Q1

A

- A. the South Side Writers Group provided a valuable forum for Chicago writers to share ideas;

Choice A is the best answer. The convention being tested is subject-modifier placement. This choice makes the noun phrase “the South Side Writers Group” the subject of the sentence and places it immediately after the modifying phrase “established in 1936 by African American novelist Richard Wright.” In doing so, this choice clearly indicates that the South Side Writers Group—and not another noun in the sentence—was established in 1936 by Richard Wright.

Choice B is incorrect because it results in a dangling modifier. The placement of the noun phrase “Chicago writers” immediately after the modifying phrase illogically suggests that the Chicago writers were established in 1936 by Richard Wright. Choice C is incorrect because it results in a dangling modifier. The placement of the noun phrase “writers” immediately after the modifying phrase illogically suggests that the writers were established in 1936 by Richard Wright. Choice D is incorrect because it results in a dangling modifier. The placement of the noun phrase “Chicago” immediately after the modifying phrase illogically suggests that Chicago was established in 1936 by Richard Wright.

Q2**C**

C. ones; even so,

Choice C is the best answer. The convention being tested is the coordination of main clauses within a sentence. This choice uses a semicolon in a conventional way to join the first main clause (“It is...ones”) and the second main clause (“even so...needs”). Furthermore, the placement of the semicolon after “ones” indicates that the supplementary phrase “even so” modifies the following clause (“the reawakening...needs”), resulting in the most logical and grammatically complete sentence. With this punctuation, the sentence logically indicates that the recent interest in an old technology like steam engines is despite the fact that technological change typically seeks out new technologies.

Choice A is incorrect because it results in a confusing and illogical sentence. Placing the semicolon after “so” indicates that the supplementary element “even so” modifies the first clause of the sentence, which doesn’t make sense in this context. Choice B is incorrect because it results in a run-on sentence. It fails to mark the boundary between the two main clauses with appropriate punctuation. Choice D is incorrect because it results in a comma splice. Without a conjunction following it, a comma can’t be used in this way to join the two main clauses of the sentence.

Q3**A**

A. bounds helped

Choice A is the best answer. The convention being tested is finite verb use in a main clause. A main clause requires a finite verb to perform the action of the subject (in this case, Ashford’s “gestures” and “habit”), and this choice supplies the finite past tense verb “helped” to indicate what Ashford’s gestures and habit helped accomplish.

Choice B is incorrect because the non-finite participle “helping” doesn’t supply the main clause with a finite verb. Choice C is incorrect because the relative clause “that helped” doesn’t supply the main clause with a finite verb. Choice D is incorrect because the non-finite to-infinitive “to help” doesn’t supply the main clause with a finite verb.

Q4

C

C. falsework,

Choice C is the best answer. The convention being tested is the use of punctuation within a sentence. The comma after "falsework" pairs with the comma after "supports" to separate the supplementary element "a construction system known as falsework" from the rest of the sentence. This supplementary element functions to clarify the term "these temporary supports," and the pair of commas indicates that this element could be removed without affecting the grammatical coherence of the sentence.

Choice A is incorrect because a semicolon can't be paired with a comma in this way to separate the supplementary element from the rest of the sentence. Choice B is incorrect because it fails to use appropriate punctuation to separate the supplemental element from the rest of the sentence. Choice D is incorrect because a colon can't be paired with a comma in this way to separate the supplementary element from the rest of the sentence.

Q5

C

C. characterized

Choice C is the best answer. The convention being tested is the use of verb forms within a sentence. The nonfinite past participle "characterized" is correctly used within a supplementary element that modifies the main clause "Zhang...*shanshui*," defining *qinglǔ shanshui* and explaining some of its identifying traits.

Choice A is incorrect because it results in a comma splice. Using the finite present perfect tense verb "has been characterized" creates a second main clause in the sentence, and the two main clauses can't be joined in this way by only the comma before "a type." Choice B is incorrect because it results in a comma splice. Using the finite future tense verb "will be characterized" creates a second main clause in the sentence, and the two main clauses can't be joined in this way by only the comma before "a type." Choice D is incorrect because it results in a comma splice. Using the finite present tense verb "is characterized" creates a second main clause in the sentence, and the two main clauses can't be joined in this way by only the comma before "a type."

Q6

D

D. walls. With

Choice D is the best answer. The convention being tested is punctuation use between sentences. In this choice, the period after “walls” is used correctly to mark the boundary between the first sentence (“In...walls”) and the second sentence (“With...techniques”), which starts with a supplementary phrase.

Choice A is incorrect because it results in a comma splice. A comma can’t be used in this way to mark the boundary between sentences. Choice B is incorrect because it results in a run-on sentence. The sentences (“In...walls” and “with...paintings”) are fused without punctuation and/or a conjunction. Choice C is incorrect. Without a comma preceding it, the conjunction “so” can’t be used in this way to join sentences.

Q7

D

D. the Alaska Centennial Commission sponsored a contest that would award \$300 to an individual who came

Choice D is the best answer. The convention being tested is subject-modifier placement. This choice makes the noun phrase “the Alaska Centennial Commission” the subject of the sentence and places it immediately after the modifying phrase “wanting...Purchase.” In doing so, this choice clearly establishes that the Alaska Centennial Commission—and not another noun in the sentence—wanted to celebrate the 100th anniversary of the Alaska Purchase.

Choice A is incorrect because it results in a dangling modifier. The placement of the noun phrase “a contest” immediately after the modifying phrase illogically suggests that the contest wanted to celebrate the 100th anniversary of the Alaska Purchase. Choice B is incorrect because it results in a dangling modifier. The placement of the noun phrase “an award of \$300” immediately after the modifying phrase illogically suggests that the award of \$300 wanted to celebrate the 100th anniversary of the Alaska Purchase. Choice C is incorrect because it results in a dangling modifier. The placement of the noun phrase “\$300” immediately after the modifying phrase illogically suggests that the \$300 wanted to celebrate the 100th anniversary of the Alaska Purchase.

Q8

D

D. *Nutcracker*. According

Choice D is the best answer. The convention being tested is punctuation use between sentences. In this choice, the period is used correctly to mark the boundary between one sentence (“In 2017...*Nutcracker*”) and another (“According...culture”). The supplementary element “according to reviewers” modifies the main clause of the second sentence (“the Toledos’...culture”).

Choice A is incorrect because it results in a run-on sentence. The sentences are fused without punctuation and/or a conjunction. Furthermore, no punctuation is needed within the supplementary element “according to reviewers.” Choice B is incorrect because it results in a comma splice. A comma can’t be used in this way to mark the boundary between sentences. Choice C is incorrect because it results in a run-on sentence. The sentences are fused without punctuation and/or a conjunction.

Q9

D

D. Rawles

Choice D is the best answer. The convention being tested is punctuation between a subject and a verb. When, as in this case, a subject (“Calida Garcia Rawles”) is immediately followed by a verb (“was”), no punctuation is needed.

Choice A is incorrect because no punctuation is needed between the subject and the verb. Choice B is incorrect because no punctuation is needed between the subject and the verb. Choice C is incorrect because no punctuation is needed between the subject and the verb.

Q10

B

B. sampler;

Choice B is the best answer. The convention being tested is the coordination of main clauses within a sentence. This choice uses a semicolon in a conventional way to join the first main clause (“In 2004...sampler”) and the second main clause (“in 2014...pillars”).

Choice A is incorrect because it results in a comma splice. Without a conjunction following it, a comma can’t be used in this way to join two main clauses. The word “later” is an adverb and cannot be used to join two main clauses unless it is preceded by a conjunction. Choice C is incorrect because it results in a comma splice. Without a conjunction following it, a comma can’t be used in this way to join two main clauses. Choice D is incorrect because it results in a comma splice. Without a conjunction following it, a comma can’t be used in this way to join two main clauses. The word “later” is an adverb and cannot be used to join two main clauses unless it is preceded by a conjunction.

Notes

Accept equivalent forms (e.g. $0.25 \equiv 1/4$). For grid-in items, decimal and fraction answers are both valid.
