03

Q1**B****B.** pristine, though;

Choice B is the best answer. The convention being tested is the use of punctuation within a sentence. This choice correctly uses a comma to separate the supplementary adverb "though" from the preceding main clause ("They are hardly pristine") and uses a semicolon to join the two main clauses ("They...though" and "many...objects"). Further, placing the semicolon after "though" indicates that the information in the preceding main clause (chondrites are far from pristine) is contrary to what might be assumed from the information in the previous sentence (chondrites have been generally unaltered by their environment).

Choice A is incorrect because placing the comma after "pristine" and using "though" as a subordinating conjunction illogically indicates that the information in the next main clause (many chondrites have experienced damage) is contrary to the information in the previous clause (chondrites are far from pristine). Choice C is incorrect because placing the semicolon after "pristine" illogically indicates that the information in the next main clause (many chondrites have experienced damage) is contrary to the information in the previous clause (chondrites are far from pristine). Choice D is incorrect because it results in a comma splice. Without a conjunction following it, the comma after "though" can't be used in this way to join two main clauses.

Q2**C****C.** biologist Yuree Lee

Choice C is the best answer. The convention being tested is the use of punctuation between titles and proper nouns. No punctuation is needed to offset the proper noun "Yuree Lee" from the title "plant cell biologist" that describes Lee.

Choice A is incorrect because no punctuation is needed. Choice B is incorrect because no punctuation is needed. Choice D is incorrect because no punctuation is needed around the proper noun "Yuree Lee." Setting the phrase off with punctuation suggests that it could be removed without affecting the coherence of the sentence, which isn't the case.

Q3

D

D. aesthetics. As

Choice D is the best answer. The convention being tested is punctuation use between sentences. In this choice, the period is used correctly to mark the boundary between one sentence ("Philosopher...aesthetics") and another ("As...formalist"). The long adverbial element "as evidenced...itself" modifies the content in the following clause to support the claim that Kivy's approach was formalist.

Choice A is incorrect because it results in a run-on sentence. The sentences ("Philosopher...aesthetics" and "As...formalist") are fused without punctuation and/or a conjunction. Choice B is incorrect. Without a comma preceding it, the conjunction "and" can't be used in this way to join sentences. Choice C is incorrect because it results in a comma splice. A comma can't be used in this way to mark the boundary between sentences.

Q4

C

C. audience. To

Choice C is the best answer. The convention being tested is punctuation use between sentences. In this choice, the period is used correctly to mark the boundary between one sentence ("In modern...audience") and another ("To do...performance").

Choice A is incorrect because it results in a rhetorically unacceptable sentence fragment beginning with "as." Choice B is incorrect because it results in a run-on sentence. The sentences ("In modern...audience" and "To do...performance") are fused without punctuation and/or a conjunction. Choice D is incorrect because it results in a comma splice. A comma can't be used in this way to mark the boundary between sentences.

Q5

B

B. works. Because

Choice B is the best answer. The convention being tested is punctuation use between sentences. In this choice, the period is used to correctly mark the boundary between one sentence ("A ray...works") and another ("Because...image").

Choice A is incorrect because it results in a run-on sentence. The two sentences ("A ray...works" and "Because...image") are fused without punctuation and/or a conjunction. Choice C is incorrect because it results in a comma splice. A comma can't be used in this way to mark the boundary between sentences. Choice D is incorrect because it results in a comma splice. Since the contraction "it's" creates a main clause, the comma after "single ray" can't be used in this way to mark the boundary between two main clauses ("it's...ray" and "all light...image").

Q6

B

B. quilts, the

Choice B is the best answer. The convention being tested is punctuation use between a main clause and a supplementary phrase. This choice correctly uses a comma to mark the boundary between the main clause ("the portraits...quilts") and the supplementary noun phrase ("the stitching...fabric") that provides a further description of how the portraits can be identified as quilts.

Choice A is incorrect. A comma and the conjunction "and" can't be used in this way to join a main clause and a supplementary noun phrase. Choice C is incorrect because a semicolon can't be used in this way to join a main clause and a supplementary noun phrase. Choice D is incorrect because it results in a rhetorically unacceptable sentence fragment beginning with "the stitching."

Q7

A

A. models—which

Choice A is the best answer. The convention being tested is the use of punctuation within a sentence. The dashes after "models" and "decision-makers" correctly separate the supplementary element "which assume that people are consistently rational decision-makers" from the rest of the sentence. This punctuation indicates that this element could be removed without affecting the grammatical coherence of the sentence.

Choice B is incorrect because a comma can't be paired with a dash in this way to separate the supplementary element from the rest of the sentence. Choice C is incorrect because it fails to use appropriate punctuation to separate the supplementary element from the rest of the sentence. Choice D is incorrect because it interrupts the sentence at an illogical and grammatically incoherent point. The dash should be placed before "which," not after it, to mark the beginning of the supplementary element.

Q8

D

D. playwright Wakako Yamauchi

Choice D is the best answer. The convention being tested is the use of punctuation between titles and proper nouns. No punctuation is needed to set off the proper noun "Wakako Yamauchi" from the title that describes Yamauchi, "pioneering playwright." Because "Wakako Yamauchi" is essential information identifying the "pioneering playwright," no punctuation is necessary.

Choice A is incorrect because no punctuation is needed before or after the proper noun "Wakako Yamauchi." Setting the playwright's name off with commas suggests that it could be removed without affecting the coherence of the sentence, which isn't the case. Choice B is incorrect because no punctuation is needed between the title "pioneering playwright" and the proper noun "Wakako Yamauchi." Choice C is incorrect because no punctuation is needed between the proper noun "Wakako Yamauchi" and the verb "compares."

B. described, from hair to grass to sculptures—

Choice B is the best answer. The convention being tested is the punctuation of supplementary elements within a sentence. The comma after "described" separates the first supplementary element ("both of interviewees and the items they described") from the second supplementary element ("from hair to grass to sculptures"). Furthermore, the dash after "sculptures" pairs with the dash after "photographs" to separate these two supplementary elements from the rest of the sentence. The pair of dashes, which operate at a higher organizing level than the comma, indicates that the elements between the dashes function together—in this case, the second supplement ("from...sculptures") describes the range of items mentioned in the first supplement—and could be removed without affecting the grammatical coherence of the sentence.

Choice A is incorrect because it fails to appropriately punctuate the supplementary elements in the sentence. A dash is needed after "sculptures" to separate the supplementary elements ("both...sculptures") from the rest of the sentence. Choice C is incorrect because it fails to appropriately punctuate the supplementary elements in the sentence. The two supplementary elements "both...described" and "from...sculptures" function together to describe the photographs, and placing a dash between them would make this relationship less clear, suggesting that the supplement "both...described" is a standalone element that could be removed without affecting the grammatical coherence of the sentence, which isn't the case. Choice D is incorrect because it fails to appropriately punctuate the supplementary elements in the sentence. A colon isn't conventionally used in this way to separate a supplementary element ("from hair to grass to sculptures") from the noun phrase it is modifying ("items they described"). Additionally, a dash is needed after "sculptures" to separate the supplementary elements ("both...sculptures") from the rest of the sentence.

Q10

D

D. regions

Choice D is the best answer. The convention being tested is punctuation between coordinates in a sentence. The two elements "how...regions" and "what...ocean" work together as coordinates to complete the description of what the team was able to determine. Because there are only two coordinates in this case (as opposed to a series of three or more), no punctuation is needed between them.

Choice A is incorrect because no punctuation is needed between the coordinates "how...regions" and "what...ocean." Choice B is incorrect because no punctuation is needed between the coordinates "how...regions" and "what...ocean." Choice C is incorrect because no punctuation is needed between the coordinates "how...regions" and "what...ocean."

Notes

Accept equivalent forms (e.g. $0.25 \equiv 1/4$). For grid-in items, decimal and fraction answers are both valid.
