CRAFT AND STRUCTURE

Genetic studies have led researchers to suggest that turtles are most closely related to the group that includes modern crocodiles. But studies of fossils have suggested instead that turtles are most closely related to other groups, such as the one that contains modern snakes. However, many of the fossil studies have relied on incomplete data sets. For a 2022 investigation, biologist Tiago R. Simões and colleagues examined more than 1,000 reptile fossils collected worldwide. From this large data set, they found clear agreement with the results of the genetic studies.

Which choice best describes the function of the underlined sentence?

- A. It offers an overview of the tools scientists use to examine fossils.
- B. It describes a limitation of some studies about the origin of turtles.
- C. It summarizes previous research on the evolution of crocodiles.
- D. It criticizes a widely held belief about genetic studies of reptiles.

Researchers have found a nearly 164,000-year-old molar from a member of the archaic human species known as Denisovans in a cave in Laos, suggesting that Denisovans lived in a wider range of environments than indicated by earlier evidence. Before the discovery, Denisovans were thought to have lived only at high altitudes in relatively cold climates in what are now Russia and China, but the discovery of the tooth in Laos suggests that they may have lived at low altitudes in relatively warm climates in Southeast Asia as well.

Which choice best states the function of the underlined portion in the text as a whole?

- A. It dismisses as untrue the research presented in the previous sentence.
- B. It defines a term used in the description that follows in the rest of the sentence.
- C. It emphasizes the main goal of the research introduced in the previous sentence.
- D. It provides context that clarifies the significance of the information that follows in the rest of the sentence.

Jackie Ormes's *Torchy Brown in Dixie to Harlem* (1937–38) was the first comic strip by a Black woman to appear in a widely read newspaper. The strip tells the story of Torchy, a young woman who leaves Mississippi to become a performer in New York City. Torchy's story reflects the experience of the Great Migration (1910–1970), when millions of Black Americans left the South in search of opportunities in other parts of the United States. *Torchy Brown* thus shows how Ormes used comics to comment humorously on issues affecting Black Americans, which she continued to do throughout her career.

Which choice best states the main purpose of the text?

- A. To show how Ormes's *Torchy Brown* inspired other Black women to write comic strips in the 1930s
- B. To illustrate how the subjects Ormes addressed in her comic strips changed over the course of her career
- C. To give an example of how Ormes presented the experiences of Black Americans in her comic strips
- D. To claim that several characters in *Torchy Brown* were based on people that Ormes knew personally

In many agricultural environments, the banks of streams are kept forested to protect water quality, but it's been unclear what effects these forests may have on stream biodiversity. To investigate the issue, biologist Xingli Giam and colleagues studied an Indonesian oil palm plantation, comparing the species richness of forested streams with that of nonforested streams. Giam and colleagues found that species richness was significantly higher in forested streams, a finding the researchers attribute to the role leaf litter plays in sheltering fish from predators and providing food resources.

Which choice best states the main purpose of the text?

- A. It discusses research intended to settle a debate about how agricultural yields can be increased without negative effects on water quality.
- B. It explains the differences between stream-protection strategies used in oil palm plantations and stream-protection strategies used in other kinds of agricultural environments.
- C. It describes findings that challenge a previously held view about how fish that inhabit streams in agricultural environments attempt to avoid predators.
- D. It presents a study that addresses an unresolved question about the presence of forests along streams in agricultural environments.

Were penguins always flightless? Theresa Cole and her team argue that penguins could fly at some point, but that they lost that ability more than 60 million years ago as they adapted to marine life. After examining various penguin fossils and genetic information, the researchers concluded that over time penguins developed underwater vision, blood oxygenation, and bone density better suited for swimming than flying. Thus, environmental conditions might have driven penguins to change from flyers to swimmers.

Which choice best describes the function of the underlined sentence in the text as a whole?

- A. It defines a scientific term used in the sentence that follows.
- B. It contradicts a description in the sentence that follows.
- C. It provides an answer to the question in the previous sentence.
- D. It notes that the question in the previous sentence has not been researched.

In 1801, a Blackfoot chief named Ac Ko Mok Ki drew a finely detailed map of the Upper Missouri region. This work demonstrates a vast amount of topographic knowledge, as the map features specific names of mountains and rivers, as well as the first-known sketch of the drainage network of the Missouri River. The map is especially notable because Ac Ko Mok Ki also included details about the numerous tribes that lived in the area.

Which choice best describes the function of the underlined sentence in the text as a whole?

- A. It emphasizes Ac Ko Mok Ki's desire to represent other tribes on the map.
- B. It explains how Ac Ko Mok Ki developed an interest in mapmaking.
- C. It identifies some reasons why the map is impressive.
- D. It details how the map was used for hunting and trading purposes.

The following text is adapted from Jason Reynolds’s 2016 novel *Ghost*. The narrator, who is in middle school, is at a bus stop.

I just go there [to the bus stop] to look at the people working out. See, the gym across the street has this big window—like the whole wall is a window—and they have those machines that make you feel like you walking up steps and so everybody just be facing the bus stop, looking all crazy like they’re about to pass out. And trust me, there ain’t nothing funnier than that. So I check that out for a little while like it’s some kind of movie: *The About to Pass Out Show*, starring stair-stepper person one through ten.

©2016 by Jason Reynolds

Which choice best states the main purpose of the text?

- A. To give a reason why the narrator is excited to start middle school
- B. To describe an activity that the narrator finds amusing
- C. To explain a problem that the narrator has overcome
- D. To discuss a movie that the narrator saw in a theater

The following text is adapted from Akwaeke Emezi’s 2019 novel *Pet*. Jam is a teenager who lives with her father, Aloe, and her mother, Bitter, who is a painter.

Bitter finished the painting in the dark morning of a day—it was well past midnight when Jam heard the studio door creak open. She stared into the velvet black of her room and listened to her mother’s footsteps walking in her [mother] and Aloe’s bedroom. There was a weight thrumming through the floorboards in a low song, and that was how Jam knew the painting was done. Bitter’s feet were singing the news.

©2019 by Akwaeke Emezi

Which choice best states the function of the underlined sentence in the text as a whole?

- A. It indicates that Jam is more interested in music than in art.
- B. It adds to the idea that Bitter’s footsteps reveal something to Jam.
- C. It indicates that Bitter always sings when working on a painting.
- D. It describes Aloe’s reaction upon seeing the painting for the first time.

In the past, historians who wanted to examine Frederick Douglass’s diary and other personal papers had to visit the Library of Congress in Washington, DC, to view them on microfilm (film containing scaled-down reproductions of documents). But traveling to the library often added time and costs to research projects. Now, by going to the library’s website, researchers can access digitized versions of Douglass’s papers without physically going anywhere.

Which choice best describes the function of the underlined portion in the text as a whole?

- A. It gives information about a famous person.
- B. It explains the meaning of a word.
- C. It describes a debate among historians.
- D. It summarizes an unexpected finding.

Some bird species don't raise their own chicks. Instead, adult females lay their eggs in other nests, next to another bird species' own eggs. Female cuckoos have been seen quickly laying eggs in the nests of other bird species when those birds are out looking for food. After the eggs hatch, the noncuckoo parents will typically raise the cuckoo chicks as if they were their own offspring, even if the cuckoos look very different from the other chicks.

Which choice best describes the function of the underlined sentence in the text as a whole?

- A. It introduces a physical feature of female cuckoos that is described later in the text.
- B. It describes the appearance of the cuckoo nests mentioned earlier in the text.
- C. It offers a detail about how female cuckoos carry out the behavior discussed in the text.
- D. It explains how other birds react to the female cuckoo behavior discussed in the text.
