Q1**A**

A. Hence,

Choice A is the best answer. “Hence” logically signals that the information in this sentence—that geologists couldn’t confirm the theory of cyclical Ice Ages until the 1960s—is a consequence of the previous information about the destructiveness of each Ice Age and the erasure of necessary geological evidence.

Choice B is incorrect because “moreover” illogically signals that the information in this sentence is merely additional to the previous information about the destructiveness of each Ice Age.

Instead, the sentence identifies a specific consequence of that information. Choice C is incorrect because “nevertheless” illogically signals that the information in this sentence is true despite the previous information about the destructiveness of each Ice Age. Instead, the sentence identifies a specific consequence of that information. Choice D is incorrect because “next” illogically signals that the information in this sentence is the next step in a process. Instead, the sentence identifies a specific consequence of the previous information.

Q2

A

A. Therefore,

Choice A is the best answer. "Therefore" logically signals that the action described in this sentence—the researchers theorizing that the dish was named for its effect on diners—is a result or consequence of the previous observation that the dish had a calming effect.

Choice B is incorrect because "alternately" illogically signals that the action described in this sentence offers an alternative or contrast to the previous observation that the dish had a calming effect. Instead, the action is a result or consequence of that observation. Choice C is incorrect because "nevertheless" illogically signals that the action described in this sentence occurs despite the previous observation that the dish had a calming effect. Instead, the action is a result or consequence of that observation. Choice D is incorrect because "likewise" illogically signals that this sentence merely adds a second, similar detail to the previous observation that the dish had a calming effect. Instead, this sentence describes an action that is a result or consequence of that observation.

Q3

D

D. by contrast,

Choice D is the best answer. This sentence compares two examples of Posey's tone: the "heartfelt language" he used in his poetry versus the "humor and satire" he used in his journalism. We know from these descriptions and from the claim in the previous sentence that the two tones are very different from each other. So the transition "by contrast" fits the context perfectly.

Choice A is incorrect. This choice uses a transition that indicates a restatement of the same idea in other words. But the text isn't restating the first example here. Instead, it's offering a second, totally different example. Choice B is incorrect. This choice uses a transition that means "admittedly." But the text isn't admitting or conceding anything here. Instead, these two examples work together to support the claim made in the first sentence. Choice C is incorrect. This choice uses a transition that indicates the addition of an agreeing idea. But these two examples are intentionally very different from each other, so "similarly" doesn't make sense here.

Q4

C

C. Indeed,

Choice C is the best answer. "Indeed" logically signals that the description of the art installation in this sentence—its blue room and preening unicorn that leave visitors "dazzled and confused"—offers additional emphasis in support of the previous sentence's claim about the installation's "whimsical yet perplexing experience."

Choice A is incorrect because "second" illogically signals that the description in this sentence is a second, separate claim from the previous sentence's claim about the installation's "whimsical yet perplexing experience." Instead, the specific details describing the installation emphasize and support the previous claim. Choice B is incorrect because "instead" illogically signals that the description in this sentence is an alternative to the previous sentence's claim about the installation's "whimsical yet perplexing experience." Rather, the specific details describing the installation emphasize and support that claim. Choice D is incorrect because "nevertheless" illogically signals that the description in this sentence is true despite the previous sentence's claim about the installation's "whimsical yet perplexing experience." Instead, the specific details describing the installation emphasize and support that claim.

Q5

D

D. Finally,

Choice D is the best answer. "Finally" logically signals that the information in this sentence—that scientists found evidence that chondrules were formed by shock waves in nearby nebulae—indicates a conclusion to the scientific debate mentioned in the previous sentences.

Choice A is incorrect because "for example" illogically signals that the information about the evidence for chondrule formation in this sentence exemplifies the information about the scientific debate regarding chondrule formation in the previous sentences. Instead, it indicates a conclusion to the debate. Choice B is incorrect because "therefore" illogically signals that the information in this sentence is a result of the previous information about the scientific debate regarding chondrule formation. Instead, it indicates a conclusion to the debate. Choice C is incorrect because "similarly" illogically signals that the information that follows is similar to the information about the scientific debate regarding chondrule formation in the previous sentences. Instead, it indicates a conclusion to the debate.

Q6

B

B. In so doing,

Choice B is the best answer. "In so doing" logically signals that the information in this sentence about Gibson's piece—that it blurs the distinction between contemporary art and traditional crafts—is a result or consequence of the piece's blending of particular Native and non-Native cultural symbols.

Choice A is incorrect. "Conversely" illogically signals that the information in this sentence contrasts with the previous information about the blending of particular cultural symbols in Gibson's piece. Instead, it presents a result or consequence of that information. Choice C is incorrect. "For instance" illogically signals that this sentence provides an example supporting the previous information about the blending of particular cultural symbols in Gibson's piece. Instead, it presents a result or consequence of that information. Choice D is incorrect. "In particular" illogically signals that this sentence provides specific details elaborating on the previous information about the blending of particular cultural symbols in Gibson's piece. Instead, it presents a result or consequence of that information.

Q7

D

D. Likewise,

Choice D is the best answer. "Likewise" logically signals that the information about Albert's son David is similar to the previous information about Albert Popa. Both artists have used unconventional surfaces for their work: Albert used concrete, and David is using ice floes.

Choice A is incorrect because "however" illogically signals that the information about David contrasts with the previous information about Albert Popa. Instead, it is similar to the previous information about Albert Popa. Choice B is incorrect because "indeed" illogically signals that the information about David emphasizes or strengthens the previous point about Albert Popa. Instead, it is similar to the previous information; it highlights a similarity between father and son. Choice C is incorrect because "second" illogically signals that the information about David is a second point or reason separate from the previous information about Albert Popa. Instead, it is similar to the previous information; it highlights a similarity between father and son.

Q8

A

A. Additionally,

Choice A is the best answer because “additionally” logically signals that the information in this sentence—that Idár founded the League of Mexican Women—is another instance of Idár fighting injustice, this time advocating for the rights of Mexican Americans.

Choice B is incorrect because “in conclusion” illogically signals that the information in this sentence sums up or concludes the discussion of Idár’s support for the Mexican people’s revolt. Instead, the founding of the League of Mexican Women is a separate instance of Idár fighting injustice. Choice C is incorrect because “for example” illogically signals that the information in this sentence is an example of how, as a newspaper reporter, Idár voiced support for the Mexican people’s revolt. Instead, the founding of the League of Mexican Women is a separate instance of Idár fighting injustice, this time in support of Mexican Americans. Choice D is incorrect because “rather” illogically signals that the information in this sentence offers a contrast or exception to the previous information about Idár’s support for the Mexican people’s revolt. Instead, the founding of the League of Mexican Women is a separate instance of Idár fighting injustice.

Q9

C

C. Likewise,

Choice C is the best answer. “Likewise” is a transition that indicates the addition of a new but related idea. In this sentence, the author is providing another similar example to that discussed in the previous sentence. Therefore, “likewise” works best in this context.

Choice A is incorrect. This choice uses a transition that means “admittedly.” But the text isn’t admitting or conceding anything here. Instead, these two examples work together to support the claim made in the first sentence. Choice B is incorrect. This choice uses an exemplification transition, which doesn’t make sense here. The second story is not an example of the story in the previous sentence—it’s another, similar story. And while both stories exemplify the first sentence in the text, the transition we’re looking for isn’t actually connected to that sentence. Choice D is incorrect. This choice uses a cause-and-effect transition, which doesn’t make sense here. The first story didn’t result in the events of the second story.

Q10

B

B. In many cases,

Choice B is the best answer. The first sentence makes the claim that using grime-eating bacteria has led to “impressive results.” This sentence supports that claim by describing the specific findings of the biologists’ experimentation. The transition “in many cases” fits the context perfectly.

Choice A is incorrect. This choice uses a disagreement transition. But this sentence actually agrees with the previous sentence. Both claim that grime-eating bacteria are better at cleaning artworks than chemicals. Choice C is incorrect. This choice uses a cause-and-effect transition, which doesn’t make sense in context. The fact that the results of the experimentation have been impressive overall doesn’t cause the bacteria to have proven more effective. Choice D is incorrect. This choice uses a transition that indicates the addition of a new idea. But this sentence doesn’t introduce a new idea. Instead, it elaborates on the same idea laid out in the previous sentence by describing the “impressive results” in more detail.

Notes

Accept equivalent forms (e.g. $0.25 \equiv 1/4$). For grid-in items, decimal and fraction answers are both valid.
