Q1

B

B. are

Choice B is the best answer. The convention being tested is subject-verb agreement. The plural verb "are" agrees in number with the plural compound subject "the trefoil knot and the figure-eight knot." The two types of knots joined by "and" function as a plural subject and thus require a plural verb.

Choice A is incorrect because the singular verb "was" doesn't agree in number with the plural compound subject "the trefoil knot and the figure-eight knot." Choice C is incorrect because the singular verb "has been" doesn't agree in number with the plural compound subject "the trefoil knot and the figure-eight knot." Choice D is incorrect because the singular verb "is" doesn't agree in number with the plural compound subject "the trefoil knot and the figure-eight knot."

Q2

D

D. waterways and the fact that

Choice D is the best answer. The convention being tested is punctuation within two coordinated noun phrases. When, as in this case, a noun phrase ("the country's millions of miles of waterways") is coordinated with another noun phrase ("the fact") followed by an integrated relative clause ("that the volume...time"), no punctuation is needed.

Choice A is incorrect because no punctuation is needed. Choice B is incorrect because no punctuation is needed. Choice C is incorrect because no punctuation is needed.

**Q3**

**A**

A. has entered

---

Choice A is the best answer. The convention being tested is subject-verb agreement. The singular verb "has entered" agrees in number with the singular subject "an abstract cubist painting."

Choice B is incorrect because the plural verb "have entered" doesn't agree in number with the singular subject "an abstract cubist painting." Choice C is incorrect because the plural verb "were entering" doesn't agree in number with the singular subject "an abstract cubist painting." Choice D is incorrect because the plural verb "enter" doesn't agree in number with the singular subject "an abstract cubist painting."

---

**Q4**

**B**

B. cooperation—this

---

Choice B is the best answer. The convention being tested is the use of punctuation within a sentence. This choice correctly uses a dash after "cooperation" to pair with the dash after "that" to separate the supplementary element "assuming solar panel installers' cooperation" from the rest of the sentence.

Choice A is incorrect because a comma can't be paired with a dash in this way to separate the supplementary element from the rest of the sentence. Choice C is incorrect because a colon can't be paired with a dash in this way to separate the supplementary element from the rest of the sentence. Choice D is incorrect because it fails to use appropriate punctuation to separate the supplemental element from the rest of the sentence.

---

**Q5**

**B**

**B. to create**

Choice B is the best answer. The convention being tested is the use of verb forms within a sentence. The nonfinite to-infinitive verb “to create” is correctly used to form a subordinate clause that expresses how ArcGIS facilitates the creation of maps (by analyzing and arranging certain data).

Choice A is incorrect because it results in an ungrammatical sentence. The finite verb “create” can’t be used in this way to form a subordinate clause that expresses how ArcGIS facilitates the creation of maps. Choice C is incorrect because it results in an ungrammatical sentence. The nonfinite participle “creating” can’t be used in this way to form a subordinate clause that expresses how ArcGIS facilitates the creation of maps. Choice D is incorrect because it results in an ungrammatical sentence. The finite verb “created” can’t be used in this way to form a subordinate clause that expresses how ArcGIS facilitates the creation of maps.

**Q6**

**B**

**B. skeptical, but**

Choice B is the best answer. There are two independent clauses in the sentence, each with a subject and a verb: “many...were skeptical” and “historians have determined....” These clauses can be grammatically joined by a comma and the coordinating conjunction “but.”

Choice A is incorrect. This choice results in a run-on sentence, which occurs when two independent clauses are joined without punctuation. Two independent clauses can’t be joined by just the coordinating conjunction “but.” A comma would also be required. Choice C is incorrect. This choice creates a punctuation error called a comma splice. This sentence contains two independent clauses (“Many...were skeptical” and “historians have determined...”). A comma alone can’t join two independent clauses. That requires a comma and a coordinating conjunction. Choice D is incorrect. This choice results in a run-on sentence, which occurs when two independent clauses are joined without punctuation. This sentence contains two independent clauses (“Many...were skeptical” and “historians have determined...”), which need to be either joined by a semicolon, joined by a comma and a coordinating conjunction, or separated by a period.

**Q7****D**

D. is a smaller, foam version

---

Choice D is the best answer. The convention being tested is subject-verb agreement and agreement between nouns. The singular verb “is” and the singular noun “version” both agree in number with the relative pronoun “which.” In this context, “which” functions as a singular subject because it refers to the singular noun “the Nerf football.”

Choice A is incorrect because the plural verb “were” doesn’t agree in number with the singular noun phrase “the Nerf football” that it’s modifying. Choice B is incorrect because the plural verb “are” and the plural noun “versions” don’t agree in number with the singular noun phrase “the Nerf football” that they’re modifying. Choice C is incorrect because the plural verb “were” and the plural noun “versions” don’t agree in number with the singular noun phrase “the Nerf football” that they’re modifying.

---

**Q8****A**

A. vapor. With

---

Choice A is the best answer. The convention being tested is punctuation use between sentences. In this choice, the period is used correctly to mark the boundary between one sentence (“What...vapor”) and another (“With...point”).

Choice B is incorrect because it results in a run-on sentence. The sentences (“What...vapor” and “with...point”) are fused without punctuation and/or a conjunction. Choice C is incorrect because it results in a comma splice. A comma can’t be used in this way to mark the boundary between sentences. Choice D is incorrect. Without a comma preceding it, the conjunction “and” can’t be used in this way to join sentences.

---

**Q9**

**B**

- B. Anna Behrensmeyer demonstrated in a 2005 analysis that fossils of thin-shelled organisms
- 

Choice B is the best answer. The convention being tested is subject-modifier placement. This choice makes the noun phrase “Anna Behrensmeyer” the subject of the sentence and places it immediately after the modifying phrase “a pioneer...fossils.” In doing so, this choice clearly establishes that Anna Behrensmeyer—and not another noun in the sentence—is a pioneer in the field of taphonomy.

Choice A is incorrect because it results in a dangling modifier. The placement of the noun phrase “fossils of thin-shelled organisms” immediately after the modifying phrase illogically suggests that the “fossils” are a pioneer in the field of taphonomy. Choice C is incorrect because it results in a dangling modifier. The placement of the pronoun “it” immediately after the modifying phrase illogically suggests that “it” is a pioneer in the field of taphonomy. Choice D is incorrect because it results in a dangling modifier. The placement of the noun phrase “a 2005 analysis” immediately after the modifying phrase illogically suggests that “a 2005 analysis” is a pioneer in the field of taphonomy.

---

**Q10**

**C**

- C. paradox, and
- 

Choice C is the best answer. The convention being tested is the coordination of main clauses within a sentence. This choice correctly uses a comma and the coordinating conjunction “and” to join the first main clause (“This idea...paradox”) and the second main clause (“research...retention”).

Choice A is incorrect because it results in a comma splice. Without a conjunction following it, a comma can’t be used in this way to join two main clauses. Choice B is incorrect because it results in a run-on sentence. The two main clauses are fused without punctuation and/or a conjunction. Choice D is incorrect because when coordinating two longer main clauses such as these, it’s conventional to use a comma before the coordinating conjunction, not after it.

---

Notes

Accept equivalent forms (e.g.  $0.25 \equiv 1/4$ ). For grid-in items, decimal and fraction answers are both valid.
