Q1**C**

- C. Requiring people to vote does not necessarily lead to election outcomes that better represent the preferences of the country as a whole.

Choice C is the best answer. Text 1 claims that mandatory voting results in elections that "better reflect the preferences of the country." Singh and Roy disagree. They claim that more voters doesn't equal more quality votes—instead, they argue that forced voting may lead to less-informed votes that "may not reflect [voters'] actual preferences."

Choice A is incorrect. Neither text mentions the population size of countries that require voting, or how that might affect election outcomes. Choice B is incorrect. Neither text discusses the effects of mandatory voting on other forms of political engagement. Choice D is incorrect. Neither text discusses the ease or difficulty of the voting process in countries that require voting.

Q2**B**

- B. As unsurprising, because scholars tend to overlook the literary value of food writing in general and of regional cookbooks in particular

Choice B is the best answer. Text 1 states that literary scholars ignore regional cookbooks most of all, even when they have historical significance and are well written. So the author of Text 1 wouldn't be surprised that scholars ignored Edna Lewis's cookbook.

Choice A is incorrect. We can't infer that this is how the author of Text 1 would regard the situation. Text 1 never suggests that scholars are dismissive of popular works in general. Instead, Text 1 says that scholars ignore food writing specifically, despite its popularity—and despite the fact that it can be historically significant and complex. Choice C is incorrect. We can't infer that this is how the author of Text 1 would regard the situation. Text 1 never suggests that elements of other genres should be kept out of cookbooks. Choice D is incorrect. We can't infer that this is how the author of Text 1 would regard the situation. Text 1 never discusses how food writing is or should be marketed.

Q3

D

- D. By noting that if the bees were truly playing, any positive feelings they may have experienced were probably quite basic
-

Choice D is the best answer. The author of Text 2 agrees with the author of Text 1 that bumblebees may engage in play and possibly experience some kind of positive emotional state. However, the author of Text 2 also qualifies this claim by stating that emotions in insects, if they do exist, are “likely very rudimentary.”

Choice A is incorrect. While Text 2 states that other studies might indicate “negative emotional states” in bees, it does not contradict the findings from the Galpayage study—that the bees might have been having fun. Choice B is incorrect. The author of Text 2 does not mention or imply that any insects, including bumblebees, are capable of experiencing complex emotional states. The author of Text 2 states that if insects do feel emotions, those emotions are “likely very rudimentary.” Choice C is incorrect. The author of Text 2 does not compare or contrast the behavior or emotions of insects and humans, and neither does the author of Text 1.

Q4

A

- A. While the author of Text 1 believes that thinking about Soyinka’s works of theater in phases is useful, the author of Text 2 views such an approach as limiting.
-

Choice A is the best answer. The author of Text 1 states that Soyinka’s progression as a playwright can be considered to fall into three periods, implying that this is a helpful way to understand his works. The author of Text 2, on the other hand, challenges this view and says that it overlooks potential commonalities and differences in Soyinka’s work across what Text 1 calls distinctive stylistic phases.

Choice B is incorrect. This choice overstates the central claim of Text 2. The author of Text 2 argues against the chronological progression supported in Text 1, but does not go so far as to say that Soyinka’s style remained consistent. In fact, Text 2 points out “significant differences in styles and content” among Soyinka’s plays. Choice C is incorrect. Neither of the texts mention Soyinka’s poetry, nor do they rank his dramatic writing relative to his other work. Choice D is incorrect. Neither text discusses the political aspects of Soyinka’s plays, nor do they make any claims about whether they have changed over time.

Q5

D

D. Many people have come to admire the story of Sybil Ludington's ride.

Choice D is the best answer. Both authors agree that Ludington's story has been widely celebrated and revered by Americans, even if they disagree on its accuracy. Text 1 states that Ludington has inspired postage stamps, statues, and TV series, and Text 2 states that many articles and books have been written about her. Thus, both authors acknowledge the popularity of Ludington's story.

Choice A is incorrect. Neither author claims that Ludington had a significant impact on the war. Text 1 doesn't mention how Ludington's ride affected the war overall, and Text 2 suggests that Ludington's ride may have been exaggerated or invented over time. Choice B is incorrect. Neither author claims that Ludington's route has been verified by historians. Text 1 claims she rode 40 miles through Putnam County, but doesn't cite any sources for this information, while Text 2 suggests the ride may not have even happened. Choice C is incorrect. This choice misreads text 2. Neither author claims that Ludington was not a real person, only that her ride may not have happened. Both authors seem to treat Ludington as a genuine historical figure.

Q6

A

A. Tropical mountain bird species are restricted in where they can live.

Choice A is the best answer. Both texts state that tropical mountain bird species have limited ranges or habitats, although they disagree on the reason for this. Text 1 claims that temperature is the main factor that determines where these birds can live, while Text 2 claims that competition with other species is the main factor. However, both texts agree that these birds are not able to survive in many kinds of areas.

Choice B is incorrect. Neither text mentions the tools or methods that scientists use to observe these birds, either now or in the past. Choice C is incorrect. Neither text mentions anything about how these birds build their nests. Choice D is incorrect. Neither text provides any information about the genetic similarity of these birds, so we have no evidence that either author would agree with this statement.

Q7

D

- D. *Self-Portrait at the Keyboard* was painted earlier than Carracci's painting and also refers to the artist's craft.
-

Choice D is the best answer. The author of Text 2 states that Fontana's painting, which depicts a painting easel in the background, was made in 1577, eight years before Carracci's painting. Therefore, they might argue that Carracci was not "the first artist" to depict themselves as a painter.

Choice A is incorrect. The texts don't support this choice. Neither text mentions the reputation or status of either Carracci or Fontana. Choice B is incorrect. The author of Text 2 does not comment on the intention or meaning of Fontana's self-depiction in *Self-Portrait at the Keyboard*. This choice also holds little connection to the underlined claim. Choice C is incorrect. The texts don't support this choice. The author of Text 2 does not suggest any inspirational relationship between Fontana and Carracci. The author of Text 2 is concerned with showing that Fontana's painting is the earliest example of an artist referring to painting in their self-portrait, but makes no mention of her influence on others.

Q8

D

- D. Markings on depictions of human faces are not necessarily intended to portray particular details about the physical appearance of individuals.
-

Choice D is the best answer. Trever thinks that the “hyper-realistic portrayal of identifiable people” interpretation ignores the sculptors’ imagination and creativity. We can infer that Trevor thinks the facial markings on the sculptures may not have represented real skin blemishes on real people.

Choice A is incorrect. The text gives us no reason to think that Trever would respond to the underlined interpretation in this way. Neither text compares the depictions of human faces to the depictions of plants or animals, so we have no basis to draw this conclusion. Choice B is incorrect. The text gives us no reason to think that Trever would respond to the underlined interpretation in this way. There’s nothing in either text about multiple depictions representing the same person, so we have no basis to draw this conclusion. Choice C is incorrect. The text gives us no reason to think that Trever would respond to the underlined interpretation in this way. Neither text mentions the state of the vessels (damaged or intact), so we have no basis to draw this conclusion.

Q9

A

- A. The author of Text 2 approaches the study's findings with some caution, whereas the author of Text 1 is optimistic about the reported potential environmental benefits.
-

Choice A is the best answer. Text 1 is extremely positive about Strassburg's team's findings, calling the potential results "a clear win in the fight against the biodiversity and climate crises." Text 2 is not as positive, arguing that while the findings point to "potential benefits," we also need to consider the "potential effects on global food supplies."

Choice B is incorrect. This isn't a difference between the two views. Text 1 does present the 15% number as enough to achieve meaningful results, but that's not what Text 2 takes issue with: rather, Text 2 argues that we need to consider the effect that rewilding this much farmland would have on food supplies. Choice C is incorrect. This isn't a difference between the two views. Neither text mentions the timeline for achieving the results described by Strassburg's team. Choice D is incorrect. This isn't a difference between the two views. Text 1 focuses on rewilding's effects on both carbon emissions and biodiversity. Text 2 doesn't focus on rewilding's effect on carbon emissions at all. Instead, it focuses on a third factor: global food supplies.

Q10

B

- B. Ailey's work was strongly influenced by jazz.
-

Choice B is the best answer. Author 1 states that Ailey had a "deep admiration for jazz music" and that he "helped bring jazz to life for his audiences." Author 2 states that "Jazz is present throughout Ailey's work." While the authors name different aspects of Ailey's work as the most influenced by jazz, they agree that jazz was a strong influence.

Choice A is incorrect. This isn't something that either text claims. Neither text mentions how Ailey's dancers felt about his approach as a choreographer, so we have no evidence that either author would agree with this. Choice C is incorrect. This isn't something that either text claims. Neither text mentions how familiar audiences were with any aspect of Ailey's works, so we have no evidence that either author would agree with this. Choice D is incorrect. This isn't something that either text claims. Neither text mentions any genre of music other than jazz, so we have no evidence that either author would agree with this.

Notes

Accept equivalent forms (e.g. $0.25 \equiv 1/4$). For grid-in items, decimal and fraction answers are both valid.
