Q1**A**

A. in turn,

Choice A is the best answer. "In turn" logically signals that the information in the sentence—that the electrical currents create a protective barrier around Earth—is a result or consequence of the previous information about the circulation of liquid metals generating electrical currents that flow between Earth's magnetic poles.

Choice B is incorrect because "likewise" illogically signals that the information in the sentence is similar to the previous information about the circulation of liquid metals generating electrical currents that flow between Earth's magnetic poles. Instead, the new information about the electrical currents is a direct result or consequence of the previous information. Choice C is incorrect because "nevertheless" illogically signals that the information in the sentence is true despite the previous information about the circulation of liquid metals generating electrical currents that flow between Earth's magnetic poles. Instead, the new information about the electrical currents is a direct result or consequence of the previous information. Choice D is incorrect because "in reality" illogically signals that the information in the sentence contradicts the previous information about the circulation of liquid metals generating electrical currents that flow between Earth's magnetic poles. Instead, the new information about the electrical currents is a direct result or consequence of the previous information.

Q2**D**

D. Then,

Choice D is the best answer. “Then” logically signals that the event described in this sentence—carbon in phytoplankton cells being trapped in sediment after the organisms have died—occurs later in a chronological sequence than the event described in the previous sentence (phytoplankton absorbing carbon while alive).

Choice A is incorrect because “specifically” illogically signals that the information that follows provides specific, precise details elaborating on the previous information about what phytoplankton do when alive. Instead, this sentence explains what happens after phytoplankton die—a later step in the chronological sequence of events. Choice B is incorrect because “by contrast” illogically signals that the information that follows contrasts with the previous information about what phytoplankton do when alive. Instead, this sentence explains what happens after phytoplankton die—a later step in the chronological sequence of events. There is no contrast: in both life and death, phytoplankton contribute to the ocean’s carbon uptake. Choice C is incorrect because “nevertheless” illogically signals that the information that follows is in spite of the previous information about what phytoplankton do when alive. Instead, this sentence explains what happens after phytoplankton die—a later step in the chronological sequence of events. There is no contrast: in both life and death, phytoplankton contribute to the ocean’s carbon uptake.

Q3**D**

D. blend with

Choice D is the best answer. The convention being tested is punctuation between a verb and a prepositional phrase. No punctuation is needed between the verb “blend” and the prepositional phrase “with Charlie Adams’s delightfully catchy vocal melodies.” The prepositional phrase completes the idea of the sentence, explaining with what Koperqualuk’s guitar riffs blend.

Choice A is incorrect because no punctuation is needed between the verb and the prepositional phrase. Choice B is incorrect because no punctuation is needed between the verb and the prepositional phrase. Choice C is incorrect because no punctuation is needed between the verb and the prepositional phrase.

Q4

C

C. promotes

Choice C is the best answer. The subject of the sentence is “The African Games Co-production Market.” That’s one market, so it’s a singular noun, which means it needs a singular verb. “Promotes” is the only singular verb among the choices.

Choice A is incorrect. This choice creates a subject-verb agreement error. The subject “The African Games Co-production Market” is singular, but the verb “promote” is plural. Choice B is incorrect. This choice creates a subject-verb agreement error. The subject “The African Games Co-production Market” is singular, but the verb “are promoting” is plural. Choice D is incorrect. This choice creates a subject-verb agreement error. The subject “The African Games Co-production Market” is singular, but the verb “have promoted” is plural.

Q5

D

D. to tell

Choice D is the best answer. The convention being tested is the use of finite and nonfinite verb forms within a sentence. The nonfinite to-infinitive “to tell” is correctly used to form a nonfinite (infinitive) clause that explains the reason Engle uses poetry in her novel.

Choice A is incorrect because the finite present tense verb “tells” can’t be used in this way to explain the reason that Engle uses poetry in her novel. Choice B is incorrect because the finite past tense verb “told” can’t be used in this way to explain the reason that Engle uses poetry in her novel. Choice C is incorrect because the finite present progressive tense verb “is telling” can’t be used in this way to explain the reason that Engle uses poetry in her novel.

Q6

C

C. 500 to 2,000 meters below the surface

Choice C is the best answer. The table shows the depths below the ocean surface at which four species of deep-sea fish live. According to the table, the range of depths at which the southern stoplight loosejaw lives is 500–2,000 meters below the surface.

Choice A is incorrect because the table indicates that the southern stoplight loosejaw lives 500–2,000 meters below the ocean surface, not at depths more than 2,000 meters below the surface. Choice B is incorrect because the table indicates that the southern stoplight loosejaw lives 500–2,000 meters below the ocean surface, not 150–400 meters below the surface. Choice D is incorrect because the table indicates that the southern stoplight loosejaw lives 500–2,000 meters below the ocean surface, not 250–500 meters below the surface.

Q7

B

B. “We’re lucky to have a few expert gardeners living in the neighborhood. Some volunteers and I have gone to them a few times with questions, and they’ve been eager to help us and to learn more about the project.”

Choice B is the best answer. This choice shows how volunteers have been interacting with nonvolunteer neighbors and benefiting from their gardening expertise: proof of the connections enabled by the garden.

Choice A is incorrect. This volunteer describes the challenges of developing the garden, which isn’t connected to the conclusion about the garden fostering connections between volunteers and neighbors. Choice C is incorrect. While the volunteer expresses enthusiasm for the garden, they don’t mention any interactions with other people, which is what the students need to show for their conclusion. Choice D is incorrect. The respondent enjoys and takes pride in the garden, but they don’t mention interacting with neighbors or other volunteers.

Q8

D

D. inspired by

Choice D is the best answer because it most logically completes the text's discussion of Carmen Lomas Garza's artistic process. In this context, "inspired by" means influenced by or motivated by. The text refers to how, regardless of the scale of the work, Garza uses her memories of Texas and details from California to create her art. If Garza is basing her work on her direct experiences, then they play a part in her artistic process. This context thus suggests that Garza's art is inspired by the experiences of her childhood in Texas and her current life in California.

Choice A is incorrect because it wouldn't make logical sense to indicate that Garza is "complimented by"—or praised by—something inanimate such as direct experience. Choice B is incorrect because describing Garza as "uncertain about"—or unsure or doubtful of—direct experience would suggest that she had misgivings about it. If Garza were unsure of her experiences, that would suggest that she couldn't recall them, and Garza wouldn't be able to represent direct experience in her art if she were uncertain of the memories or details. Choice C is incorrect because describing Garza as "unbothered by"—or uninterested in—her experience would imply the opposite of what the text suggests about Garza's artistic process. The text indicates that Garza's art comes from memories of her childhood in Texas and details of her surroundings in California.

Q9

A

A. Tropical mountain bird species are restricted in where they can live.

Choice A is the best answer. Both texts state that tropical mountain bird species have limited ranges or habitats, although they disagree on the reason for this. Text 1 claims that temperature is the main factor that determines where these birds can live, while Text 2 claims that competition with other species is the main factor. However, both texts agree that these birds are not able to survive in many kinds of areas.

Choice B is incorrect. Neither text mentions the tools or methods that scientists use to observe these birds, either now or in the past. Choice C is incorrect. Neither text mentions anything about how these birds build their nests. Choice D is incorrect. Neither text provides any information about the genetic similarity of these birds, so we have no evidence that either author would agree with this statement.

Q10

D

D. contradicted

Choice D is the best answer because it most logically completes the text’s discussion of the initial spread of silk beyond China. In this context, “contradicted” means opposed or challenged. The text indicates that new archaeological evidence about silk use in South Asia has done something to a long-held thought about the initial spread of silk. According to the text, the new evidence reveals that people used silk in South Asia 1,000 years before the second century CE, which directly challenges the previous belief that silk first spread beyond China in the second century CE.

Choice A is incorrect because the text indicates that an archaeological finding about silk use has done something to a long-held thought about the initial spread of silk, and it wouldn’t make sense to suggest that the finding could have “investigated,” or examined, a belief; evidence can’t examine anything. Choice B is incorrect because the text indicates that an archaeological finding about silk use has done something to a long-held thought about the initial spread of silk, and it wouldn’t make sense to suggest that the finding could have “misinterpreted,” or incorrectly understood, a belief; evidence can’t try to understand anything. Choice C is incorrect. In this context, “anticipated” would mean expected or predicted. The text indicates that a new archaeological finding about silk use has done something to a long-held thought about the initial spread of silk, and a new finding can’t predict a belief that is already established.

Notes

Accept equivalent forms (e.g. $0.25 \equiv 1/4$). For grid-in items, decimal and fraction answers are both valid.
