Q1**D****D.** it

Choice D is the best answer. The convention being tested is pronoun–antecedent agreement. The singular pronoun “it” agrees in number with the singular antecedent “violin” and thus indicates that the traditional violin (and not its curves) was made lighter.

Choice A is incorrect because the plural pronoun “those” doesn’t agree in number with the singular antecedent “violin.” Choice B is incorrect because the singular pronoun “one” is ambiguous in this context; the resulting sentence leaves unclear what Stradivari made lighter. Choice C is incorrect because the plural pronoun “them” doesn’t agree in number with the singular antecedent “violin.”

Q2**C****C.** work. That

Choice C is the best answer. The convention being tested is punctuation use between sentences. In this choice, the period is used correctly to mark the boundary between one sentence (“For... work”) and another (“That...parchment”).

Choice A is incorrect because it results in a comma splice. A comma can’t be used in this way to mark the boundary between sentences. Choice B is incorrect because it results in a run-on sentence. The sentences (“For...work” and “that...parchment”) are fused without punctuation and/or a conjunction. Choice D is incorrect. Without a comma preceding it, the conjunction “and” can’t be used in this way to join sentences.

Q3

C

C. earning

Choice C is the best answer. The word "earning" is being used to introduce an additional modifying phrase, which describes how Fairuz's repertoire lent her cross-generational appeal. When a verb ends in -ing and doesn't have a helper verb like "is" before it, it can be used to modify a noun or verb. This is appropriate here.

Choice A is incorrect. The underlined verb is being used to introduce additional descriptive information, which is set off from the rest of the sentence by a comma. Because there is no subject here, a finite form of the verb (like "earned") creates an error. We need another form of the verb that doesn't require a subject and can introduce descriptive information. Choice B is incorrect. The underlined verb is being used to introduce additional descriptive information, which is set off from the rest of the sentence by a comma. Because there is no subject here, a finite form of the verb (like "had earned") creates an error. We need another form of the verb that doesn't require a subject and can introduce descriptive information. Choice D is incorrect. The underlined verb is being used to introduce additional descriptive information, which is set off from the rest of the sentence by a comma. Because there is no subject here, a finite form of the verb (like "earn") creates an error. We need another form of the verb that doesn't require a subject and can introduce descriptive information.

Q4

A

A. stratigraphy—the

Choice A is the best answer. The convention being tested is the use of punctuation within a sentence. The dash after "stratigraphy" pairs with the dash after "(strata)" to separate the supplementary element "the analysis of Earth's sediment layers (strata)" from the rest of the sentence. This supplementary element functions to define the term "stratigraphy," and the pair of dashes indicates that this element could be removed without affecting the grammatical coherence of the sentence.

Choice B is incorrect because a parenthesis can't be paired with a dash in this way to separate the supplementary element from the rest of the sentence. Choice C is incorrect because a colon can't be paired with a dash in this way to separate the supplementary element from the rest of the sentence. Choice D is incorrect because a comma can't be paired with a dash in this way to separate the supplementary element from the rest of the sentence.

Q5

A

A. poems putatively written by the novel's

Choice A is the best answer. Nothing belongs to the "poems" in the sentence, so it should not be possessive—just a simple plural noun. The protagonist does belong to the novel—it's the protagonist of the novel—so "novel" needs to be a singular possessive noun.

Choice B is incorrect. This doesn't complete the text in a way that conforms to the conventions of Standard English. This choice uses the singular possessive "poem's," but the text indicates that it should be the simple plural "poems": there is more than one poem, and nothing belongs to the poems. Choice C is incorrect. This doesn't complete the text in a way that conforms to the conventions of Standard English. This choice uses the singular possessive "poem's," but the text indicates that it should be the simple plural "poems": there is more than one poem, and nothing belongs to the poems. This choice also uses the plural possessive "novels'," which is incorrect because there is only one novel. Choice D is incorrect. This doesn't complete the text in a way that conforms to the conventions of Standard English. This choice uses the plural possessive "novels'," which is incorrect because there is only one novel, so it should be the singular possessive "novel's."

Q6

D

D. added whenever

Choice D is the best answer. The convention being tested is punctuation between a verb and a preposition. When, as in this case, a verb (“is added”) is immediately followed by a preposition (“whenever”), no punctuation is needed.

Choice A is incorrect because no punctuation is needed between the verb and the preposition.

Choice B is incorrect because no punctuation is needed between the verb and the preposition.

Choice C is incorrect because no punctuation is needed between the verb and the preposition.

Q7

C

C. powers

Choice C is the best answer. The convention being tested is subject-verb agreement. The singular verb "powers" agrees in number with the singular subject "an artificial intelligence."

Choice A is incorrect because the plural verb "have been powering" doesn't agree in number with the singular subject "an artificial intelligence." Choice B is incorrect because the plural verb "power" doesn't agree in number with the singular subject "an artificial intelligence." Choice D is incorrect because the plural verb "are powering" doesn't agree in number with the singular subject "an artificial intelligence."

Q8

D

D. cephalopods—ocean dwellers that include the squid, the octopus, and the cuttlefish—

Choice D is the best answer. The convention being tested is the punctuation of a supplementary element within a sentence. In this choice, the dash after "cephalopods" pairs with the dash after "cuttlefish" to clearly separate the supplementary element "ocean dwellers that include the squid, the octopus, and the cuttlefish" from the rest of the sentence. This supplementary element functions to explain what cephalopods are, and the pair of dashes indicates that this element could be removed without affecting the grammatical coherence of the sentence.

Choice A is incorrect because it fails to use appropriate punctuation to separate the supplementary element that explains what cephalopods are from the rest of the sentence.

Choice B is incorrect because it fails to use appropriate punctuation to separate the supplementary element that explains what cephalopods are from the rest of the sentence.

Choice C is incorrect because it fails to use appropriate punctuation to separate the supplementary element that explains what cephalopods are from the rest of the sentence.

Q9

A

A. was

Choice A is the best answer. The convention being tested here is subject-verb agreement. The singular verb "was" agrees in number with the singular subject "Josephine St. Pierre Ruffin."

Choice B is incorrect because the plural verb "were" doesn't agree in number with the singular subject "Josephine St. Pierre Ruffin." Choice C is incorrect because the plural verb "are" doesn't agree in number with the singular subject "Josephine St. Pierre Ruffin." Choice D is incorrect because the plural verb "have been" doesn't agree in number with the singular subject "Josephine St. Pierre Ruffin."

Q10

D

D. 1680, and

Choice D is the best answer. The convention being tested is the coordination of main clauses within a sentence. This choice correctly uses a comma and the coordinating conjunction “and” to join the first main clause (“He...1680”) and the second main clause (“as...time”).

Choice A is incorrect because it results in a run-on sentence. The two main clauses are fused without punctuation and/or a conjunction. Choice B is incorrect because when coordinating two longer main clauses such as these, it’s conventional to use a comma before the coordinating conjunction. Choice C is incorrect because it results in a comma splice. Without a conjunction following it, a comma can’t be used in this way to join two main clauses.

Notes

Accept equivalent forms (e.g. $0.25 \equiv 1/4$). For grid-in items, decimal and fraction answers are both valid.
