the information in this sentence contrasts with the previous information about voting members being impressed by Banda Cuisillos's album. Instead, the voters' decision to give the group the Best Banda Album award is in accordance with, or results from, that information. Choice B is incorrect because "meanwhile" illogically signals that the information in this sentence is separate from (while occurring simultaneously with) the previous information about the voting members being impressed by Banda Cuisillos's album. Instead, the voters' decision to give the group the Best Banda Album award is in accordance with, or results from, that information. Choice C is incorrect because "nevertheless" illogically signals that the information that follows is despite the information about the voting members being impressed by Banda Cuisillos's album. Instead, the voters' decision to give the group the Best Banda Album award is in accordance with, or results from, that information.

Q10**D**

D. A physics study designed to detect and analyze gravitational waves, LIGO uses a pair of massive interferometers that are thousands of miles apart.

Choice D is the best answer. The sentence effectively presents the LIGO study's aim, noting that it is designed to detect and analyze gravitational waves, and its methodology (it uses two interferometers to detect the waves).

Choice A is incorrect. The sentence describes a finding from the LIGO study; it doesn't effectively present the study's aim or its methodology. Choice B is incorrect. The sentence provides background information about the LIGO study's timeline; it doesn't effectively present the study's aim or its methodology. Choice C is incorrect. The sentence touches on LIGO's methodology, noting that it uses two interferometers, but doesn't indicate what the study's aims are.

Notes

Accept equivalent forms (e.g. $0.25 \equiv 1/4$). For grid-in items, decimal and fraction answers are both valid.
