03

Q1**B****B.** called

Choice B is the best answer. The convention being tested is punctuation use between a verb and its complement. No punctuation is needed between the verb “is called” and its complement “the chromophore.” The complement helps complete the idea of the verb—in this case, it explains what the part of a compound that determines the compound’s color is called—and any punctuation between the two results in an ungrammatical sentence.

Choice A is incorrect because no punctuation is needed between the verb and its complement. Choice C is incorrect because no punctuation is needed between the verb and its complement. Choice D is incorrect because no punctuation is needed between the verb and its complement.

Q2**D****D.** life,

Choice D is the best answer. Notice that “the sanctity of animal life” is the first item in a list of three things. We must use a comma to separate the first two items in the list, just as a comma is used to separate “the just treatment of the elderly” and “the abolition of the slave trade.”

Choice A is incorrect. This choice creates a punctuation error. Notice that “the sanctity of animal life” is the first item in a list of three things. To appropriately format the list, we need punctuation to separate each item. Choice B is incorrect. This choice creates a punctuation error. Notice that “the sanctity of animal life” is the first item in a list of three things. While semicolons are sometimes used to separate list items, this list uses commas to separate the other list items, and lists must use the same punctuation throughout. Choice C is incorrect. This choice creates a punctuation error. Notice that “the sanctity of animal life” is the first item in a list of three things. While colons can be used to introduce lists, they can’t be used to separate items within a list.

Q3

A

A. value, but

Choice A is the best answer. The convention being tested is the coordination of independent clauses within a sentence. An independent clause is a phrase containing a subject and a verb that can stand on its own as a sentence. This choice uses a comma and the coordinating conjunction “but” to join the first independent clause (“underlines...lower a book’s value”) and the second independent clause (“such markings...can be a gold mine to scholars”) to create a compound sentence.

Choice B is incorrect because it results in a run-on sentence. The two independent clauses are fused without punctuation and/or a conjunction. Choice C is incorrect because it results in a comma splice. A comma can’t be used in this way to mark the boundary between two independent clauses. Choice D is incorrect because a comma is needed to mark the boundary between two coordinated independent clauses.

Q4

B

B. do consumers actually prefer this simpler style?

Choice B is the best answer. The convention being tested is end-of-sentence punctuation. This choice correctly uses a question mark to punctuate the interrogative clause “do consumers actually prefer this simpler style,” which asks a direct question at the end of the sentence. This is the question that the researchers in the next sentence were trying to investigate.

Choice A is incorrect because the context requires an interrogative clause. The declarative clause “consumers actually do prefer this simpler style” incorrectly indicates the consumers’ preference was already known, whereas the researchers had yet to find this out. Choice C is incorrect because a period can’t be used in this way to punctuate an interrogative clause at the end of a sentence. Choice D is incorrect because a question mark can’t be used in this way to punctuate a declarative clause, such as “consumers actually do prefer this simpler style,” at the end of a sentence.

Q5

D

D. settings. She

Choice D is the best answer. It appropriately uses a period to mark the end of one independent clause ("In 2000...settings") and the start of another ("She founded...professionals").

Choice A is incorrect. This choice results in a run-on sentence error. Both the clause before the blank ("In 2000...settings") and the clause after the blank ("she...professionals") are independent clauses, so they need to be separated by punctuation. Choice B is incorrect. This choice results in a comma splice error. It incorrectly joins two independent clauses with just a comma. Linking two independent clauses with a comma also requires the use of a coordinating conjunction (like *for*, *and*, *nor*, *but*, *or*, *yet*, or *so*). Choice C is incorrect. This choice results in a run-on sentence, an error caused when two independent clauses are joined without punctuation or appropriate conjunctions. Since both the clause before the blank ("In 2000...settings") and the clause after the blank ("she...professionals") are independent, a comma would be required in addition to the coordinating conjunction "and."

Q6

C

C. popularized

Choice C is the best answer. The convention being tested is punctuation use between a verb and an object. No punctuation is needed between the verb "popularized" and its object "the use of Jamaican Creole." The object helps complete the idea of the verb—in this case, it explains what Louise Bennett popularized—and any punctuation between the two results in an ungrammatical sentence.

Choice A is incorrect because no punctuation is needed between the verb and its object. Choice B is incorrect because no punctuation is needed between the verb and its object. Choice D is incorrect because no punctuation is needed between the verb and its object.

Q7

D

D. you should choose.

Choice D is the best answer. The convention being tested is end-of-sentence punctuation. This choice correctly uses a period to punctuate a declarative sentence that ends with an indirect question ("which link you should choose.")

Choice A is incorrect. The structure requires a declarative clause that presents an indirect question about what is evaluated in click restraint, not an interrogative clause that presents a direct question, such as "which link should you choose." Choice B is incorrect. It's unconventional to use a question mark in this way to punctuate a declarative clause that presents an indirect question, such as "which link you should choose." Choice C is incorrect. The structure requires a declarative clause that presents an indirect question about what is evaluated in click restraint, not an interrogative clause that presents a direct question, such as "which link should you choose."

Q8

C

C. century, but

Choice C is the best answer. The convention being tested is the coordination of main clauses within a sentence. This choice correctly uses a comma and a coordinating conjunction ("but") to join the first main clause ("Leibniz...century") and the second main clause ("these ingenious...calculators").

Choice A is incorrect because it results in a run-on sentence. The two main clauses are fused without punctuation and/or a conjunction. Choice B is incorrect because it results in a comma splice. Without a conjunction following it, a comma can't be used in this way to join two main clauses. Choice D is incorrect because joining the two main clauses in this way with the subordinating conjunction "that" results in an ungrammatical and illogical sentence.

Q9**C****C.** from

Choice C is the best answer. The word “from” introduces a prepositional phrase that modifies the noun “pages” and provides essential information about their origin. No additional punctuation is needed after “from” in this context.

Choice A is incorrect. This choice results in a punctuation error, illogically separating the preposition “from” from the rest of the prepositional phrase with a colon. Also, a colon can only follow an independent clause, but what comes before the blank could not stand on its own as a complete sentence. Choice B is incorrect. This choice results in a punctuation error, illogically separating the preposition “from” from the rest of the prepositional phrase with a comma. Choice D is incorrect. This choice results in a punctuation error, illogically separating the preposition “from” from the rest of the prepositional phrase with a dash.

Q10**C****C.** percent. Such

Choice C is the best answer. The convention being tested is punctuation use between sentences. In this choice, the period after “percent” is used correctly to mark the boundary between one sentence (“After...percent”) and another (“Such...up”).

Choice A is incorrect because it results in a comma splice. A comma can’t be used in this way to mark the boundary between sentences. Choice B is incorrect. Without a comma preceding it, the conjunction “and” can’t be used in this way to join sentences. Choice D is incorrect because it results in a run-on sentence. The sentences (“After...percent” and “Such...up”) are fused without punctuation and/or a conjunction.

Notes

Accept equivalent forms (e.g. $0.25 \equiv 1/4$). For grid-in items, decimal and fraction answers are both valid.
