INFORMATION AND IDEAS

Archaeologist Christiana Kohler and her team excavated the Egyptian tomb of Queen Merneith, the wife of a First Dynasty pharaoh. Some scholars claim that she also ruled Egypt on her own and was actually the first female pharaoh. The team found a tablet in Merneith's tomb with writing suggesting that she was in charge of the country's treasury and other central offices. Whether Merneith was a pharaoh or not, this discovery supports the idea that Merneith likely _____ blank

Which choice most logically completes the text?

- A. had an important role in Egypt's government.
- B. lived after rather than before the First Dynasty of Egypt.
- C. traveled beyond Egypt's borders often.
- D. created a new form of writing in Egypt.

The Nacional tree is a rare variety of cacao. Nacionales were thought to have gone extinct by the twentieth century due to a fungus. This fungus can spread from tree to nearby tree through the air and causes disease. But around 2013, cacao expert Servio Pachard located some of these Nacional trees. The trees were in the Piedra de Plata coastal forest, within a hard-to-reach valley in Ecuador. Conservationists inferred that the Nacional trees in Piedra de Plata might have avoided the diseases that wiped out the other Nacionales because _____ blank

Which choice most logically completes the text?

- A. early twentieth-century scientists did not know why so many Nacionales were becoming infected.
- B. the ability of the fungus to travel through the air was only recently discovered.
- C. they were too far from the other Nacional trees infected by the fungus to become infected themselves.
- D. the chocolate made from their pods was highly valued.
