Q1**D****D.** rare;

Choice D is the best answer. The convention being tested is the use of punctuation within a sentence. This choice uses a semicolon in a conventional way to join the first main clause ("In many...rare") and the second main clause ("in some...common") in this sentence.

Choice A is incorrect. Joining the first main clause ("In many...rare") and the second main clause ("in some...common") with the conjunction "and" conflicts with the use of "however" later in the sentence, resulting in a confusing and illogical sentence. Choice B is incorrect because it results in a comma splice. Without a conjunction following it, a comma can't be used in this way to join two main clauses. Choice C is incorrect because it results in a run-on sentence. The two main clauses are fused without punctuation and/or a conjunction.

Q2**C****C.** *Gingerbread*

Choice C is the best answer. The convention being tested is punctuation between a subject and a verb. When, as in this case, a subject ("her 2019 novel *Gingerbread*") is immediately followed by a verb ("offers"), no punctuation is needed.

Choice A is incorrect because no punctuation is needed between the subject and the verb.

Choice B is incorrect because no punctuation is needed between the subject and the verb.

Choice D is incorrect because no punctuation is needed between the subject and the verb.

Q3

D

D. music: the flute. A

Choice D is the best answer. The convention being tested is the use of punctuation within and between sentences. In this choice, the colon correctly introduces the name of the instrument (the flute) that novel audio technologies allowed to be added to jazz and swing. In addition, the period is used to correctly mark the boundary between one sentence ("In...flute") and another ("A relatively...greats").

Choice A is incorrect because it results in a comma splice. A comma can't be used in this way to join two main clauses ("In...quiet instrument" and "its...greats"). Choice B is incorrect. In standard English, it's unconventional to form a sentence in this way with two uncoordinated subjects ("the flute" and "its full range of sound"), and the lack of a clear main subject results in an awkwardly constructed and confusing sentence. Choice C is incorrect. In standard English, it's unconventional to form an independent clause in this way with two uncoordinated subjects ("the flute" and "its full range of sound"), and the lack of a clear main subject results in an awkwardly constructed and confusing clause.

Q4

B

B. content; in that era,

Choice B is the best answer. The convention being tested is the use of punctuation within a sentence. This choice uses a semicolon in a conventional way to join the first main clause ("Gitlin's...content") and the second main clause beginning with a supplementary phrase ("in...audiences"). Further, placing a comma after "era" separates the supplementary phrase "in that era" from the rest of the main clause that follows ("even...audiences").

Choice A is incorrect because it results in a comma splice. Without a conjunction following it, a comma can't be used in this way to join two main clauses. Further, this choice fails to mark the boundary between the supplementary phrase "in that era" and the rest of the main clause that follows ("even...audiences"). Choice C is incorrect because it results in a run-on sentence. The two main clauses ("Gitlin's...content" and "in...audiences") are fused without punctuation and/or a conjunction. Choice D is incorrect because it results in a comma splice. Without a conjunction following it, a comma can't be used in this way to join two main clauses.

Q5

B

B. dislodge, in part due to its sheer size:

Choice B is the best answer. The convention being tested is punctuation between main clauses and a supplementary element. This choice correctly uses a comma to mark the boundary between the main clause ("The vessel took six days to dislodge") and the supplementary element ("in part due to its sheer size") that provides additional information on why the vessel was difficult to dislodge. Additionally, this choice correctly uses a colon to introduce another main clause that describes the vessel's size ("it's as heavy as two thousand blue whales when fully loaded").

Choice A is incorrect because it results in a comma splice. A comma can't be used in this way to mark the boundary between two main clauses ("The vessel...size" and "it's...loaded"). Additionally, it fails to mark the boundary between the main clause ("The vessel took six days to dislodge") and the supplementary element ("in part due to its sheer size"). Choice C is incorrect because it results in a comma splice. A comma can't be used in this way to mark the boundary between two main clauses ("The vessel...size" and "it's...loaded"). Choice D is incorrect because it results in a run-on sentence. The two main clauses ("The vessel...size" and "it's...loaded") are fused without punctuation and/or a conjunction.

Q6

A

A. professor Yugang Sun

Choice A is the best answer. The convention being tested is the use of punctuation between titles and proper nouns. No punctuation is needed between the proper noun “Yugang Sun” and the title that describes Sun, “chemistry professor.” Furthermore, no punctuation is needed after “Sun” because “chemistry professor Yugang Sun and his colleagues at Temple University” functions as the coordinated subject of the sentence, and together Sun and colleagues performed the action of developing a new approach to producing iron nanoparticles.

Choice B is incorrect because no punctuation is needed between the proper noun “Yugang Sun” and the coordinated noun phrase “and his colleagues at Temple University.” Choice C is incorrect because no punctuation is needed before or after the proper noun “Yugang Sun.” Setting off the professor’s name with commas suggests that it could be removed without affecting the coherence of the sentence, which isn’t the case. Choice D is incorrect because no punctuation is needed between the title “chemistry professor” and the proper noun “Yugang Sun.”

Q7

D

D. 1929, for one. The

Choice D is the best answer. The conventions being tested are punctuation use between sentences and the punctuation of a supplementary element. This choice correctly uses a period to mark the boundary between one sentence ("During...one") and another ("The *Katzenbach*...event") and uses a comma to separate the supplementary phrase "for one" from the preceding main clause. Further, placing the period after "for one" correctly indicates that the information in the preceding main clause ("the founding...1929") is the first example provided of a pivotal event in the Latino rights movement.

Choice A is incorrect because placing the period after "1929" illogically indicates that the information in the next main clause (describing the *Katzenbach v. Morgan* court decision) is the first example provided of a pivotal event in the Latino rights movement; rather, it's a second example. Choice B is incorrect because it results in a comma splice. A comma can't be used in this way to join two main clauses. Choice C is incorrect because it results in a comma splice. A comma can't be used in this way to join two main clauses. Moreover, it fails to use appropriate punctuation to separate the supplementary element "for one" from the preceding main clause.

Q8

A

A. Tribe, and

Choice A is the best answer. This choice uses a comma and a coordinating conjunction ("and") to join two independent clauses ("The Tantaquidgeon...Tribe" and "Today...country").

Choice B is incorrect. This choice results in a grammar error known as a run-on sentence. The clauses before and after "Tribe" are both independent, so they need to be separated with some sort of punctuation. Choice C is incorrect. This choice results in a grammar error known as a run-on sentence. The clauses before and after "and" are both independent, so they can't be linked with just a conjunction. A comma would also be required. Choice D is incorrect. This choice results in a grammar error called a comma splice. The clauses before and after "Tribe" are both independent, so they can't be linked with just a comma. A coordinating conjunction like "and" or "but" would also be required.

Q9**B****B. geologist**

Choice B is the best answer. “Marie tharp” is essential information that completes the first clause — the first clause doesn’t function without it. So we don’t want to separate it with punctuation.

Choice A is incorrect. This choice creates a punctuation error. “The field of geological oceanography owes much to American geologist” is unclear: which geologist are we talking about? We need the “Marie Tharp” for clarity, which means it’s essential information and should not be separated by a comma. Choice C is incorrect. This choice creates a punctuation error. “The field of geological oceanography owes much to American geologist” is unclear: which geologist are we talking about? We need the “Marie Tharp” for clarity, which means it’s essential information and should not be separated by a semicolon. Choice D is incorrect. This choice creates a punctuation error. “The field of geological oceanography owes much to American geologist” is unclear: which geologist are we talking about? We need the “Marie Tharp” for clarity, which means it’s essential information and should not be separated by a colon.

Q10**D****D. compound aluminum oxide**

Choice D is the best answer. The convention being tested is the use of punctuation around noun phrases. No punctuation is needed because the noun phrase “aluminum oxide” is a restrictive appositive, meaning that it provides essential identifying information about the noun phrase before it, “the chemical compound,” and thus doesn’t require punctuation around it.

Choice A is incorrect because no punctuation is needed. Choice B is incorrect because no punctuation is needed. Choice C is incorrect because the noun phrase “aluminum oxide” is a restrictive appositive. Setting the phrase off with punctuation suggests that it could be removed without affecting the coherence of the sentence, which isn’t the case.

Notes

Accept equivalent forms (e.g. $0.25 \equiv 1/4$). For grid-in items, decimal and fraction answers are both valid.
