Q1**C**

- C. While both are by Enriquez, the 2003 portrait of Luis Jimenez is a painting, and the 2016 portrait of Rudolfo Anaya is a drawing.

Choice C is the best answer. The sentence emphasizes a difference between the portraits, noting that one is a painting and the other is a drawing.

Choice A is incorrect. The sentence emphasizes a similarity between the two portraits rather than a difference. Choice B is incorrect. The sentence makes a generalization about Enriquez's portraits; it doesn't emphasize a difference between the portraits of Jimenez and Anaya. Choice D is incorrect. While the sentence notes a difference between Jimenez and Anaya, it doesn't emphasize a difference between, or even mention, their portraits.

Q2**A**

- A. Jordan Bennett's 2017 exhibition *Wije'wi* was followed a year later by his exhibition *Ketu'elmita'jik*.

Choice A is the best answer. The sentence emphasizes the order in which two of Jordan Bennett's exhibitions were held, indicating that *Wije'wi* took place in 2017 and *Ketu'elmita'jik* took place a year later (2018).

Choice B is incorrect. While the sentence mentions that exhibitions of Jordan Bennett's paintings took place in 2017 and 2018, it doesn't identify the exhibitions or emphasize the order in which they were held. Choice C is incorrect. While the sentence mentions two of Jordan Bennett's exhibitions, it doesn't indicate the order in which they were held. Choice D is incorrect. While the sentence mentions two of Jordan Bennett's exhibitions and specifies when one of them was held, it doesn't state when the exhibition at the Grenfell Art Gallery occurred. Thus, the order in which the two exhibitions were held isn't clearly established in the sentence.

Q3

B

- B. Though he was known locally during his lifetime, Wong Fei-hung's later depiction in television, film, and other media has turned him into an internationally known folk hero.
-

Choice B is the best answer. The sentence emphasizes the effect media had on building Wong Fei-hung's legacy, noting that media depictions after his lifetime turned Wong Fei-hung into an internationally known folk hero.

Choice A is incorrect. While it appears to emphasize the effect of media depictions of Wong Fei-hung, the sentence misrepresents information from the notes. According to the notes, media depictions resulted in Wong Fei-hung becoming an internationally known folk hero, not a locally known physician and kung fu master. Choice C is incorrect. The sentence discusses Wong Fei-hung's legacy, noting that he became an internationally known folk hero, but it doesn't emphasize the effect media had on building that legacy. Choice D is incorrect. The sentence indicates that Wong Fei-hung has been depicted in many media but doesn't emphasize the effect of these media depictions on building his legacy.

Q4

C

- C. Around 160 million years ago, a large moon (Chrysalis) came close enough to Saturn that tidal forces broke the moon apart; its debris then formed the planet's rings.
-

Choice C is the best answer. The sentence recounts the sequence of events proposed by the researchers: a large moon orbiting Saturn came close enough to the planet that it was broken apart by tidal forces, and the resulting debris formed Saturn's rings.

Choice A is incorrect because the sentence misrepresents information from the notes; according to the notes, tidal forces, not debris, caused the moon to break apart. Choice B is incorrect. The sentence offers information relevant to the 2022 study but doesn't recount the sequence of events proposed by the researchers. Choice D is incorrect. The sentence recounts a sequence, but it's a sequence of the researchers' activities, not the sequence of events proposed by the researchers.

Q5

C

- C. The researchers tagged 138 female wood ducks with radio frequency ID trackers and recorded how many nest boxes each duck visited during the nesting season.
-

Choice C is the best answer. The sentence presents the methods used in the study, noting that researchers tagged 138 female wood ducks with radio frequency ID trackers and recorded the number of nest boxes each duck visited.

Choice A is incorrect. While the sentence mentions an aspect of the study's design (that the researchers recorded the number of nest boxes the wood ducks visited), it primarily focuses on a finding of the study rather than the methods the researchers used. Choice B is incorrect. While the sentence mentions an aspect of the study's design (that the researchers tracked the number of nest boxes the wood ducks visited), it primarily focuses on a finding of the study rather than the methods the researchers used. Choice D is incorrect. The sentence misrepresents information from the notes. The researchers used radio frequency ID trackers to record the ducks' visits; they didn't investigate each site to look for evidence that it had been visited.

Q6

A

- A. While Jacobs proposes that crown shyness is caused by neighboring tree branches brushing against one another, Ng posits that it occurs when branches detect shade from nearby trees' branches.
-

Choice A is the best answer. The sentence compares the two proposed causes of crown shyness, noting the theories' differences: Jacobs cites branches brushing against one another as the cause, while Ng cites branches detecting shade from other branches as the cause.

Choice B is incorrect. The sentence merely identifies the existence of two theories for crown shyness; it doesn't compare the causes proposed by each theory. Choice C is incorrect. The sentence merely indicates that there are two different theories for crown shyness; it doesn't compare the causes proposed by each theory. Choice D is incorrect. The sentence merely explains one theory for crown shyness; it doesn't compare two theories.

Notes

Accept equivalent forms (e.g. $0.25 \equiv 1/4$). For grid-in items, decimal and fraction answers are both valid.
