Q1**B**

B. amorphous ice lacks the thermal energy to form the crystals found in ice Ih.

Choice B is the best answer. The convention being tested is subject-modifier placement. This choice makes the noun phrase “amorphous ice” the subject of the sentence and places it immediately after the modifying phrase “defined...structure.” In doing so, this choice clearly establishes that amorphous ice—and not another noun in the sentence—is being described as having a disorganized molecular structure.

Choice A is incorrect because it results in a dangling modifier. The placement of the noun “ice Ih” immediately after the modifying phrase illogically suggests that ice Ih has a disorganized molecular structure, whereas ice Ih is previously described as having molecules that form a hexagonal pattern. Choice C is incorrect because it results in a dangling modifier. The placement of the noun phrase “the lack of thermal energy” immediately after the modifying phrase illogically suggests that the lack of thermal energy has a disorganized molecular structure. Choice D is incorrect because it results in a dangling modifier. The placement of “ice Ih” immediately after the modifying phrase illogically suggests that ice Ih has a disorganized molecular structure, whereas ice Ih is previously described as having molecules that form a hexagonal pattern.

Q2

D

D. prioritizing

Choice D is the best answer. The convention being tested is the use of verb forms within a sentence. The nonfinite present participle “prioritizing” is correctly used to form a supplementary element that modifies “their design,” describing what the headrests’ design prioritized.

Choice A is incorrect because it results in a comma splice. The finite past perfect verb “had prioritized” creates a second main clause in the sentence, and the comma after “headrests” can’t be used in this way to join two main clauses. Choice B is incorrect because it results in a comma splice. The finite past progressive verb “was prioritizing” creates a second main clause in the sentence, and the comma after “headrests” can’t be used in this way to join two main clauses. Choice C is incorrect because it results in a comma splice. The finite past tense verb “prioritized” creates a second main clause in the sentence, and the comma after “headrests” can’t be used in this way to join two main clauses.

Q3

D

D. identifies

Choice D is the best answer. The convention being tested is subject-verb agreement. The singular verb “identifies” agrees in number with the singular subject “analysis.”

Choice A is incorrect because the plural verb “are identifying” doesn’t agree in number with the singular subject “analysis.” Choice B is incorrect because the plural verb “identify” doesn’t agree in number with the singular subject “analysis.” Choice C is incorrect because the plural verb “have identified” doesn’t agree in number with the singular subject “analysis.”

Q4

C

C. its

Choice C is the best answer. The convention being tested is the use of possessive determiners. The singular possessive determiner "its" agrees in number with the singular subject "the Tajik Republic" and thus indicates that the other republics were its peers.

Choice A is incorrect because the plural possessive determiner "their" doesn't agree in number with the singular subject "the Tajik Republic." Choice B is incorrect because "they're" is the contraction for "they are," not a possessive determiner. Choice D is incorrect because "it's" is the contraction for "it is" or "it has," not a possessive determiner.

Q5

B

B. is

Choice B is the best answer. The convention being tested is subject-verb agreement. The singular verb "is" agrees in number with the singular subject "the shape."

Choice A is incorrect because the plural verb "are" doesn't agree in number with the singular subject "the shape." Choice C is incorrect because the plural verb "were" doesn't agree in number with the singular subject "the shape." Choice D is incorrect because the plural verb "have been" doesn't agree in number with the singular subject "the shape."

Q6

D

- D. findings from a 2022 study suggested that vegetables and grains were the primary components of early medieval rulers' diets.
-

Choice D is the best answer. The convention being tested is subject-modifier placement. This choice makes the noun phrase "findings from a 2022 study" the subject of the sentence and places it immediately after the modifying phrase "supported...Ages." In doing so, this choice clearly establishes that the findings—and not another noun in the sentence—are supported by the biochemical analyses.

Choice A is incorrect because it results in a dangling modifier. The placement of "vegetables and grains" immediately after the modifying phrase illogically suggests that vegetables and grains are supported by biochemical analyses. Choice B is incorrect because it results in a dangling modifier. The placement of "early medieval rulers' diets" immediately after the modifying phrase illogically suggests that the rulers' diets are supported by biochemical analyses. Choice C is incorrect because it results in a dangling modifier. The placement of "the primary components" immediately after the modifying phrase illogically suggests that the primary components are supported by biochemical analyses.

Q7

C

- C. it often consists
-

Choice C is the best answer. The convention being tested is pronoun-antecedent agreement. The singular pronoun "it" agrees in number with the singular antecedent "industry" and clearly indicates that the industry consists of just one or two suppliers per municipality.

Choice A is incorrect. The plural pronoun "these" neither agrees in number with the singular antecedent "industry" nor clearly indicates that the industry—not another plural noun in the sentence, such as "start-up costs" or "barriers"—consists of just one or two suppliers per municipality. Choice B is incorrect because the plural pronoun "they" doesn't agree in number with the singular antecedent "industry." Choice D is incorrect because the singular pronoun "this" is ambiguous in this context; the resulting sentence leaves unclear what consists of just one or two suppliers per municipality.

Q8

A

A. explore

Choice A is the best answer. The convention being tested is subject-verb agreement. The plural verb “explore” agrees in number with the plural subject “Barrada’s pieces.”

Choice B is incorrect because the singular verb phrase “has explored” doesn’t agree in number with the plural subject “Barrada’s pieces.” Choice C is incorrect because the singular verb “explores” doesn’t agree in number with the plural subject “Barrada’s pieces.” Choice D is incorrect because the nonfinite participle “exploring” doesn’t supply the main clause with a finite verb.

Q9

A

A. the researchers theorize that moths, mistaking nighttime lights for the Sun, continually try to reorient their bodies while flying near such lights.

Choice A is the best answer. The convention being tested is subject-modifier placement. This choice makes the noun phrase “the researchers” the subject of the sentence and places it immediately after the modifying phrase “knowing...day.” In doing so, this choice clearly establishes that the researchers—and not another noun in the sentence—know that flying insects keep their backs pointed toward sunlight during the day.

Choice B is incorrect because it results in a dangling modifier. The placement of the noun phrase “the researchers’ theory” immediately after the modifying phrase illogically suggests that the researchers’ theory knows that flying insects keep their backs pointed toward sunlight during the day. Choice C is incorrect because it results in a dangling modifier. The placement of the noun “moths” immediately after the modifying phrase illogically suggests that moths know that flying insects keep their backs pointed toward sunlight during the day. Choice D is incorrect because it results in a dangling modifier. The placement of the noun “moths” immediately after the modifying phrase illogically suggests that moths know that flying insects keep their backs pointed toward sunlight during the day.

Q10

D

D. superlubricity is reached when two surfaces' COF drops below 0.01.

Choice D is the best answer. The subject of the modifier “a nearly frictionless state” is “superlubricity.” Subject-modifier placement requires a modifier and its subject to be next to one another, so “superlubricity” must be the first word in the missing clause.

Choice A is incorrect. This choice creates a subject-modifier placement error. The subject of the modifier “a nearly frictionless state” is “superlubricity.” Subject-modifier placement requires a modifier and its subject to be next to one another, so “superlubricity” must be the first word in the missing clause. Choice B is incorrect. This choice creates a subject-modifier placement error. The subject of the modifier “a nearly frictionless state” is “superlubricity.” Subject-modifier placement requires a modifier and its subject to be next to one another, so “superlubricity” must be the first word in the missing clause. Choice C is incorrect. This choice creates a subject-modifier placement error. The subject of the modifier “a nearly frictionless state” is “superlubricity.” Subject-modifier placement requires a modifier and its subject to be next to one another, so “superlubricity” must be the first word in the missing clause.

Notes

Accept equivalent forms (e.g. $0.25 \equiv 1/4$). For grid-in items, decimal and fraction answers are both valid.
