Q1**A****A. focuses**

Choice A is the best answer. The convention being tested is subject-verb agreement. The singular verb "focuses" agrees in number with the singular subject "each one of these plays," which refers to each play individually.

Choice B is incorrect because the plural verb "focus" doesn't agree in number with the singular subject "each one of these plays." Choice C is incorrect because the plural verb "are focused" doesn't agree in number with the singular subject "each one of these plays." Choice D is incorrect because the plural verb "were focused" doesn't agree in number with the singular subject "each one of these plays."

Q2**C****C. their**

Choice C is the best answer. The convention being tested is the use of possessive determiners. The plural possessive determiner "their" agrees in number with the plural noun "types" and thus indicates that the more personal subject matter of Marisol's 1968 sculpture takes the place of those types of pop culture references that made Marisol a star.

Choice A is incorrect because the singular possessive determiner "its" doesn't agree in number with the plural noun "types." Choice B is incorrect because "they're" is the contraction for "they are," not a possessive determiner. Choice D is incorrect because "it's" is the contraction for "it is" or "it has," not a possessive determiner.

Q3

B

- B. the bioswales have mitigated both street flooding and the resulting pollution of nearby waterways.
-

Choice B is the best answer. The convention being tested is subject-modifier placement. This choice makes the noun phrase “the bioswales” the subject of the sentence and places it immediately after the modifying phrase “By reducing...sewers.” In doing so, this choice clearly establishes that the bioswales—and not another noun in the sentence—are reducing runoff flowing into city sewers.

Choice A is incorrect because it results in a dangling modifier. The placement of the noun phrase “the mitigation...waterways” immediately after the modifying phrase results in unclear modification. The resulting sentence makes it hard to determine what is responsible for “reducing the runoff”: the bioswales or some other noun in the sentence. Choice C is incorrect because it results in a dangling modifier. The placement of the noun phrase “the bioswales’ mitigation...waterways” immediately after the modifying phrase results in unclear modification. The resulting sentence makes it hard to determine what is responsible for “reducing the runoff”: the bioswales or some other noun in the sentence. Choice D is incorrect because it results in a dangling modifier. The placement of the noun phrase “street flooding and the resulting pollution” immediately after the modifying phrase illogically suggests that the “flooding and pollution” are reducing runoff flowing into city sewers.

Q4

C

C. works,

Choice C is the best answer. The convention being tested is the use of punctuation and verb forms within a sentence. This choice leaves the verb "admired" in its nonfinite past participle form to function within a supplementary element ("much...followed"). Offset by commas after "works" and "followed," this supplementary element interrupts the main clause ("English poet and Shakespeare contemporary John Donne's works...had...been essentially gathering dust...") with additional information about the works' reception during Donne's lifetime.

Choice A is incorrect because it fails to offset the supplementary element ("much...followed") with appropriate punctuation, and using the finite verb "were much admired" results in an ungrammatical sentence. Choice B is incorrect because using the finite verb "were much admired" results in an ungrammatical sentence. Choice D is incorrect because it fails to offset the supplementary element ("much...followed") with appropriate punctuation, and using the finite verb "had been much admired" results in an ungrammatical sentence.

Q5

B

B. increase

Choice B is the best answer. The convention being tested is subject-verb agreement. The plural verb "increase" agrees in number with the plural subject "toxins."

Choice A is incorrect because the singular verb "is increasing" doesn't agree in number with the plural subject "toxins." Choice C is incorrect because the singular verb "increases" doesn't agree in number with the plural subject "toxins." Choice D is incorrect because the singular verb "has increased" doesn't agree in number with the plural subject "toxins."

Q6

B

B. variables that characterize objects'

Choice B is the best answer. The conventions being tested are the use of plural and possessive nouns. The plural noun "variables" correctly indicates that there are multiple variables, and the plural possessive noun "objects'" correctly indicates that the movement of objects in general is being discussed.

Choice A is incorrect because the context requires the plural noun "variables," not the singular possessive noun "variable's." Choice C is incorrect because the context requires the plural possessive noun "objects'," not the singular possessive noun "object's." Choice D is incorrect because the context requires the plural possessive noun "objects'," not the plural noun "objects."

Q7

B

B. Iceland's parliament is one of the oldest in the world, first meeting in 930 CE.

Choice B is the best answer. The convention being tested is subject-modifier placement. This choice makes the noun phrase "Iceland's parliament" the subject of the sentence and places it immediately after the modifying phrase "a government body officially known as the Althing." In doing so, this choice clearly establishes that Iceland's parliament—and not another noun in the sentence—is the government body known as the Althing.

Choice A is incorrect because it results in a dangling modifier. The placement of the noun phrase "the world's oldest parliaments" immediately after the modifying phrase illogically suggests that the world's oldest parliaments are a government body known as the Althing. Choice C is incorrect because it results in a dangling modifier. The placement of the noun phrase "the first meeting" immediately after the modifying phrase illogically suggests that the first meeting of Iceland's parliament was a government body known as the Althing. Choice D is incorrect because it results in a dangling modifier. The placement of the noun phrase "930 CE" immediately after the modifying phrase illogically suggests that the year 930 CE is a government body known as the Althing.

Q8

D

- D. pine trees and the fungus *Tricholoma matsutake* can transport nutrients through their entangled tree roots and fungal hyphae.
-

Choice D is the best answer. The convention being tested is subject-modifier placement. This choice makes the noun phrase "pine trees and the fungus *Tricholoma matsutake*" the subject of the sentence and places it immediately after the modifying phrase "forming...association." In doing so, this choice clearly establishes that the pine trees and fungus—and not another noun in the sentence—are forming the networks.

Choice A is incorrect because it results in a dangling modifier. The placement of the it-cleft "it is" immediately after the modifying phrase illogically and confusingly suggests that "it" is forming extensive networks. Furthermore, it's not conventional to follow a long introductory modifying element with an it-cleft construction because it results in an unnecessarily wordy and confusing sentence, such as this. Choice B is incorrect because it results in a dangling modifier. The placement of "the transport of nutrients" immediately after the modifying phrase illogically suggests that the transport of nutrients is forming extensive networks. Choice C is incorrect because it results in a dangling modifier. The placement of "nutrients" immediately after the modifying phrase illogically suggests that nutrients are forming extensive networks.

Q9

D

- D. silica glass's atomic arrangement is more dispersed, resulting in a significant disadvantage:
-

Choice D is the best answer. The convention being tested is subject-modifier placement. This choice makes “silica glass’s atomic arrangement” the subject of the sentence and places it immediately after the modifying phrase “compared to that of alumina glass.” In doing so, this choice clearly establishes that silica glass’s atomic arrangement—and not another noun in the sentence—is being compared to the atomic arrangement (“that”) of alumina glass.

Choice A is incorrect because it results in a dangling modifier. The placement of the noun phrase “silica glass” immediately after the modifying phrase illogically suggests that silica glass itself (rather than its atomic arrangement) is being compared to alumina glass’s atomic arrangement. Choice B is incorrect because it results in a dangling modifier. The placement of the noun phrase “silica glass” immediately after the modifying phrase illogically suggests that silica glass itself (rather than its atomic arrangement) is being compared to alumina glass’s atomic arrangement. Choice C is incorrect because it results in a dangling modifier. The placement of the noun phrase “a significant disadvantage” immediately after the modifying phrase illogically suggests that “a significant disadvantage” is being compared to alumina glass’s atomic arrangement.

Q10

A

- A. has enhanced
-

Choice A is the best answer. The convention being tested is subject-verb agreement. The singular verb “has enhanced” agrees in number with the singular subject “*A Sheaf Gleaned in French Fields*,” which is the title of a book of poems.

Choice B is incorrect because the plural verb “are enhancing” doesn’t agree in number with the singular subject “*A Sheaf Gleaned in French Fields*.” Choice C is incorrect because the plural verb “have enhanced” doesn’t agree in number with the singular subject “*A Sheaf Gleaned in French Fields*.” Choice D is incorrect because the plural verb “enhance” doesn’t agree in number with the singular subject “*A Sheaf Gleaned in French Fields*.”

Notes

Accept equivalent forms (e.g. $0.25 \equiv 1/4$). For grid-in items, decimal and fraction answers are both valid.
