Q1**A**

A. researcher Robert Losey has argued that domestication

Choice A is the best answer. The convention being tested is subject-modifier placement. This choice makes the noun phrase “researcher Robert Losey” the subject of the sentence and places it immediately after the modifying phrase “since...Siberia.” In doing so, this choice clearly establishes that researcher Robert Losey—and not another noun in the sentence—is who uncovered fragments of a 2,000-year-old reindeer training harness in northern Siberia.

Choice B is incorrect because it results in a dangling modifier. The placement of the noun phrase “researcher Robert Losey’s argument” immediately after the modifying phrase illogically suggests that the “argument” is what uncovered fragments of a 2,000-year-old reindeer training harness in northern Siberia. Choice C is incorrect because it results in a dangling modifier. The placement of the noun “domestication” immediately after the modifying phrase illogically suggests that “domestication” is what uncovered fragments of a 2,000-year-old reindeer training harness in northern Siberia. Choice D is incorrect because it results in a dangling modifier. The placement of the noun phrase “the argument” immediately after the modifying phrase illogically suggests that the “argument” is what uncovered fragments of a 2,000-year-old reindeer training harness in northern Siberia.

Q2

D

D. carbon-13 (^{13}C),

Choice D is the best answer. The convention being tested is the punctuation of a supplementary element within a sentence. The comma after “(^{13}C)” pairs with the comma after “isotope” to separate the supplementary element “carbon-13 (^{13}C)” from the rest of the sentence. This supplementary element defines the “rare carbon isotope,” and the pair of commas indicates that this element could be removed without affecting the grammatical coherence of the sentence.

Choice A is incorrect because it fails to use appropriate punctuation to separate the supplementary element “carbon-13 (^{13}C)” from the rest of the sentence. Choice B is incorrect because it fails to use appropriate punctuation to separate the supplementary element “carbon-13 (^{13}C)” from the rest of the sentence. Choice C is incorrect because it fails to use appropriate punctuation to separate the supplementary element “carbon-13 (^{13}C)” from the rest of the sentence. The comma after “carbon-13” isn’t necessary because the parentheses around “ ^{13}C ” already separate this element from the rest of the sentence.

Q3

B

B. the titles allow the listener to approach each piece free from expectations.

Choice B is the best answer. The convention being tested is subject-modifier placement. This choice makes the noun phrase “the titles” the subject of the sentence and places it immediately after the modifying phrases “laden with emojis and seemingly meaningless words, and driven largely by Sawano’s ‘personal feeling and mood.’” In doing so, this choice clearly establishes that the titles—and not another noun in the sentence—are being described as laden with emojis and driven by Sawano’s personal feeling.

Choice A is incorrect because it results in a dangling modifier. The placement of “the listener” immediately after the modifying phrases illogically suggests that the listener, rather than the titles, is laden with emojis and driven by Sawano’s personal feeling. Choice C is incorrect because it results in a dangling modifier. The placement of “each piece” (i.e., musical score) immediately after the modifying phrases illogically suggests that the pieces, rather than the titles of the pieces, are laden with emojis and driven by Sawano’s personal feeling. Choice D is incorrect because it results in a dangling modifier. The placement of “the listener’s approach” immediately after the modifying phrases illogically suggests that the listener’s approach, rather than the titles, is laden with emojis and driven by Sawano’s personal feeling.

Q4

C

C. nutrients,

Choice C is the best answer. The convention being tested is the punctuation of a supplementary element within a sentence. The comma after “nutrients” pairs with the comma after “photosynthesis” to separate the supplementary element “the mechanism by which plants use sunlight to turn carbon dioxide and water into nutrients” from the rest of the sentence. This supplementary element functions to define the term “photosynthesis,” and the pair of commas indicates that this element could be removed without affecting the grammatical coherence of the sentence.

Choice A is incorrect because it fails to use appropriate punctuation to separate the supplementary element from the rest of the sentence. Choice B is incorrect because a conjunction can’t be paired with a comma in this way to separate the supplementary element from the rest of the sentence. Choice D is incorrect because a dash can’t be paired with a comma in this way to separate the supplementary element from the rest of the sentence.

Q5

D

D. leveraged

Choice D is the best answer. The subject of the verb is “Lincoln,” and the first sentence tells us that we’re talking about something that Abraham Lincoln did in 1860. So the simple past tense “leveraged” fits the logic of the text.

Choice A is incorrect. This choice creates a tense issue. “Has leveraged” is the present perfect tense, which is used for an action that began in the past and continues into the present. Lincoln started leveraging his rivals’ talents in 1860—it’s definitely not still happening today. So the present perfect tense isn’t appropriate. Choice B is incorrect. This choice creates a tense issue. “Is leveraging” is the present tense, but Lincoln leveraged his rivals’ talents in 1860, so the present tense isn’t appropriate. Choice C is incorrect. This choice creates a tense issue. “Will leverage” is the future tense, but Lincoln leveraged his rivals’ talents in 1860, so the future tense isn’t appropriate.

Q6**C**

C. adjustments. Prior

Choice C is the best answer. The convention being tested is punctuation use between sentences. In this choice, the period is used correctly to mark the boundary between the first sentence (“The...adjustments”) and the second sentence (“Prior...days”). Because the adverbial phrase beginning with “prior” indicates when changing a spreadsheet required redoing the sheet by hand, that phrase belongs with the second sentence.

Choice A is incorrect because it results in a run-on sentence. Two sentences are fused without punctuation and/or a conjunction. Choice B is incorrect because it results in a comma splice. A comma can’t be used in this way to mark the boundary between sentences. Choice D is incorrect. Without a comma preceding it, the conjunction “and” can’t be used in this way to join the sentences.

Q7**B**

B. grains’ physical properties

Choice B is the best answer. The convention being tested is the use of plural and possessive nouns. The plural possessive noun “grains’” and the plural noun “properties” correctly indicate that the simulations involved multiple snow grains and that those snow grains had several properties.

Choice A is incorrect because the context requires the plural possessive noun “grains’” and the plural noun “properties,” not the singular possessive noun “grain’s” and the plural possessive noun “properties’.” Choice C is incorrect because the context requires the plural noun “properties,” not the singular possessive noun “property’s.” Choice D is incorrect because the context requires the plural possessive noun “grains’,” not the plural noun “grains.”

Q8**C****C.** CE, making

Choice C is the best answer. The phrase “making...at the time” provides additional information about Cahokia that’s not required for the sentence to make sense or function grammatically. As a nonessential supplement, this phrase should be separated from the rest of the sentence with a comma.

Choice A is incorrect. This choice results in a run-on sentence. The nonessential descriptive aside “making...at the time” needs to be separated from the rest of the sentence with a comma. Choice B is incorrect. This choice results in a sentence fragment. “Making...at the time” doesn’t have a subject and can’t stand on its own as a sentence. Thus, it can’t be separated from the rest of the sentence with a period. Choice D is incorrect. This choice results in a punctuation error. “Making...at the time” doesn’t have a subject and can’t stand on its own as an independent clause. Since a semicolon can only link two independent clauses, using one here creates an error.

Q9**A****A.** goes

Choice A is the best answer. The convention being tested is the use of verbs to express tense in a sentence. In this choice, the present tense verb "goes" is consistent with the other present tense verbs ("appears" and "symbolizes") used to describe the tortoise in Stoppard’s play. Furthermore, it’s conventional to use the present tense when discussing a literary work.

Choice B is incorrect because the future perfect tense verb "will have gone" isn’t consistent with the other present tense verbs used to describe the tortoise in Stoppard’s play. Choice C is incorrect because the past tense verb "went" isn’t consistent with the other present tense verbs used to describe the tortoise in Stoppard’s play. Choice D is incorrect because the past perfect tense verb "had gone" isn’t consistent with the other present tense verbs used to describe the tortoise in Stoppard’s play.

Q10

C

C. Smith

Choice C is the best answer. The convention being tested is punctuation use between a subject and a verb. No punctuation is needed when, as in this case, a subject ("Her portrait of novelist Zadie Smith") is immediately followed by a main verb ("is displayed").

Choice A is incorrect because no punctuation is needed between the subject and the verb.

Choice B is incorrect because no punctuation is needed between the subject and the verb.

Choice D is incorrect because no punctuation is needed between the subject and the verb.

Notes

Accept equivalent forms (e.g. $0.25 \equiv 1/4$). For grid-in items, decimal and fraction answers are both valid.
