01

**Q1****C****C. critic Stina Chyn claims**

Choice C is the best answer. The conventions being tested are punctuation use between titles and proper nouns and between verbs and integrated quotations. No punctuation is needed to set off the proper noun “Stina Chyn” from the title that describes Chyn, “critic.” Because “Stina Chyn” is essential information identifying the “critic,” no punctuation is necessary. Further, no punctuation is needed between the verb “claims” and the following quotation because the quotation is integrated into the structure of the sentence.

Choice A is incorrect because no punctuation is needed before or after the proper noun “Stina Chyn.” Setting the critic’s name off with commas suggests that it could be removed without affecting the coherence of the sentence, which isn’t the case. Choice B is incorrect because no punctuation is needed before or after the proper noun “Stina Chyn.” Setting the critic’s name off with commas suggests that it could be removed without affecting the coherence of the sentence, which isn’t the case. Additionally, no punctuation is needed between “claims” and the integrated quotation. Choice D is incorrect because no punctuation is needed between the verb “claims” and its subject, “critic Stina Chyn.” Additionally, no punctuation is needed between the verb “claims” and the integrated quotation.

Q2

D

D. supposed, a

Choice D is the best answer. The convention being tested is the use of punctuation within a sentence. This choice correctly uses a comma to mark the boundary between the main clause ("Recently...supposed") and the supplementary element ("a finding...Paleolithic") that provides additional information about the implications of the Neronian tool discovery.

Choice A is incorrect because a semicolon can't be used in this way to join the main clause ("Recently...supposed") and the supplementary element ("a finding...Paleolithic"). Choice B is incorrect because it results in a rhetorically unacceptable sentence fragment beginning with "a finding." Choice C is incorrect because it results in a run-on sentence. The main clause ("Recently...supposed") and the supplementary element ("a finding...Paleolithic") are fused without punctuation and/or a conjunction.

Q3

D

D. *Panchali*. A

Choice D is the best answer. The convention being tested is punctuation use between sentences. In this choice, the period is used correctly to mark the boundary between one sentence ("In... *Panchali*") and another ("A quiet...time"). The phrase beginning with "a quiet" modifies the subject of the next sentence, "Ray's film."

Choice A is incorrect because it results in a run-on sentence. The sentences are fused without punctuation and/or a conjunction. Choice B is incorrect because it results in a comma splice. A comma can't be used in this way to mark the boundary between sentences. Choice C is incorrect because it results in a comma splice. A comma can't be used in this way to mark the boundary between sentences.

**Q4**

**B**

B. Culture—

---

Choice B is the best answer. The text uses a dash to introduce a nonessential element that explains the acronym FESTAC. The dash matches the dash that comes after “known,” ending the descriptive aside.

Choice A is incorrect. A colon can only come after an independent clause, which isn’t the case here. Choice C is incorrect. While punctuation is required to set off “or FESTAC...known” from the rest of the sentence, nonessential elements must be separated from the sentence with matching punctuation. Since a dash appears on the other side of the element, we can’t use a comma here. Choice D is incorrect. The descriptive aside “or FESTAC...known” is a nonessential element that must be separated with punctuation from the rest of the sentence. This choice fails to add the necessary punctuation before the nonessential element.

---

**Q5**

**C**

C. dependable

---

Choice C is the best answer. The convention being tested is the punctuation of an integrated relative clause. No punctuation is needed before the relative clause beginning with “that” because the content of the relative clause (“that...Lighthouse”) is integral to the meaning of the coordinated adjectival phrase (“so bright, so localized, and so dependable”) that it modifies.

Choice A is incorrect because no punctuation is needed between the coordinated adjectival phrase (“so bright...dependable”) and the integrated relative clause that modifies it. Choice B is incorrect because no punctuation is needed between the coordinated adjectival phrase (“so bright...dependable”) and the integrated relative clause that modifies it. Choice D is incorrect because no punctuation is needed between the coordinated adjectival phrase (“so bright...dependable”) and the integrated relative clause that modifies it.

---

**Q6****A****A.** tombs. Built

Choice A is the best answer. The convention being tested is punctuation use between sentences. In this choice, the period after “tombs” is used correctly to mark the boundary between one sentence (“Archaeologist...tombs”) and another (“Built...nature”).

Choice B is incorrect because it results in a comma splice. A comma can’t be used in this way to mark the boundary between sentences. Choice C is incorrect. Without a comma preceding it, the conjunction “and” can’t be used in this way to join the two sentences. Choice D is incorrect because it results in a run-on sentence. The sentences (“Archaeologist...tombs” and “Built...nature”) are fused without punctuation and/or a conjunction.

**Q7****C****C.** nickname, however,

Choice C is the best answer. The convention being tested is punctuation use between a main clause and two supplementary elements. In this choice, the commas after “nickname” and “however” are correctly used to separate the supplementary adverb “however” from the main clause (“Scott-Heron...nickname”) on one side and the supplementary participial phrase (“feeling...bluesologist”) on the other.

Choice A is incorrect because it fails to mark the boundary between the supplementary adverb “however” and the supplementary phrase (“feeling...bluesologist”). Choice B is incorrect because a semicolon can’t be used in this way to join the supplementary adverb “however” and the supplementary phrase (“feeling...bluesologist”). Choice D is incorrect because a semicolon can’t be used in this way to join the main clause (“Scott-Heron...nickname”) and the supplementary word and phrase (“however” and “feeling...bluesologist”). Moreover, placing the semicolon after “nickname” illogically signals that the following information (Scott-Heron’s feeling that the nickname didn’t encapsulate his devotion to the blues tradition) is contrary to the information in the previous clause (Scott-Heron’s resistance to the nickname).

Q8

A

A. effect, though;

---

Choice A is the best answer. The convention being tested is the use of punctuation within a sentence. This choice correctly uses a comma to separate the supplementary adverb "though" from the preceding main clause ("Jetties can sometimes have the opposite effect") and uses a semicolon to join the next main clause ("obstructing...areas") to the rest of the sentence. Further, placing the semicolon after "though" logically indicates that the information earlier in this sentence (that jetties can sometimes cause erosion) is contrary to what might be assumed from the information in the previous sentence (that jetties are often constructed for the purpose of protecting coastlines from erosion).

Choice B is incorrect because it fails to mark the boundary between the two main clauses with appropriate punctuation. With "though...areas" functioning as a subordinate clause following the comma, this choice illogically indicates that the following information (that obstructing the natural flow of sand along the shore can sometimes lead to erosion) is contrary to the information earlier in the sentence (that jetties can sometimes cause erosion). Instead, the information following "though" supports the previous claim about the erosive effects of jetties. Choice C is incorrect because it's not conventional to use a semicolon in this way to separate a main clause from a dependent clause. Further, it illogically indicates that the following information (that obstructing the natural flow of sand along the shore can sometimes lead to erosion) is contrary to the information earlier in the sentence (that jetties can sometimes cause erosion). Instead, the information following "though" supports the previous claim about the erosive effects of jetties. Choice D is incorrect because it results in a comma splice. Commas can't be used in this way to set off a supplementary word or phrase between two main clauses.

---

**Q9****D**

D. however. It

---

Choice D is the best answer. The clause “Like an Elvis impersonator...real thing” and the clause “it is...look-alike” are both independent clauses, so making them into two separate sentences is grammatically correct.

Choice A is incorrect. This choice creates a run-on sentence error. The clause “Like an Elvis impersonator...real thing” and the clause “it is...look-alike” are both independent clauses, so they need to be separated with at least a comma + a coordinating conjunction. This choice provides the coordinating conjunction “but,” but it’s missing a comma. Choice B is incorrect. This choice creates a run-on sentence error. The clause “Like an Elvis impersonator...real thing” and the clause “it is...look-alike” are both independent clauses, so they need to be separated with a semicolon, a colon, a dash, a period, or a comma + a coordinating conjunction. Choice C is incorrect. This choice creates a run-on sentence error. The clause “Like an Elvis impersonator...real thing” and the clause “it is...look-alike” are both independent clauses, so they need to be separated with at least a comma + a coordinating conjunction. This choice provides a comma, but it’s missing a coordinating conjunction.

**Q10****A**

A. food:

---

Choice A is the best answer. The convention being tested is colon use within a sentence. A colon used in this way introduces information that illustrates or explains information that has come before it. In this case, the colon introduces the following explanation of why some roundworms in the Southern Hemisphere move in the opposite direction of Earth’s magnetic field.

Choice B is incorrect because it results in a comma splice. A comma can’t be used in this way to join two long independent clauses (“Researchers...food” and “in...sources”) such as these. Choice C is incorrect because it results in a run-on sentence. The two clauses (“Researchers...food” and “in...sources”) are fused without punctuation. Furthermore, the conjunction “while” fails to indicate that what follows is an explanation of why some roundworms in the Southern Hemisphere move in the opposite direction of Earth’s magnetic field. Choice D is incorrect because it results in a run-on sentence. The two clauses (“Researchers...food” and “in...sources”) are fused without punctuation and/or a conjunction.

---

## Notes

Accept equivalent forms (e.g.  $0.25 \equiv 1/4$ ). For grid-in items, decimal and fraction answers are both valid.
