Q1**B****B.** That said,

Choice B is the best answer. "That said" logically signals that the statement in this sentence—that Metzinger offers a glimpse of four-dimensional space by depicting multiple, simultaneous perspectives—is true despite the point in the previous sentence (that Metzinger's painting doesn't technically represent a fourth dimension because humans can only see in three dimensions).

Choice A is incorrect because "moreover" illogically signals that the information in this sentence merely adds to the previous point about Metzinger's painting. Instead, it provides information that is true despite that previous point. Choice C is incorrect because "in other words" illogically signals that the information in this sentence is a paraphrase or restatement of the previous point about Metzinger's painting. Instead, it provides information that is true despite that previous point. Choice D is incorrect because "for example" illogically signals that the information in this sentence provides an example that supports the previous point about Metzinger's painting. Instead, it provides information that is true despite that previous point.

Q2

A

A. There,

Choice A is the best answer. "There" indicates that the work of calculating Coordinated Universal Time takes place at the International Bureau of Weights and Measures in France. Because "there" indicates a location, it fits the context perfectly.

Choice B is incorrect. This choice uses an exemplification transition, which doesn't make sense here. This sentence is describing where the work of coordinating Coordinated Universal Time takes place, not giving an example of the work described in the previous sentence. Choice C is incorrect. This choice uses an exemplification transition, which doesn't make sense here. This sentence is describing where the work of coordinating Coordinated Universal Time takes place, not giving an example of the work described in the previous sentence. Choice D is incorrect. This choice uses a disagreement transition. But this sentence doesn't disagree with the previous sentence. They both describe the work involved in calculating Coordinated Universal Time.

Q3

D

D. Additionally,

Choice D is the best answer. "Additionally" logically signals that the painting analysis discussed in this sentence is an additional part of the botany research discussed in the previous sentence. That is, to research which fruits Umbrians grew in the past, the botanist analyzes old paintings in addition to looking at old lists of ingredients.

Choice A is incorrect because "in sum" illogically signals that the painting analysis discussed in this sentence is a concluding summary of the botany research discussed in the previous sentence. Instead, the painting analysis is an additional part of that research. Choice B is incorrect because "instead" illogically signals that the painting analysis discussed in this sentence is an alternative to the botany research discussed in the previous sentence. Rather, the painting analysis is an additional part of that research. Choice C is incorrect because "thus" illogically signals that the painting analysis discussed in this sentence is a result of the botany research discussed in the previous sentence. Instead, the painting analysis is an additional part of that research.

Q4

D

D. Accordingly,

Choice D is the best answer. "Accordingly" logically signals that the information in this sentence—that the voting members awarded Banda Cuisillos the Best Banda Album award—is in accordance with, or results from, the previous information about the voters being impressed by Banda Cuisillos's album.

Choice A is incorrect because "in contrast" illogically signals that the information in this sentence contrasts with the previous information about voting members being impressed by Banda Cuisillos's album. Instead, the voters' decision to give the group the Best Banda Album award is in accordance with, or results from, that information. Choice B is incorrect because "meanwhile" illogically signals that the information in this sentence is separate from (while occurring simultaneously with) the previous information about the voting members being impressed by Banda Cuisillos's album. Instead, the voters' decision to give the group the Best Banda Album award is in accordance with, or results from, that information. Choice C is incorrect because "nevertheless" illogically signals that the information that follows is despite the information about the voting members being impressed by Banda Cuisillos's album. Instead, the voters' decision to give the group the Best Banda Album award is in accordance with, or results from, that information.

Q5

D

D. To that end,

Choice D is the best answer. "To that end" logically signals that the information in this sentence—the students' creation of a show with six starring female roles—is the product of a goal or desire in the previous sentence (the students' wish to develop a musical with roles for female actors).

Choice A is incorrect because "in other words" illogically signals that the information in this sentence is a paraphrase or restatement of the previous information about the students' wish to develop a musical with roles for female actors. Instead, the students' show is the product of that desire. Choice B is incorrect because "in summary" illogically signals that the information in this sentence summarizes the previous information about the students' wish to develop a musical with roles for female actors. Instead, the students' show is the product of that desire. Choice C is incorrect because "for example" illogically signals that the information in this sentence is merely an example of the previous information about the students' wish to develop a musical with roles for female actors. Instead, the students' show is the direct product of that desire.

Q6

A

A. Fittingly,

Choice A is the best answer. "Fittingly" logically signals that the naming of an unprecedented radiocarbon surge for Fusa Miyake is appropriate to the situation, since Miyake is the person who identified the surge (through her Yaku Island tree-ring analysis).

Choice B is incorrect because "similarly" illogically signals that the information in this sentence is similar to the previous information about Miyake's identification of a massive radiation burst through tree-ring analysis. Instead, the naming of the event for its discoverer is a fitting and appropriate outcome. Choice C is incorrect because "however" illogically signals that the information in this sentence contrasts with the previous information about Miyake's identification of a massive radiation burst through tree-ring analysis. Instead, the naming of the event for its discoverer is a fitting and appropriate outcome. Choice D is incorrect because "in other words" illogically signals that the information in this sentence is a paraphrase or restatement of the previous information about Miyake's identification of a massive radiation burst through tree-ring analysis. Instead, the naming of the event for its discoverer is a fitting and appropriate outcome.

Q7

A

A. in particular,

Choice A is the best answer. "In particular" logically signals that the information in this sentence—that maize and wheat supply chains transformed North American foodways into a global food system—provides specific, precise details elaborating on the more general information in the previous sentence about the transformation of North American foodways (with maize and wheat the "certain grains" at the center of it).

Choice B is incorrect because "alternatively" illogically signals that the information in this sentence is an alternative option to the previous information about the transformation of North American foodways. Instead, the roles of maize and wheat in creating a global food system are specific, precise details elaborating on that information. Choice C is incorrect because "by comparison" illogically signals that the information in this sentence is being compared to the previous information about the transformation of North American foodways. Instead, the roles of maize and wheat in creating a global food system are specific, precise details elaborating on that information. Choice D is incorrect because "second of all" illogically signals that the information in this sentence is a second, separate claim from the previous claim that North American foodways were transformed. Instead, the roles of maize and wheat in creating a global food system are specific, precise details elaborating on that information, rather than a separate claim.

Q8

D

D. Nevertheless,

Choice D is the best answer. “Nevertheless” logically signals that the claim in this sentence—that the telegenic Kennedy was ultimately considered the winner of the debate—is true despite the previous information about the poll of radio listeners.

Choice A is incorrect because “in other words” illogically signals that the claim in this sentence is a paraphrase of the previous information about the poll of radio listeners. Instead, Kennedy was ultimately considered the winner despite what that poll suggested about his performance. Choice B is incorrect because “therefore” illogically signals that the claim in this sentence is a result of the previous information about the poll of radio listeners. Instead, Kennedy was ultimately considered the winner despite what that poll suggested about his performance. Choice C is incorrect because “likewise” illogically signals that the claim in this sentence is similar to the previous information about the poll of radio listeners. Instead, Kennedy was ultimately considered the winner despite what that poll suggested about his performance.

Q9

A

A. Still,

Choice A is the best answer. “Still” logically signals that the information about Sher-Gil in this sentence—that she longed to leave Paris and return to India—contrasts with what one would expect after reading about Sher-Gil’s experiences in Paris in the previous sentences.

Choice B is incorrect because “therefore” illogically signals that the information about Sher-Gil in this sentence is a result or consequence of the descriptions in the previous sentences. Instead, this information contrasts with what one would expect after reading about Sher-Gil’s experiences in Paris. Choice C is incorrect because “indeed” illogically signals that the information about Sher-Gil in this sentence offers additional emphasis in support of the descriptions in the previous sentences. Instead, this information contrasts with what one would expect after reading about Sher-Gil’s experiences in Paris. Choice D is incorrect because “furthermore” illogically signals that the information about Sher-Gil in this sentence offers additional support for or confirmation of the descriptions in the previous sentences. Instead, this information contrasts with what one would expect after reading about Sher-Gil’s experiences in Paris.

Q10

c

C. Still,

Choice C is the best answer. "Still" logically signals that the information in this sentence about Old Faithful's thriving bacteria species is true despite the previous claim that conditions at the geyser seem as if they would be inhospitable to life.

Choice A is incorrect because "thus" illogically signals that the information in this sentence is a result or consequence of the previous claim about Old Faithful's seemingly inhospitable conditions. Instead, this information about the geyser's many thriving bacteria species is true despite the previous claim. Choice B is incorrect because "specifically" illogically signals that the information in this sentence provides specific, precise details elaborating on the previous claim about Old Faithful's seemingly inhospitable conditions. Instead, this information about the geyser's many thriving bacteria species is true despite the previous claim. Choice D is incorrect because "in other words" illogically signals that the information in this sentence serves as a paraphrase or restatement of the previous claim about Old Faithful's seemingly inhospitable conditions. Instead, this information about the geyser's many thriving bacteria species is true despite the previous claim.

Notes

Accept equivalent forms (e.g. $0.25 \equiv 1/4$). For grid-in items, decimal and fraction answers are both valid.
