Q1**D****D. Specifically,**

Choice D is the best answer. "Specifically" logically signals that the information in this sentence—that the Local Bubble's expansion trapped clouds of gas and dust that formed new stars—provides specific, precise details elaborating on the more general information in the previous sentence about the relationship between the Local Bubble's expansion and the formation of new stars.

Choice A is incorrect because "hence" illogically signals that the information in this sentence is a result of the information in the previous sentence about the relationship between the Local Bubble's expansion and the formation of new stars. Instead, this sentence provides specific, precise details elaborating on that information. Choice B is incorrect because "however" illogically signals that the information in this sentence contrasts with the information in the previous sentence about the relationship between the Local Bubble's expansion and the formation of new stars. Instead, this sentence provides specific, precise details elaborating on that information. Choice C is incorrect because "admittedly" illogically signals that the information in this sentence provides an exception or caveat to the previous information about the relationship between the Local Bubble's expansion and the formation of new stars. Instead, this sentence provides specific, precise details elaborating on that information.

Q2

C

- C. The Mayflower Compact was created to establish a common government among the pilgrims that immigrated to Plymouth Colony.
-

Choice C is the best answer. The sentence specifies the reason the Mayflower Compact was created, noting that it was created to establish a common government among the pilgrims that immigrated to Plymouth Colony.

Choice A is incorrect. While the sentence provides background information about the Mayflower Compact and notes the signatories' goal for the colony, it doesn't specify why the compact was created. Choice B is incorrect. While the sentence provides background information about the Mayflower Compact and notes the signatories' goal for the colony, it doesn't specify why the compact was created. Choice D is incorrect. The sentence specifies the number of pilgrims that signed the Mayflower Compact; it doesn't specify the reason the compact was created.

Q3

A

- A. Therefore,
-

Choice A is the best answer. "Therefore" logically signals that the action described in this sentence—the researchers theorizing that the dish was named for its effect on diners—is a result or consequence of the previous observation that the dish had a calming effect.

Choice B is incorrect because "alternately" illogically signals that the action described in this sentence offers an alternative or contrast to the previous observation that the dish had a calming effect. Instead, the action is a result or consequence of that observation. Choice C is incorrect because "nevertheless" illogically signals that the action described in this sentence occurs despite the previous observation that the dish had a calming effect. Instead, the action is a result or consequence of that observation. Choice D is incorrect because "likewise" illogically signals that this sentence merely adds a second, similar detail to the previous observation that the dish had a calming effect. Instead, this sentence describes an action that is a result or consequence of that observation.

Q4

B

- B. When expanded, Adnan's 1993 leporello *December from My Window* reveals a panoramic landscape painted in ink and watercolor.
-

Choice B is the best answer. This choice describes Adnan's *December from My Window* in a way that assumes the audience is already familiar with leporellos and focuses on the specific features of the work—its content and medium.

Choice A is incorrect. This choice isn't suited for an audience already familiar with leporellos. A familiar audience wouldn't need to have the term defined or explained. Choice C is incorrect. This choice doesn't describe Adnan's *December from My Window*. It mentions the year and the type of work but not the content or the medium. In addition, it provides a simple definition of leporellos, making this an inappropriate choice for an audience already familiar with leporellos. Choice D is incorrect. This choice isn't suited for an audience already familiar with leporellos. A familiar audience wouldn't need to have the term defined.

Q5

D

- D. Specifically,
-

Choice D is the best answer. "Specifically" logically signals that the information in this sentence—Latimer making the light bulb more durable—provides a specific detail elaborating on the more general claim in the previous sentence that Latimer improved the light bulb.

Choice A is incorrect because "soon" illogically signals that the information in this sentence occurred shortly after Latimer improved the light bulb. Instead, Latimer making the bulb more durable was the specific improvement. Choice B is incorrect because "regardless" illogically signals that the information in this sentence is true despite the previous claim about Latimer. Instead, the information about Latimer making the bulb more durable provides a specific detail elaborating on that claim. Choice C is incorrect because "however" illogically signals that the information in this sentence contrasts with the previous claim about Latimer. Instead, the information about Latimer making the bulb more durable provides a specific detail elaborating on that claim.

Q6

D

- D. In a 2021 study, Chinsamy-Turan determined that pterosaur jawbones located in the Sahara Desert had few growth lines relative to the bones of fully grown pterosaurs and thus belonged to juveniles.
-

Choice D is the best answer. The sentence presents both the study and its findings, noting the study's date and the researcher's name as well as describing what the researcher determined about the jawbones and how she determined it.

Choice A is incorrect. While the sentence describes the study and the researcher's initial assessment, it doesn't present the study's findings. Choice B is incorrect. While the sentence describes the study and its focus, it doesn't present the study's findings or the name of the researcher who conducted it. Choice C is incorrect. While the sentence mentions the study's methodology and provides information about pterosaurs, it doesn't present the study's findings.

Q7

B

- B. As a result,
-

Choice B is the best answer. "As a result" indicates that water molecules maintaining their linked structure at high pressures is caused by the strengthening of these water molecules by trimethylamine N-oxide. So the transition "as a result" fits the context perfectly.

Choice A is incorrect. This choice uses a disagreement transition. But this sentence doesn't disagree with the previous one—rather, it's describing an effect of the phenomenon described in the previous sentence. Choice C is incorrect. This choice uses a disagreement transition. But this sentence doesn't disagree with the previous one; it actually expands on the previous sentence by describing an effect of the strengthened molecules. Choice D is incorrect. This choice uses an exemplification transition, which doesn't make sense here. The second sentence doesn't provide an example or instance of the idea in the previous sentence. Instead, it explores the effects of the previous idea in more depth.

Q8

B

- B. A 2017 study found that *Gygis alba* eggs had an average length of 4.46 cm, whereas *Gavia stellata* eggs were longer, with an average length of 7.22 cm.
-

Choice B is the best answer. The sentence emphasizes a difference between the eggs of the two species, directly contrasting the shorter average length of *Gygis alba* eggs (4.46 cm) with the longer average length of *Gavia stellata* eggs (7.22 cm).

Choice A is incorrect. While the sentence mentions both bird species, it doesn't emphasize a difference between their eggs. Choice C is incorrect. While the sentence provides information about the two bird species, it doesn't emphasize a difference between their eggs. Choice D is incorrect. While the sentence provides the average lengths of both species' eggs, it doesn't explicitly emphasize the difference between them.

Q9

D

- D. In addition,
-

Choice D is the best answer. "In addition" logically signals that the information in this sentence—that the Twentieth Amendment requires newly elected US senators and representatives to be sworn in on January 3—is separate from and additional to the amendment's mandate concerning presidential inaugurations.

Choice A is incorrect because "instead" illogically signals that the information in the sentence presents an alternative to or substitute for the Twentieth Amendment's mandate concerning presidential inaugurations. Rather, the sentence presents a separate requirement in addition to that one. Choice B is incorrect because "for instance" illogically signals that the information in the sentence exemplifies the Twentieth Amendment's mandate concerning presidential inaugurations. Instead, the sentence presents a separate requirement in addition to that one. Choice C is incorrect because "specifically" illogically signals that the sentence provides specific, precise details elaborating on the Twentieth Amendment's mandate concerning presidential inaugurations. Instead, the sentence presents a separate requirement in addition to that one.

Q10

B

- B. The water in brine pools is toxic to most sea life because it is three to eight times saltier than the surrounding ocean.
-

Choice B is the best answer. The sentence explains why brine pools are toxic to most sea life, noting that the water in the pools is three to eight times saltier than the surrounding ocean.

Choice A is incorrect. While the sentence states that brine pools are toxic to most sea life, it doesn't explain why the pools are toxic. Choice C is incorrect. While the sentence states that brine pools are toxic to most sea life, it doesn't explain why the pools are toxic. Choice D is incorrect because the sentence describes brine pools, mentioning that they are salty, but doesn't explain why they are toxic to most sea life.

Notes

Accept equivalent forms (e.g. $0.25 \equiv 1/4$). For grid-in items, decimal and fraction answers are both valid.
